the accepted methodologies of epidemiology and international health Farmer points out that most current explanatory strategies from cost effective treatment to patient noncompliance inevitably lead to blaming the victims In reality larger forces global as well as local determine why some people are sick and others are shielded from risk Yet this moving autobiography is far from a hopeless inventory of insoluble problems Farmer writes of what can be done in the face of seemingly overwhelming odds by physicians and medical students determined to treat those in need whether in their home countries or through medical outreach programs like Doctors without Borders Infections and Inequalities weds meticulous scholarship in medical anthropology with a passion for solutions remedies for the plagues of the poor and the social illnesses that have sustained them

**AIDS and Accusation** Paul Farmer, 1992 In this book ethnographic historical and epidemiologic data are brought to bear on the subject of the Acquired Immune Deficiency Syndrome AIDS in Haiti The forces that have helped to determine rates and pattern of spread of Human Immunodeficiency Virus HIV are examined as are social responses to AIDS in rural and urban Haiti and in parts of North America History and its calculus of economic and symbolic power also help to explain why residents of a small village in rural Haiti came to understand AIDS in the manner that they did Drawing on several years of fieldwork the evolution of a cultural model of AIDS is traced In a small village in rural Haiti it was possible to document first the lack of such a model and then the elaboration over time of a widely shared representation of AIDS The experience of three villagers who died of complications of AIDS is examined in detail and the importance of their suffering to the evolution of a cultural model is demonstrated Epidemiologic and ethnographic studies are prefaced by a geographically broad historical analysis which suggests the outlines of relations between a powerful center the United States and a peripheral client state Haiti These relations constitute an important part of a political economic network termed the West Atlantic system The epidemiology of HIV and AIDS in Haiti and elsewhere in the Caribbean is reviewed and the relation between the degree of involvement in the West Atlantic system and the prevalence of HIV is suggested It is further suggested that the history of HIV in the Dominican Republic Jamaica Trinidad and Tobago and the Bahamas is similar to that documented here for Haiti
