Focusing on the Confucian transformation of Mulian opera and especially on the interplay between the civilizing effect of ritual performance and the rise of gentrified mercantile lineages in sixteenth century Huizhou prefecture this book develops a radically novel interpretation of both Chinese popular culture and the Confucian tradition in late imperial China **Dao**

**Philosophy of Religion** Nathan R. B. Loewen, Agnieszka Rostalska, 2023-06-01 Much philosophical thinking about religion in the Anglophone world has been hampered by the constraints of Eurocentrism colonialism and orientalism Addressing such limitations head on this exciting collection develops models for exploring global diversity in order to bring philosophical studies of religion into the globalized 21st century Drawing on a wide range of critical theories and methodologies and incorporating ethnographic feminist computational New Animist and cognitive science approaches an international team of

contributors outline the methods and aims of global philosophy of religion From considering the importance of orality in African worldviews to interacting with Native American perspectives on the cosmos and investigating contemplative studies in Hinduism each chapter demonstrates how expertise in different methods can be applied to various geographical regions building constructive options for philosophical reflections on religion Diversifying Philosophy of Religion raises important questions regarding who speaks for and represents religious traditions setting the agenda for a truly inclusive philosophy of religion that facilitates multiple standpoints *Interrelatedness in Chinese Religious Traditions* Diana

Arghirescu,2022-11-17 The study of religions is essential for understanding other cultures building a sense of belonging in a multicultural world and fostering a global intercultural dialogue Exploring Chinese religions as one interlocutor in this dialogue Diana Arghirescu engages with Song dynasty Confucian and Buddhist theoretical developments through a detailed study of the original texts of the Chan scholar monk Qisong 1007 1072 and the Neo Confucian master Zhu Xi 1130 1200 Starting with these figures she builds an interpretive theory focusing on ethical interrelatedness and proposes it as a theoretical tool for the study of the Chinese religious traditions By actively engaging with other contemporary theories of religion and refusing to approach Chinese religions with Western frameworks Arghirescu s comparative perspective makes it possible to uncover differences between the various Western and Chinese cultural presuppositions upon which these theories are built As such this book breaks new ground in the methodology of religious studies comparative philosophy and furthers our understanding of the Confucian Buddhist interaction Confucianism for the Twenty-First Century Chun-chieh

Huang,John A. Tucker,2023-06-12 This collection of essays explores the resilience and relevance of an ancient yet still vital teaching Confucianism for the century ahead and beyond finding in its many dimensions insights meaningful for the personal ethical socio economic and political challenges facing the global community and its best interests Drawing on perspectives from the international scholarly community the volume is multifaceted in its common goal of addressing contemporary issues in light of various Confucian teachings **Spirit, Qi, and the Multitude** Hyo-Dong Lee,2013-11-11 We live in an

increasingly global interconnected and interdependent world in which various forms of systemic imbalance in power have given birth to a growing demand for genuine pluralism and democracy As befits a world so interconnected this book presents a comparative theological and philosophical attempt to construct new underpinnings for the idea of democracy by bringing the Western concept of spirit into dialogue with the East Asian nondualistic and nonhierarchical notion of qi The book follows the historical adventures of the idea of qi through some of its Confucian and Daoist textual histories in East Asia mainly Laozi Zhu Xi Toegye Nongmun and Su un and compares them with analogous conceptualizations of the ultimate creative and spiritual power found in the intellectual constellations of Western and or Christian thought namely Whitehead s Creativity Hegel s Geist Deleuze s chaosmos and Catherine Keller s Tehom The book adds to the growing body of pneumatocentric Spirit centered panentheistic Christian theologies that emphasize God s liberating equalizing and pluralizing immanence in

the cosmos Furthermore it injects into the theological and philosophical dialogue between the West and Confucian and Daoist East Asia which has heretofore been dominated by the American pragmatist and process traditions a fresh voice shaped by Hegelian postmodern and postcolonial thought This enriches the ways in which the pluralistic and democratic implications of the notion of qi may be articulated In addition by offering a valuable introduction to some representative Korean thinkers who are largely unknown to Western scholars the book advances the study of East Asia and Neo Confucianism in particular Last but not least the book provides a model of Asian contextual theology that draws on the religious and philosophical resources of East Asia to offer a vision of pluralism and democracy A reader interested in the conversation between the East and West in light of the global reality of political oppression economic exploitation and cultural marginalization will find this book informative engaging and enlightening

**Can Different Cultures Think the Same Thoughts?** Kenneth Dorter, 2018-04-30 A welcome contribution to the burgeoning multicultural revolution in philosophy persuasively shows that ethics cannot be innocent of metaphysics Bryan W Van Norden author of Introduction to Classical Chinese Philosophy Kenneth Dorter's Can Different Cultures Think the Same Thoughts is a study of fundamental issues in metaphysics and ethics across major philosophical traditions of the world including the way in which metaphysics can be a foundation for ethics as well as the importance of metaphysics on its own terms Dorter examines such questions through a detailed comparison of selected major thinkers and classic works in three global philosophical traditions those of India China and the West In each chapter Dorter juxtaposes and compares two or more philosophers or classic works from different traditions from Spinoza and Shankara to Confucius and Plato to Marcus Aurelius and the Bhagavad Gita In doing so he explores different perspectives and reveals limitations and assumptions that might otherwise be obscure The goal of Dorter's cross cultural approach is to consider how far works from different cultures can be understood as holding comparable philosophical views Although Dorter reveals commonalities across the different traditions he makes no claim that there is such a thing as a universal philosophy Clearly there are fundamental disagreements among the philosophers and works studied Yet in each of the case studies of a particular chapter we can discover a shared or at least analogous way of looking at issues across different cultures All those interested in metaphysics ethics Indian philosophy Chinese philosophy and comparative philosophy will find much of interest in this book

Brown, 2015-03-26 Since the terrorist attacks on 9/11 the political roles of religious institutions and groups have captured international attention This book examines how religious institutions and organizations in various Asian countries are influencing democratic development and the shaping of government policies Religious Organizations and Democratization covers Taiwan Hong Kong Mainland China Korea Thailand the Philippines Malaysia Indonesia and Japan The chapters specifically address the engagement of Christian Buddhist Muslim and other

religious organizations in the advancement and or hindrance of democratization in the region The contributors consider such questions as Why have some religious organizations played a decisive role in democratic transitions while others remained politically dormant and other still acted in conservative alliances to block democratic development Why did some religious organizations that once were active and instrumental to democratic change lose their political vitality as soon as civil liberties were successfully introduced And why did other religious organizations irrespective of their roles in the process of democratic transition emerge as key political forces in the civil society
