the relationship between bureaucratic and interest group politics In this pioneering book Daniel Carpenter contributes to our understanding of institutions by presenting a unified study of bureaucratic autonomy in democratic regimes He focuses on the emergence of bureaucratic policy innovation in the United States during the Progressive Era asking why the Post Office Department and the Department of Agriculture became politically independent authors of new policy and why the Interior Department did not To explain these developments Carpenter offers a new theory of bureaucratic autonomy grounded in organization theory rational choice models and network concepts According to the author bureaucracies with unique goals achieve autonomy when their middle level officials establish reputations among diverse coalitions for effectively providing unique services These coalitions enable agencies to resist political control and make it costly for politicians to ignore the agencies ideas Carpenter assesses his argument through a highly innovative combination of historical narratives statistical analyses counterfactuals and carefully structured policy comparisons Along the way he reinterprets the rise of national food and drug regulation Comstockery and the Progressive anti vice movement the emergence of American conservation policy the ascent of the farm lobby the creation of postal savings banks and free rural mail delivery and even the congressional Cannon Revolt of 1910

Agriculture in the Midwest, 1815-1900 R. Douglas Hurt, 2023-07 2024 Jon Gjerde Prize Winner for best book in Midwestern History After the War of 1812 and the removal of the region s Indigenous peoples the American Midwest became a paradoxical land for settlers Even as many settlers found that the region provided the bountiful life of their dreams others found disappointment even failure and still others suffered social and racial prejudice In this broad and authoritative survey of midwestern agriculture from the War of 1812 to the turn of the twentieth century R Douglas Hurt contends that this region proved to be the country s garden spot and the nation s heart of agricultural production During these eighty five years the region transformed from a sparsely settled area to the home of large industrial and commercial cities including Chicago Milwaukee Cleveland and Detroit Still it remained primarily an agricultural region that promised a better life for many of the people who acquired land raised crops and livestock provided for their families adopted new technologies and sought political reform to benefit their economic interests Focusing on the history of midwestern agriculture during wartime utopian isolation and colonization as well as political unrest Hurt contextualizes myriad facets of the region s past to show how agricultural life developed for midwestern farmers and to reflect on what that meant for the region and nation

Clarke,2002-07-25 This book explains how US government activity in the 1930s led to gains in farm productivity **Rural Democracy** Marilyn P. Watkins,2019-05-15 What happens to social movements in rural settings when they do not face the divisive issues of race and

class Marilyn Watkins examines the stable political climate built by successive waves of Populism socialism the farmer labor movement and the Grange in turn of the century western Washington She shows how all of these movements drew upon the same community base empowered farmers and encouraged them in the belief that democracy independence and prosperity were realizable goals Indeed they were in a setting where agriculture was diversified farmers were debt free and critically women enjoyed equal status as activists in social movements Rural Democracy illuminates the problems that undermined Populism and other forms of rural radicalism in the South and the Midwest by demonstrating the political success of those movements where such problems were notably absent in Lewis County Washington By so doing Watkins convincingly demonstrates the continuing value of local community studies in understanding the large scale transformations that continue to sweep over rural America

Mama Learned Us to Work Lu Ann Jones,2003-10-16 Farm women of the twentieth century South have been portrayed as oppressed worn out and isolated Lu Ann Jones tells quite a different story in Mama Learned Us to Work Building upon evocative oral histories she encourages us to understand these women as consumers producers and agents of economic and cultural change As consumers farm women bargained with peddlers at their backdoors A key business for many farm women was the butter and egg trade small scale dairying and raising chickens Their earnings provided a crucial margin of economic safety for many families during the 1920s and 1930s and offered women some independence from their men folks These innovative women showed that poultry production paid off and laid the foundation for the agribusiness poultry industry that emerged after World War II Jones also examines the relationships between farm women and home demonstration agents and the effect of government sponsored rural reform She discusses the professional culture that developed among white agents as they reconciled new and old ideas about women s roles and shows that black agents despite prejudice linked their clients to valuable government resources and gave new meanings to traditions of self help mutual aid and racial uplift
