Remembered Future:

A Remembered Future Harold Fisch, 1984 *Kingship and Memory in Ancient Judah* Ian Douglas Wilson, 2017 *Kingship and Memory in Ancient Judah* investigates kingship in Judean discourse particularly in the early Second Temple era. In doing so it contributes to our knowledge of literature and literary culture in ancient Judah and also makes a significant contribution to questions of history and historiographical method in biblical studies **Handbook of Episodic Memory** Ekrem Dere, Alexander Easton, Lynn Nadel, Joseph P. Huston, 2008-09-04 Episodic memory is the name of the kind of memory that records personal experiences instead of the mere remembering of impersonal facts and rules. This type of memory is extremely sensitive to ageing and disease so an understanding of the mechanisms of episodic memory might lead to the development of therapies suited to improve memory in some patient populations. Episodic memory is unique in that it includes an aspect of self awareness and helps us to remember who we are in terms of what we did and what we have been passed through and what we should do in the future. This book brings together a renowned team of contributors from the fields of cognitive psychology, neuropsychology and behavioural and molecular neuroscience. It provides a detailed and comprehensive overview of recent developments in understanding human episodic memory and animal episodic like memory in terms of concepts, methods, mechanisms, neurobiology and pathology. The work presented within this book will have a profound effect on the direction that future research in this topic will take. The first and most current comprehensive handbook on what we know about episodic memory: the memory of events, time, place and emotion and a key feature of awareness and consciousness. Articles summarize our understanding of the mechanisms of episodic memory as well as surveying the neurobiology of episodic memory in patients, animal studies and functional imaging work. Includes 34 heavily illustrated chapters in two sections by the leading scientists in the field **Memory** Bennett L. Schwartz, 2020-07-08 *Memory Foundations and Applications* covers key memory models, theories and experiments and demonstrates how students can improve their own ability to learn and remember. The three pronged organization provides an overview of the psychological science of Memory, builds expertise in advanced topics and allows the reader to think about how memory research benefits society *Progress in Episodic Memory Research* Ekrem Dere, Armin Zlomuzica, Angelica Staniloiu, Hans J. Markowitsch, 2016-05-25 Episodic memory refers to the ability to remember personal experiences in terms of what happened and where and when it happened. Humans are also able to remember the specific perceptions, emotions and thoughts they had during a particular experience. This highly sophisticated and unique memory system is extremely sensitive to cerebral ageing, neurodegenerative and neuropsychiatric diseases. The field of episodic memory research is a continuously expanding and fascinating area that unites a broad spectrum of scientists who represent a variety of research disciplines including neurobiology, medicine, psychology and philosophy. Nevertheless, important questions still remain to be addressed. This research topic on the *Progress in Episodic Memory Research* covers past and current directions in research dedicated to the

The Murmuring Deep Avivah Gottlieb Zornberg, 2009-03-31 From one of the most innovative and acclaimed biblical commentators at work today here is a revolutionary analysis of the intersection between religion and psychoanalysis in the stories of the men and women of the Bible For centuries scholars and rabbis have wrestled with the biblical narrative attempting to answer the questions that arise from a plain reading of the text In The Murmuring Deep Avivah Zornberg informs her literary analysis of the text with concepts drawn from Freud Winnicott Laplanche and other psychoanalytic thinkers to give us a new understanding of the desires and motivations of the men and women whose stories form the basis of the Bible Through close readings of the biblical and midrashic texts Zornberg makes a powerful argument for the idea that the creators of the midrashic commentary the medieval rabbinic commentators and the Hassidic commentators were themselves on some level aware of the complex interplay between conscious and unconscious levels of experience and used this knowledge in their interpretations In her analysis of the stories of Adam and Eve Noah Jonah Abraham Rebecca Isaac Joseph and his brothers Ruth and Esther how they communicated with the world around them with God and with the various parts of their selves Zornberg offers fascinating insights into the interaction between consciousness and unconsciousness In discussing why God has to seduce Adam into entering the Garden of Eden or why Jonah thinks he can hide from God by getting on a ship Zornberg enhances our appreciation of the Bible as the foundational text in our quest to understand what it means to be human
