Bilateral Legacies in East and Southeast Asia N Ganesan, 2016-04-29 This edited volume examines the concept of overhangs or legacies or negative stereotypical images in international relations and their impact on bilateral relations between geographically proximate states in East Asia The case studies chosen Japan Korea Japan China Vietnam China Thailand Myanmar and Thailand Cambodia demonstrate conclusively that bilateral overhangs or legacies have a significant impact on contemporary international relations Such images are regularly replicated and stoked by a variety of constituencies including state agencies for their own selfish interests The evidence also points to the fact that such bilateral relationships are relatively self contained and often operate with their own dynamics Powerful condensation symbols are appropriated to weave a story of the virtuous self and the stereotypical other This negative image and its replication is important to an understanding of turbulent bilateral relations in East Asia and also helps to inform how such relations can be brought to an even keel

Outsourcing War Amy E. Eckert, 2016-02-19 Recent decades have seen an increasing reliance on private military contractors PMCs to provide logistical services training maintenance and combat troops In Outsourcing War Amy E Eckert examines the ethical implications involved in the widespread use of PMCs and in particular questions whether they can fit within customary ways of understanding the ethical prosecution of warfare Her concern is with the *ius in bello* right conduct in war strand of just war theory Just war theorizing is generally built on the assumption that states and states alone wield a monopoly on the legitimate use of force Who holds responsibility for the actions of PMCs What ethical standards might they be required to observe How might deviations from such standards be punished The privatization of warfare poses significant challenges because of its reliance on a statist view of the world Eckert argues that the tradition of just war theory which predates the international system of states can evolve to apply to this changing world order With an eye toward the practical problems of military command Eckert delves into particular cases where PMCs have played an active role in armed conflict and derives from those cases the modifications necessary to apply just principles to new agents in the landscape of war

Rising Powers, Global Governance and Global Ethics Jamie Gaskarth, 2015-02-11 Two of the dominant themes of discussion in international relations scholarship over the last decade have been global governance and rising powers Underlying both discussions are profound ethical questions about how the world should be ordered who is responsible for addressing global problems how change can be managed and how global governance can be made to work for peoples in developing as well as developed states Yet these are often not addressed or only briefly mentioned as ethical dilemmas by commentators This book seeks to ask critical and profound questions about what relative shifts in power among states might mean for the ethics and practice of global governance Three key questions are addressed throughout the volume Who is rising and how How does this impact on global governance What are the implications of these developments for global ethics Through these questions some of the key academics in the field explore how far debates over global ethics are really between competing visions of how international society should be governed as opposed to tensions within the same broad paradigm By examining how governance works in practice across the Middle East

Africa and Asia the contributors to this volume seek to critique the way global governance discourse masks the exercise of power by elites and states both developed and rising This work will be essential reading for all those with an interest in the future of international relations and global governance On Global Learning Jason Ralph,2023-09-21 Global security climate and health challenges have all created a deep seated unease about international society s capacity to cope with change International Relations should help practitioners develop appropriate responses but Jason Ralph argues that IR would be better positioned to do so if it drew more explicitly on the insights of classical Pragmatism By bringing this tradition in from the margins Ralph comprehensively engages norm practice realist and global IR theory to extend the new constructivist research agenda in a normative direction He develops a Pragmatic Constructivist approach to assess how well communities of practice facilitate the learning that mitigates emergent social problems and improves lived experiences This normative assessment focuses on the extent to which communities of practice are characterized by inclusive reflexivity and deliberative practical judgment These two tests are then applied to critique existing communities of practice including the UN Security Council the UNFCCC and the WHO *European Union Foreign Policy* C. Bickerton,2015-08-16 Scholars and policymakers in EU foreign policy lament the EU s inability to assert itself on the world stage This book explains this weakness by arguing that EU foreign policy is burdened by various internal functions and systemizes the analysis of internal functionality pushing the study beyond the concern with effectiveness **The Global Transformation** Barry Buzan,George Lawson,2015-02-05 This book shows how the political economic military and cultural revolutions of the nineteenth century shaped modern international relations
