

the dialectic exchange of insights. The advantage of such a selection is, of course, that the material does not easily become dated. In Part I, the editors show their respect for tradition in an introductory selection of statements which identify some significant Judeo-Christian centers: the Jewish tradition, the Roman Catholic Church, the Greek Orthodox community, and the Ecumenical Council of Churches. Special sections on community, secularity, and futurism (Moltmann and Metz) are included.

Part II deals with Social Ethics and Behavioral Science (particularly the sociological studies) and the discussion is centered about the interrelationship between religion (especially Christianity) and the scientific evaluation of man's social enterprises.

Part III is devoted to specific social issues; e.g. the development of peoples (Pope Paul) and the Third World; war and peace, violence and social change, Black Theology, urbanism and its problems, the social mission of the Church.

This book is a very valuable publication offering a wide variety of relevant readings in a theology of social responsibility.

*Religious Ferment in Asia.* Edited by Robert J. Miller. Lawrence, Kansas: The University Press of Kansas, 1974. vii + 194 pages. \$ . .

This new book is a collection of eleven papers most of which were originally presented at the 1969 Midwestern Conference on Asian Studies, focusing on themes of the politicization of religious values and organizations, popular reactions to contemporary attempts to modify traditional living patterns and norms, and the selectivity process operative in the use of tradition by reform elements. Five of the pieces concentrate upon Indian religion—Philip H. Ashby, "Religious Ferment in Asia," Joseph W. Elder, "The Gandhian Ethic of Work in India," A. Bharati, "The Language of Modern Hinduism: Cognitive Models and Ethnoscience Analysis," Ainslee T. Embree, "The Social Role of Religion in Contemporary India," and Beatrice D. Miller, "Lamaist Laity and Sangha in West Bengal, India." Three of the remaining essays are concerned with Japan and include H. Byron Earhart's "The Interpretation of the 'New Religions' of Japan as New Religious Movements," originally read at the 1969 AAR convention, and proposing a "phenomenology of new religious movements." All in all a very worthwhile collection for college libraries and for teachers in the history of religions.

Picken,2010-12-28 One of Japan s major religions Shinto has no doctrines and there are no sacred texts from which religious authority can be derived It does not have an identifiable historical founder and it has survived the vicissitudes of history through rituals and symbols rather than through continuity of doctrine Shinto is primarily a religion of nature centered on the cultivation of rice the basis of a culture with which the western world is not familiar in terms of either its annual cycle or the kind of lifestyle it generates The roots of the Shinto tradition probably precede this and reflect an awareness of the natural order The oldest shrines came to be located in places that inspired awe and wonder in their observers such as the great Fall of Nachi in Kumano or in mountains that conveyed a sense of power The expanded second edition of the Historical Dictionary of Shinto relates the history of Shinto through a chronology an introductory essay an extensive bibliography and over 800 cross referenced dictionary entries on

defined the Iranian home began to vanish and the influx of new household goods gradually led to the substantial physical expansion of the domestic milieu. Subsequently, architects, designers, and commercial advertisers shifted their attention from commercial and public architecture to the new home and its contents. Domesticity and consumer culture also became topics of interest among politicians, Shiite religious scholars, and the Left, who communicated their respective views via the popular media and numerous other means. In the interim, ordinary Iranian families, who were capable of selectively appropriating aspects of their immediate surroundings, demonstrated their resistance toward the officially sanctioned transformations. Through analyzing a series of case studies that elucidate such phenomena and appraising a wide range of objects and archival documents from furnishings, appliances, architectural blueprints and maps to photographs, films, TV series, novels, artworks, scrapbooks, work logs, personal letters, and reports, this book highlights the significance of private life in social, economic, and political contexts of modern Iran. Tackling the subject of home from a variety of perspectives, *Domesticity and Consumer Culture in Iran* thus shows the interplay between local aspirations, foreign influences, gender roles, consumer culture, and women's education as they intersect with taste, fashion, domestic architecture, and interior design. *Crossroads and Cultures, Volume I: To 1450* Bonnie G.
