Philosophy and Phenomenology of the Body M. Henry, 2012-12-06 THE SEEMING CONTINGENCY OF THE QUESTION CONCERNING THE BODY AND THE NECESSITY FOR AN ONTOLOGICAL ANALYSIS OF THE BODY When we disclose and bring forth within ontological investigations aimed at making possible the elaboration of a phenomenology of the ego a problematic concerning the body we may well seem with respect to the general direction of our analysis to elaborate only a contingent and accidental specification of such an analysis and to forget its true goal Up to the present we pursued the clarification of the being of the ego 2 on the level of absolute subjectivity and in the form of an ontological analysis Is it not possible that the reasons which motivated the project of conducting the investigations relative to the problem of the ego within a sphere of absolute immanence may cease to be valid because we might be led to believe that the body also constitutes the object of these investigations and belongs to a first reality whose study is the task of fundamental ontology Actually does not the body present itself to us as a transcendent being as an inhabitant of this world of ours wherein subjectivity does not reside If consequently the body must constitute the theme of our philosophical reflection is it not on condition that the latter submit to a radical modification and cease to be turned toward subjectivity in order to be a reflection on

The Body Yasuo Yuasa, 1987-07-01 This book explores mind body philosophy from an Asian perspective It sheds new light on a problem central in modern Western thought Yuasa shows that Eastern philosophy has generally formulated its view of mind body unity as an achievement a state to be acquired rather than as essential or innate Depending on the individual's own developmental state the mind body connection can vary from near dissociation to almost perfect integration Whereas Western mind body theories have typically asked what the mind body is Yuasa asks how the mind body relation varies on a spectrum from the psychotic to the yogi from the debilitated to the athletic from the awkward novice to the master musician Yuasa first examines various Asian texts dealing with Buddhist meditation kundalini yoga acupuncture ethics and epistemology developing a concept of the dark consciousness not identical with the psychoanalytic unconscious as a vehicle for explaining their basic view He shows that the mind body image found in those texts has a striking correlation to themes in

contemporary French phenomenology Jungian psychoanalysis psychomatic medicine and neurophysiology The book clears the ground for a provocative meeting between East and West establishing a philosophical region on which science and religion can be mutually illuminating
