## **Remaking Cities Contradictions Of The Recent Urban Environment:**

**Remaking Cities (Routledge Revivals)** Alison Ravetz, 2013-10-08 This book published in 1980 is an iconoclastic account of one of the pillars of the welfare state British town and country planning between 1945 and 1975 Always a fine balance between central control and market forces it was challenged by strains within and between the environmental professions and protest by people dispossessed or alienated by re shaped urban environments Remaking Cities critiques the export of western style planning to the developing world and reviews initiatives rooted in different understandings of growth appearing in those years Nearly forty years on many of the same issues beset us notably the depressingly familiar inner city problem despite countless reports funds and programmes But now our infrastructure and services once publicly owned are privatised and fragmented and local government progressively relegated The very core of planning development control is being pared in a struggle to regain the growth which led to our current crisis This gives fresh importance to the need for new modes of creating liveable sustainable environments emphasised in this important work **Remaking Cities** Alison

**Housing Supply** Quintin Bradley, 2023-03-17 The struggle for the right to housing is a battle over property rights and land use For housing to be provided as a human need land must be recognised as a common right Property Planning and Protest is a compelling new investigation into public opposition to housing and real estate development Its innovative materialist approach is grounded in the political economy of land value and it recognises the conflict between communities and real estate capital as a struggle over land and property rights Property Planning and Protest is about a social movement struggling for democratic representation in land use decisions The amenity groups it describes champion a democratic planned system that allocates land for social and environmental goals Situating this movement in a history of land reform and common rights this book sets out a persuasive new vision of democratic planning and affordable housing for all

Sustainable Communities Hugh Barton, 2013-12-02 This book re addresses the concepts of neighbourhood and community in a refreshing and challenging way It will be of immense benefit not only to town planners but also to all those professional and voluntary groups and politicians who seek to create the new communities of tomorrow From the Foreword by Jed Griffiths Past President of the Royal Town Planning Institute There is widespread support for the principle of creating more sustainable communities but much hazy wishful thinking about what this might mean in practice In reality we witness more the death of local neighbourhoods than their creation or rejuvenation reflecting an increasingly mobile privatized and commodified society Sustainable Communities examines the practicalities of re inventing neighbourhoods It is neither an idealistic utopian tract nor a designer's manual but is rather a serious attempt to address the real issues This collection of expert contributions examines the nature of local community and methods of building social capital presents the findings of a world wide survey of eco neighbourhoods and eco villages with case studies from the United Kingdom Europe America and Australia develops a fresh perspective on the planning and design of neighbourhoods in urban areas based on the eco system approach explores practical programmes for local resource management and the implications for community based decision making provides a detailed appendix listing current eco village and eco neighbourhood schemes by country Written by an interdisciplinary team of social and environmental scientists town planners and urban designers this is a thought provoking and important contribution to both the theory and practice of the development of sustainable communities **Richer**

**Futures** Ken Worpole, 2020-09-10 In every area of life traditional centralized party politics has been failing and the seeds of a new form of political life are being sown This is true in housing health education consumption and transport where public policy is attracting increasing criticism In an age of social alienation and urban despondency Richer Futures is a timely response to the growing interest in community based self help action It introduces new forms of communication and decision making and sets out a programme for a sustainable politics Contributions from some of the best known thinkers and writers on contemporary urban cultural and social policy and campaigns in Britain today pay tribute to the ideas and industrious activities of the influential writer and commentator Colin Ward This uplifting collection of essays looks forward to a new politics of self management and environmentally aware and sustainable lifestyles Ken Worpole has written a number of books on urban and cultural policy and a series of influential reports for Comedia Demos and the Department of the Environment Originally published in 1999 **Exhibitions and the Development of Modern Planning Culture** Robert

Freestone, Marco Amati, 2016-12-05 The evolution of city planning theory and practice in the first half of the twentieth century was captured and driven by a range of exhibitionary practices in a variety of settings globally from international expos to local public halls The agendas of the promoters varied but exhibitions generally drew their social legitimacy from their status as appropriate educative agencies of citizenship Bringing together a range of international case studies this volume explores the highly visual genre of public planning exhibitions worldwide In doing so it provides a unique lens on the

development of modern urban planning and design from the late 19th century to the present day Focussing mainly on the first half of the 20th century it looks in particular at historic exhibitions which sought to transform urban society s understanding of the possibilities of planning as a force for social betterment The visuality of presentation contemporary reactions and outcomes for the planning profession and the community are explored to make for a unique innovative and attractive approach to the history of planning ideas The five major themes are the visual representation of ideas and ideologies institutions and individuals involved the broader context of display and the impacts and implications for the development planning culture With contributors including Karl Fischer John Gold Carola Hein Peter Larkham Javier Monclus and Mark Tewdwr Jones the dominant intellectual paradigm further unifying the collection is planning history *Death and Survival in Urban Britain* Bill Luckin,2015-05-19 The narratives of disease hygiene developments in medicine and the growth of urban environments are fundamental to the discipline of modern history Here the eminent urban historian Bill Luckin re introduces a body of work which published together for the first time along with new material and contextualizing notes marks the beginning of this important strand of historiography Luckin charts the spread of cholera fever and the everyday but frequently deadly infections that afflicted the inhabitants of London and its new manufacturing districts between the 1830s and the end of the nineteenth century A second part Pollution and the Ills of Urban Industrialism concentrates on the water and smoke problems and the ways in which they came to be perceived defined and finally brought under a degree of control *Death and Survival in Urban Britain* explores the layered and interacting narratives within the framework of the urban revolution that transformed British society between 1800 and 1950 **The Planning of a New Town** London County Council,2015-03-05 The publication of *The Planning of a New Town* in 1961 aroused remarkable interest Its pages described a private new town sponsored by the London County Council LCC to be built at Hook in Hampshire a scheme that innovatively combined Garden City New Town traditions with sensitivity to modern design At its heart lay a multilevel and megastructural town centre intended to serve as a genuine focus for the gathering community featuring shops and amenities placed on a pedestrian deck with cars and servicing beneath The report itself proved extremely popular even though the New Town had fallen foul of political opposition at local and national levels and had been abandoned before any construction took place It offers an insight into the flux of ideas that surrounded New Town development in the early 1960s Analysing the world as it might have been not only identifies choices that were once available for shaping the built environment it also often reveals once cherished hopes and aspirations about how people might live in cities **Design History** Hazel Conway,2006-08-21 Hazel Conway introduces the student new to the subject to different areas of design history and shows some of the ways in which it can be studied and some of its delights and difficulties No background knowledge of design history art or architecture is assumed **The Globalized City** Frank Moulaert,Arantxa Rodriguez,Erik Swyngedouw,2003-03-27 This book explores the dynamics that have accompanied the implementation of large scale Urban

Development Projects UDPs in nine European cities within the European Union EU It contributes to the analysis of the relationship between urban restructuring and social exclusion integration in the context of the emergence of the European wide new regimes of urban governance These regimes reflect the reawakening of neo liberal policy and the rise of a New Urban Policy favouring private investments and deregulation of property and labour markets The selected UDPs further reflect global pressures and changing systems of local regional and or national regulation and governance These projects while being decidedly local capture global trends and new national and local policies as they are expressed in particular institutional forms and strategic practices The large scale urban interventions were deliberately chosen as reflections of a particular hegemonic and dominant expression of urban policy as pursued during the 1990s The book provides a panoramic view of urban change in some of Europe s greatest cities The nine case studies include The Europeanization of Brussels The Guggenheim museum in Bilbao the new financial district in Dublin the science university technology complex Adlershof in Berlin the 1998 World Expo in Lisbon Athens s bid to stage the Olympic Games Vienna s Donau City Copenhagen s Oresund project and Naples new business district These case studies testify to the unshakable belief the city elites hold in the healing effects that the production of new urban mega projects and events has on their city s vitality and development potential The book also analyses the down side of this development in terms of social exclusion the formation of new urban elites and the consolidation of less democratic forms of urban governance The principal aim is to show how the production of these new urban spaces is actually also part of the production of a new polity a new economy and new forms of living urban life that are not very promising for a socially harmonious and just future for metropolitan urban Europe      *Unhealthy Housing* R. Burrige,D. Ormandy,2005-10-09 *Unhealthy Housing* presents an analysis of the research into the health implications of housing and the significance for legal regulation of housing conditions Key experts present short papers together with an overview to give an evaluation of the significance of housing on the health of occupiers      Conceptions of Space and Place in Strategic Spatial Planning Simin Davoudi,Ian Strange,2008-11-24 Bringing together authors from academia and practice this book examines spatial planning at different places throughout the British Isles Six illustrative case studies of practice examine which conceptions of space and place have been articulated presented and visualized through the production of spatial strategies Ranging from a large conurbation London to regional Yorkshire and Humber and national levels the case studies give a rounded and grounded view of the physical results and the theory behind them While there is widespread support for re orienting planning towards space and place there has been little common understanding about what constitutes spatial planning and what conceptions of space and place underpin it This book addresses these questions and stimulates debate and critical thinking about space and place among academic and professional planners      *Neoliberal Spatial Governance* Phil Allmendinger,2016-04-14 *Neoliberal Spatial Governance* explores the changing nature of English town and city planning as it has slowly but clearly transformed Once a system for regulating and balancing change in the

built and natural environments in the public interest planning now finds itself facilitating development and economic growth for narrow sectional interests Whilst there is a lip service towards traditional values the progressive aims and inclusivity that provided planning's legitimacy and broad support have now largely disappeared The result is a growing backlash of distrust and discontent as planning has evolved into neoliberal spatial governance The tragedy of this change is that at a time when planning has a critical role in tackling major issues such as housing affordability and climate change it finds itself poorly resourced with low professional morale lacking legitimacy and support from local communities accused of bureaucracy and red tape from businesses and ministers and subject to regular disruptive reforms Yet all is not lost There is still demand and support for more comprehensive and progressive planning one that is not purely driven by the needs of developers and investors Resistance against the idea that planning exists to help roll out development is growing

**Neoliberal Spatial Governance** explores the background and implications of the changes in planning under the governments of the past four decades and the ways we might think about halting and reversing this shift

**Conservation in the Age of Consensus** John Pendlebury, 2008-09-17 This new text on the subject of conservation in the built environment provides a unique holistic view on the understanding of the practice of conservation connecting it with wider societal and political forces UK practice is used as a means along with international examples for bringing together a real understanding of practice with a social science analysis of the issues The author introduces ideas about the meanings and values attached to historic environments and how that translates into public policies of conservation

**The Practice of Modernism** John R. Gold, 2007-06-13 In this sequel to his widely acclaimed book *The Experience of Modernism* 1997 John Gold continues his detailed enquiry into the Modern Movement's involvement in urban planning and city design Making extensive use of information gained from hours of in depth interviews with architects of the time this new book examines the complex relationship between vision and subsequent practice in the saga of postwar urban reconstruction The Practice of Modernism traces the personal institutional and professional backgrounds of the architects involved in schemes for reconstruction and replanning deals directly with the progress of urban transformation focusing on the contribution that modern architects and architectural principles made to town centre renewal and social housing highlights how the exuberance of the 1960s gave way to the profound reappraisal that emerged by the early 1970s Written by an expert this is a key book on the planning aspects of the modernist movement for architectural historians urban geographers planners and all concerned with understanding the recent history of the contemporary city

**Remaking Cities** Alison Ravetz, 1980

**The SAGE Companion to the City** Tim Hall, Phil Hubbard, John Rennie Short, 2008-05-21 This book pulls together an exceptional range of literature in addressing the complexity of contemporary patterns and processes of urbanization It offers a rich array of concepts and theories and is studded with fascinating examples that illustrate the changing nature of cities and urban life Paul Knox Virginia Tech University The SAGE Companion to the City is a tour de force of contemporary urban studies At once a stocktake showcase

and springboard for scholarly approaches to cities and city life the editors have assembled a cohesive and convincing set of lucid insightful and critical essays of great quality Eschewing grand theory and deadening encyclopediasm the contributors refresh both longstanding concerns and explore new themes in ways both brilliantly accessible to newcomers and satisfying to the cognoscenti Robert Freestone University of New South Wales Organized in four sections The SAGE Companion to the City provides a systematic A Z to understanding the city that explains the interrelations between society culture and economy Histories explores power religion science and technology modernity and the landscape of the city Economies and Inequalities explores work and leisure globalisation innovation and the role of the state Communities explores migration and settlement segregation and division civility housing and homelessness Order and Disorder explores politics and policy planning and conflict law and order surveillance and terror An accessible guide to all areas of urban studies the text offers both a contemporary cutting edge reflection and measured historical and geographical reflection on urban studies It will be essential reading for students of any discipline interested in the city as an object of study

*Cities to be Tamed? Spatial Investigations across the Urban South* Beatrice De Carli, Francesco Chiodelli, Maddalena Falletti, 2014-07-08 Across the global South the rapid urbanisation and uneven development that have occurred over the past few decades have brought to the surface a tight connection between social conflicts and urban space Indeed the physical conformation of urban space is one of the primary factors that trigger social tensions with repercussions at the metropolitan regional and national scales Such tensions are related to the conditions of social and spatial inequality which characterise many urban areas across the South they can also be connected to contingent political and institutional orders which find in the materiality of space both the means and the cause of conflicts among different groups amidst diverging territorial demands and the overlapping of competing struggles for power At the same time new possibilities arise in the concreteness of space including innovative forms of local activism adapting strategies of self organisation and unconventional relations between the formal and the informal city On acknowledging the multifaceted nature of the urban space there arises a question which constitutes the core problem addressed by the book are cities to be tamed This volume gathers a series of cross disciplinary contributions on these topics spanning from architecture and urban design to planning social theory and geography These contributions revolve around two core themes The first concerns the agency of design in contexts of informality and centres on the missing unexpected pursued exchange between projects and realities The second concerns the complex relationship between spatial planning politics and conflicts in contexts characterised by marked ethnic political and social tensions Contributors Alessandro Balducci Scott A Bollens Jeffrey Chan Kok Hui Francesco Chiodelli Laure Criqui Viviana d Auria Beatrice De Carli Bruno De Meulder Annalies De Nijs Maddalena Falletti Nabeel Hamdi Joud M I Khasawneh Hamed Khosravi Olivier Legrand Colin Marx Carmen Mendoza Arroyo Lina Scavuzzo Erez Tzfadia Ignacio Castillo Ulloa Faith Wong and Oren Yiftachel
