Religiouss For Children:

Religion, Children's Literature, and Modernity in Western Europe, 1750-2000 Jan de Maeyer, 2005 In this book some 25 scholars focus on the relationship between religion children s literature and modernity in Western Europe since the Enlightenment c 1750 They examine various aspects of the phenomenon of children s literature such as types of texts age of readers position of authors design and illustration The role of religion in giving meaning both in a substantive sense as well as through the institutionalised churches is studied from an interdenominational point of view Judaism Roman Catholicism Protestantism and Anglicanism Finally the contribution of pedagogy and child psychology in the interaction between modernity religion and children s literature is also discussed Various articles give a broad overview of the tensions between aesthetics and ethics and the demand for cultural autonomy in the development of children s literature Children s bibles and missionary stories played an important part in the growing diversification of children s literature as did the publication of illustrated reviews for children Remarkable differences are highlighted in the involvement of religious societies and institutions episcopally approved publishing houses and supervisory bodies in the publication distribution and supervision of children s literature This volume adopts a comparative approach in exploring the underlying religious ideological and cultural dimensions of children s literature in modern society

Effects of Alevi-Sunni Marriages on Children's Religious Education and Family Relations Dr. Fatma Kurttekin, 2024-12-31 In this study the views of parents in Alevi Sunni marriages on the phenomenon of religion and their children s religious education are examined While there has been a growing body of research on the role and significance of religion in Alevi Sunni families limited attention has been paid to their attitudes towards their children s religious education particularly within the context of cross religious marriages Based on this this study aims to fill this research gap by examining the perspectives of parents in Alevi Sunni marriages on their children s religious education and family dynamics using qualitative methods to provide in depth insights Ten families living in Sivas Ankara and Tunceli who were contacted through snowball and purposive sampling participated in the study in which qualitative research techniques were used The data used in the study were collected through questionnaires and semi structured interview forms The data was analzed with the content analysis It was determined that the Alevi Sunni difference did not have a significant impact on the participants religious attitudes or their children s religious education Almost all parents stated that they wanted their children to choose their own path by acquiring experience and knowledge about both religious interpretations understandings The study identified two primary areas of difficulty in Alevi Sunni families familial opposition to the participants decision to marry and conflicts surrounding the children s religious education These tensions may stem from societal pressures to conform to sectarian norms and the fear of losing religious identity through cross mixed intrafaith marriages Such pressures highlight the need for open dialogue and acceptance within families which many participants reported as key to resolving conflicts The provision of religious education in the family and the religious identity

of children have been discussed in a separate study Therefore in this study participants views on compulsory religious education activities which are also a subject of debate in society were evaluated In parallel with the findings in the literature the participants opinions were grouped in three categories namely abolishing the courses making the courses optional and improving the courses along with preserving their compulsory status Following the interviews it was seen that the participants could have arguments mostly due to external factors and that their own religious understanding did not have any impact on family life religious attitudes or child rearing Attention was drawn to the need for freedom from prejudices acceptance of the other as he she is honesty trust and a communicative environment of dialogue in order to reduce the tension in these two areas

The Right of the Child to Religious Freedom in International Law Sylvie Langlaude,2007-11-30 The child s right to religious freedom in international law has never been considered in a comprehensive fashion yet key issues include the prevention of indoctrination religious clothing the relationship of the child with parents and religious communities and the duties of the state to the child Building on a sociological analysis of religious children a body of international legal materials is analysed against a theoretical model of what the child s right ought to be This book is the first attempt at analysing what international law says on the question the result is a compelling analysis of the definitive position of international law on the child s right to religious freedom

Religious Dimensions of Child and Family Life Harold Coward,Philip Cook,2006-01-01 When the UN Convention on the Rights of the Child UNCRC was unanimously approved by the UN General Assembly on November 20 1989 it was widely heralded as a landmark in children s advocacy and provided a useful framework for developing programs and advocating for children s well being However many children s programs are still designed with little thought to religious or cultural diversity even though the importance of culture was highlighted at the convention Religious Dimensions of Child and Family Life examines the UN Convention on the Rights of the Child from the perspectives of eight of the world s most practised religions Islam Christianity Hinduism Buddhism North American Native spiritual belief Judaism popular Chinese religious practice and Bah The authors of each article pay special attention to religious moral codes of conduct governing parental behaviour child rearing norms and the role of children in spiritual practice They pinpoint where positive support is provided but also where the religions criticize or disagree with the ideas of the Convention When considered in relation to the UN Convention these ideas provoke a lively discussion

Handbook of Children's Religious Education Donald Ratcliff,2008-05-22 Handbook of Children s Religious Education is a thorough and comprehensive treatment of the religious education of children ages six to twelve It covers virtually all the basic information that childhood educators need to know in order to be effective teachers and communicators

Handing Down the Faith Christian Smith,Amy Adamczyk,2020-07-02 A new examination of how and why American religious parents seek to pass on religion to their children The most important influence shaping the religious and spiritual lives of children youth and teenagers is their parents A myriad of studies show that the parents of American youth play the leading role in shaping the

character of their religious and spiritual lives even well after they leave home and often for the rest of their lives We know a lot about the importance of parents in faith transmission However we know much less about the actual beliefs feelings and activities of the parents themselves what Christian Smith and Amy Adamczyk call the intergenerational transmission of religious faith and practice To address that gap this book reports the findings of a new national study of religious parents in the United States The findings and conclusions in *Handing Down the Faith* are based on 215 in depth personal interviews with religious parents from many traditions and different parts of the country and sophisticated analyses of two nationally representative surveys of American parents about their religious parenting *Handing Down the Faith* explores the background beliefs informing how and why religious parents seek to pass on religion to their children examines how parenting styles interact with parent religiousness to shape effective religious transmission shows how parents have been influenced by their experiences as children influenced by their own parents reveals how religious parents view their congregations and what they most seek out in a local church synagogue temple or mosque explores the experiences and outlooks of immigrant parents including Latino Catholics East Asian Buddhists South Asian Muslims and Indian Hindus Smith and Adamczyk step back to consider how American religion has transformed over the last 100 years and to explain why parents today shoulder such a huge responsibility in transmitting religious faith and practice to their children The book is rich in empirical evidence and unique in many of the topics it explores and explains providing a variety of sometimes counterintuitive findings that will interest scholars of religion social scientists interested in the family parenting and socialization clergy and religious educators and leaders and religious parents themselves

Handbook of Religion and Social Institutions Helen Rose Ebaugh, 2006-01-26 *Handbook for Religion and Social Institutions* is written for sociologists who study a variety of sub disciplines and are interested in recent studies and theoretical approaches that relate religious variables to their particular area of interest The handbook focuses on several major themes Social Institutions such as Politics Economics Education Health and Social Welfare Family and the Life Cycle Inequality Social Control Culture Religion as a Social Institution and in a Global Perspective This handbook will be of interest to social scientists including sociologists anthropologists political scientists and other researchers whose study brings them in contact with the study of religion and its impact on social institutions

International Handbook of Inter-religious Education Kath Engebretson, Marian de Souza, Gloria Durka, Liam Gearon, 2010-08-17 This Handbook is based on the conviction of its editors and contributing authors that understanding and acceptance of as well as collaboration between religions has essential educational value The development of this Handbook rests on the further assumption that interreligious education has an important role in elucidating the global demand for human rights justice and peace Interreligious education reveals that the creeds and holy books of the world's religions teach about spiritual systems that reject violence and the individualistic pursuit of economic and political gain and call their followers to compassion for every human being It also seeks to lead students to an awareness that the followers of

religions across the world need to be and to grow in dialogical relationships of respect and understanding. An essential aim of interreligious education is the promotion of understanding and engagement between people of different religions and therefore it has great potential to contribute to the common good of the global community. Interreligious education has grown from the interfaith movement whose beginning is usually identified with the World Parliament of Religions held in Chicago in 1893. This was the first time in history that leaders of the eastern and western religions had come together for dialogue and to consider working together for global unity.

RULES FOR FREEDOM OF FAITH ANAN, 2022-06-01. The understanding of freedom of faith was generally limited to the freedom of believing in and praising a religion. However, the freedom of faith also includes the liberty of despising and not believing in a religion which often is not studied deeply. Therefore, the understanding of freedom of faith is partial and people do not have complete comprehension of freedom of faith. This book is based on such topics to explain the authentic and complete freedom of faith that is the relevant rules for freedom of faith.

Religious Pamphlets, 1914. *The Bloomsbury Reader in Religion and Childhood* Anna Strhan, Stephen G. Parker, Susan Ridgely, 2017-01-26. From recent sex abuse scandals in the Roman Catholic Church to arguments about faith schools and religious indoctrination, this volume considers the interconnection between the actual lives of children and the position of children as placeholders for the future. Childhood has often been a particular site of struggle for negotiating the location of religion in public and everyday social life and children's involvement and non involvement in religion raises strong feelings because they represent the future of religious and secular communities even of society itself. *The Bloomsbury Reader in Religion and Childhood* provides a rich resource for students and scholars of this interdisciplinary field and addresses wider questions about the distinctiveness of childhood and its religious dimensions in historical and contemporary perspective. Divided into five thematic parts, the volume provides classic contemporary and specially commissioned readings from a range of perspectives including the sociological, anthropological, historical and theological. Case studies range from Augustine's description of childhood in *Confessions*, the psychology of religion and childhood to religion in children's literature, religious education and Qur'anic schools. Religious traditions covered include Christianity, Judaism, Islam, Hinduism and Buddhism in the UK and Europe, USA, Latin America and Africa. An introduction situates each thematic part and each reading is contextualised by the editors. Guidance on further reading and study questions are provided on the book's webpage.

The Week-day Religious School John Philip Archdeacon, 1927. *Assigning Responsibility for Children's Health When Parents and Authorities Disagree: Whose Child?* Allan J. Jacobs, 2021-10-25. This book provides a multidisciplinary analysis of the potential conflict between a government's duty to protect children and a parent's right to raise children in a manner they see fit. Using philosophical, bioethical and legal analysis, the author engages with key scholars in pediatric decision making and individual and religious rights theory. Going beyond the parent-child dyad, the author is deeply concerned both with the interests of the broader society and with the appropriate limits of government interference in the

private sphere The text offers a balance of individual and population interests maximizing liberty but safeguarding against harm Bioethics and law professors will therefore be able to use this text for both a foundational overview as well as specific subject level analysis Clinicians such as pediatricians and gynecologists as well as policy makers can use this text to achieve balance between these often competing claims The book is written by a physician with practical and theoretical knowledge of the subject and deep sympathy for the parental and family perspectives As such the book proposes a new way of evaluating parental and state interventions in children s healthcare a refreshing approach and a useful addition to the literature **A child's religion, by the author of 'Jesus, the carpenter of Nazareth'**. Robert Bird (writer on religion.),1893
