Rembrandt's Nightwatch The History Of A Painting:

Rembrandt's Nightwatch Willem Hijmans, Luitsen Kuiper, Annemarie Vels Heijn, 1978 Rembrandt's Nightwatch : the Mystery Revealed Georges Boka, Bernard Courteau, 1994 **A Corpus of Rembrandt Paintings** J. Bruyn, B. Haak, S.H. Levie, P.J.J. van Thiel, E. van de Wetering, 2013-05-14

Since the second half of the last century art historians realizing that the image of Rembrandt's work had become blurred with time have attempted to redefine the artist's significance both as a source of inspiration to other artists and as a great artist in his own right. In order to carry on the work started by previous generations a group of leading Dutch art historians from the university and museum world joined forces in the late 1960s in order to study afresh the paintings usually ascribed to the artist. The researchers came together in the Rembrandt Research Project which was established to provide the art world with a new standard reference work which would serve the community of art historians for the nearby and long future. They examined the originals of all works attributed to Rembrandt taking full advantage of today's sophisticated techniques including radiography, neutron activation, autoradiography, dendrochronology and paint sample analysis thereby gaining valuable insight into the genesis and condition of the paintings. The result of this meticulous research is laid down chronologically in the following Volumes: A Corpus of Rembrandt Paintings Volume I which deals with works from Rembrandt's early years in Leiden 1629-1631 published in 1982; A Corpus of Rembrandt Paintings Volume II covering his first years in Amsterdam 1631-1634 published in 1986; THIS VOLUME A Corpus of Rembrandt Paintings Volume III goes into his later years of reputation 1635-1642 published in 1990. Each Volume consists of a number of Introductory Chapters as well as the full Catalogue of all paintings from the given time period attributed to Rembrandt. In this catalogue each painting is discussed and examined in a detailed way comprising a descriptive and interpretative and a documentary section. For the authenticity evaluation of the paintings three different categories are used to divide the works in A Paintings by Rembrandt, B Paintings of which Rembrandt's authorship cannot be positively either accepted or rejected, and C Paintings of which Rembrandt's authorship cannot be accepted. This volume Volume III contains 820 pages starting with three introductory chapters and discussing 86 paintings. In clear and accessible explanatory text all different paintings are discussed, larded with immaculate images of each painting. Details are shown where possible as well as the results of modern day technical imaging. In this volume important paintings including the Night Watch are discussed.

Rembrandt Ernst van de Wetering, 1997. Rembrandt's paintings have been admired throughout centuries because of their artistic freedom. But Rembrandt was also a craftsman whose painting technique was rooted in the tradition. *Rembrandt The Painter at Work* is the result of a lifelong search for Rembrandt's working methods, his intellectual approach to the art of painting and the way in which his studio functioned. Ernst van de Wetering demonstrates how this knowledge can be used to tackle questions about authenticity and other art historical issues. Approximately 350 illustrations, half of which are reproduced in colour, make this book into a monumental tribute to one of the world's most important painters. The

book is if one may be allowed to say such a thing about a serious scholarly work a gripping good read Christopher White The Burlington Magazine This is a very rich book a deeply felt analysis of an artist whom the author knows better than almost any other living scholar Christopher Brown Times Literary Supplement

A Corpus of Rembrandt Paintings V Ernst van de Wetering, 2013-12-12 This volume is the fifth volume of A Corpus of Rembrandt Paintings a project devoted to all Rembrandt's paintings This is the work of The Rembrandt Research Project consisting of a group of scholars led since 1993 by Professor Ernst van de Wetering The project began in 1968 with the aim of separating Rembrandt's own paintings from the vast number of Rembrandtesque paintings made by his many apprentices and followers Having opted for a chronological approach to the cataloguing of Rembrandt's paintings from 1625 till 1642 in the first three volumes it was decided in 1993 to adopt a thematic approach for further volumes This was largely to facilitate the recognition of different hands The new approach yielded much more information not only about Rembrandt's working methods but also about the function and meaning of his works This expanded field of view meant that etchings and drawings with similar themes also needed to be included In 2005 Volume IV appeared devoted to Rembrandt's self portraits in painting etching and drawing Volume V consists of a catalogue and analysis of the so called small scale history and genre paintings That theme was chosen because this type of complex work shows a variety of full length protagonists acting in different narrative settings For this reason in the 17th century painting etching or drawing biblical and mythological scenes was looked upon as an artist's greatest challenge The choice of this theme proved to be highly fruitful in several ways Small scale history pieces reveal Rembrandt's artistic ambitions most clearly They also offer the authors a much more accurate view of the daily routine in Rembrandt's studio his apprentices mostly copied this type of work or used it as a starting point for their own As a result it was easier to distinguish the works by the master himself from those of his pupils All aspects of the skills necessary to create a pictorial illusion play a part in the creation of small figured history paintings These aspects were referred to as the basis of the noble art of painting in Rembrandt's days Two seventeenth century painter theoreticians discussed these principles systematically in two books which up till now have only sporadically been consulted in the context of 17th century studio practice Karel van Mander wrote his *Grond der edel vry schilder const* Basis of the Art of Painting in 1604 and Samuel van Hoogstraten produced his *Inleyding tot de hooge schoole der schilder konst* Academy of Painting in 1678 Van Hoogstraten was a pupil of Rembrandt between 1642 and 48 Comparing the two books and considering them in relation to Rembrandt's oeuvre gradually reveals his original views on painting and how these had developed during his career Thus the authors of this new Volume of A Corpus have gained an unexpected and profound insight into Rembrandt's ideas and approach to his art The basic aspects of painting included the following topics function and methods of drawing human proportions various positions poses and gestures of figures ways of arranging a scene's protagonists in a composition facial expressions of a variety of emotions light shadows and reflected light landscape and animals draperies and articles of clothing methods of painting and

various characteristics and uses of colours The way these basic aspects were selected and dealt with presumed that the more practical side to the art of painting would be learned by the apprentice in the daily routine of his master's studio With the development of art history in the nineteenth century the basic aspects of the art of painting listed above acquired the vague label of style However the seventeenth century categorization of the basic aspects provides a much more acute means of probing the views and criteria for judging a painting by Rembrandt and his contemporaries than the concept of style Volume V in the series *A Corpus of Rembrandt Paintings* breaks new ground from the point of view of art history not only in its approach to Rembrandt as an artist but more particularly to his thinking about painting Moreover a detailed comparison of Rembrandt's works and those by his apprentices who based their works on his led to a profound and detailed understanding of Rembrandt's views on pictorial quality In art historical literature quality usually does not feature prominently since it is regarded as being too subjective This comparative approach together with the analysis of seventeenth century categories of thought about painting have given the research on Rembrandt a new impetus at the same time allowing us to see more clearly through seventeenth century eyes That is why the new volume of the *Corpus* is an important publication not only for art historians but also for all who want to fully enjoy the numerous works of art that date back to the Dutch Golden Age now scattered in museums around the world

Simon Kick (1603-1652) Jochai Rosen, 2021-08-25 This book is the first complete study of the life and work of the 17th century Dutch painter Simon Kick 1603 1652 Kick was active in Amsterdam the largest and busiest city of the Netherlands alongside Rembrandt Simon Kick began painting only at the

age of 32 driven to do so only due to the tragic death of his brother in law and since the economic situation necessitated it Nevertheless he was an excellent painter who focused on painting portraits histories and above all genre topics He was one of only ten 17th century Dutch painters to practice the unique genre formula of the guardroom scene His guardroom scenes stand out as being more gentrified than others due to the fact that he assimilated in them the elegance of contemporary civic guard portraits His figures are particularly striking since they are well characterized often depicted in a contemplative mood and imbued with a strong psychological presence The fact that he started his career late and passed away at an early age robbed us of a great painter The book includes a biography of the painter as well as a systematic and comparative iconographical and stylistic study of his work with an attached critical oeuvre catalogue As such it provides an important tool for both art enthusiasts and collectors as well as art professionals such as students scholars auctioneers and art dealers

century paintings in Rembrandt's style were actually painted by Rembrandt himself had already become an issue during his lifetime. It is an issue that is still hotly disputed among art historians today. The problem arose because Rembrandt had numerous pupils who learned the art of painting by imitating their master or by assisting him with his work as a portrait painter. He also left pieces unfinished to be completed by others. The question is how to determine which works were from Rembrandt's own hand. Can we, for example, define the criteria of quality that would allow us to distinguish the master's work from that of his followers? Do we yet have methods of investigation that would deliver objective evidence of authenticity? To what extent do research techniques used in the physical sciences help? Or are we after all still dependent on the subjective expert eye of the connoisseur? The book provides answers to these questions. Prof. Ernst van de Wetering, the author of our forthcoming book which deals with these questions, has been closely involved in all aspects of this research since 1968, the year the renowned Rembrandt Research Project (RRP) was founded. In particular, he played an important role in developing new criteria for authentication. Van de Wetering was also witness to the way the often overly zealous tendency to doubt the authenticity of Rembrandt's paintings got out of hand. In this book, he re-attributes to the master a substantial number of unjustly rejected Rembrandts. He also was closely involved in the re-discovery of a considerable number of lost or completely unknown works by Rembrandt. The verdicts of earlier specialists, including the majority of members of the original RRP up to 1989, were based on connoisseurship, the self-confidence in one's ability to recognise a specific artist's style and hand. Over the years, Van de Wetering has carried out seminal research into 17th-century studio practice and ideas about art current in Rembrandt's time. In this book, he demonstrates the fallibility of traditional connoisseurship, especially in the case of Rembrandt, who was par excellence a searching artist. The methodological implications of this critical view are discussed in an introductory chapter which relates the history of the developments in this turbulent field of research. Van de Wetering's account of his own involvement in it makes this book a lively and sometimes unexpectedly personal account. The catalogue section presents a chronologically ordered survey of Rembrandt's entire painted oeuvre of 336 paintings, richly illustrated and annotated. For all the paintings re-attributed in this book, extensive commentaries have been included that provide a multi-faceted new insight into Rembrandt's world and the world of art historical research. *Rembrandt's Paintings Revisited* is the concluding sixth volume of *A Corpus of Rembrandt Paintings* (Volumes I-V, 1982, 1986, 1989, 2005, 2010). It can also be read as a revisionary critique of the first three Volumes published by the old RRP team up till 1989 and of Gerson's influential survey of Rembrandt's painted oeuvre of 1968-69. At the same time, the book is designed as an independent overview that can be used on the basis that anyone seeking more detailed information will be referred to the five previous digital versions of the Volumes and the detailed catalogues published in the meantime by the various museums with collections of Rembrandt paintings. This work of art history and art research should belong in the library of every serious art historical institute, university, or museum.
