and communication concepts Martín Ramírez Víctor M. Espinosa, 2015-11-01 Martín Ramírez a Mexican migrant worker and psychiatric patient without formal artistic training has been hailed by leading New York art critics as one of the twentieth century's greatest artists. His work has been exhibited alongside masters such as José Clemente Orozco, Diego Rivera, Rufino Tamayo, Salvador Dalí, Marc Chagall, Paul Klee, and Joan Miró. A landmark exhibition of Ramírez's work at the American Folk Art Museum in 2007 broke attendance records and garnered praise from major media including the New York Times, New Yorker, and Village Voice. Martín Ramírez offers the first sustained look at the life and critical reception of this acclaimed artist. Víctor Espinosa challenges the stereotype of outsider art as an indecipherable enigma by delving into Ramírez's biography and showing how he transformed memories of his life in Mexico as well as his experiences of displacement and seclusion in the United States into powerful works of art. Espinosa then traces the reception of Ramírez's work from its first anonymous showings in the 1950s to contemporary exhibitions and individual works that have sold for as much as a half million dollars. This eloquently told story reveals how Ramírez's three decades long incarceration in California psychiatric institutions and his classification as chronic paranoid schizophrenic stigmatized yet also protected what his hands produced. Stripping off the labels psychotic artist and outsider master, Martín Ramírez demonstrates that his drawings are not passive manifestations of mental illness. Although he drew while confined as a psychiatric patient, the formal elements and content of Ramírez's artwork are shaped by his experiences of cultural and physical displacement.

Siegler, Merrill F. Elias, 2012-12-06 It has been estimated that there are at least 2 500 000 adults 10% of the population above age 65 who are currently in need of some sort of mental health services. Kramer, Taube, and Redick, 1973 Other estimates are even higher. e.g. Pfeiffer, 1977 It is expected that this number will increase as the number of older adults increases over the next 40 years. Probably less than 400 clinical psychologists are now providing services to this age group. The number of elderly patients actually seen by these psychologists is very very small. One national survey found that of 353 psychologists who reported that they had older clients, only 495 individuals were seen for psychological testing and 1423 for psychotherapy in the one month just prior to the response. Dye, in press Assuming that the same individuals were not seen for both testing and therapy within the one month period, a questionable assumption, approximately 08% of the at least two and one half million older adults in need of psychological services are now being supplied with these services in some form or another. Thus the need for increased involvement of clinical psychology with the aged is undeniable. However few resources currently exist which will serve to increase the number of clinical psychologists trained to meet this need. Probably less than 100 clinical psychologists living today have received any kind of formal graduate training in the clinical psychology of the aged. Storandt, 1977

Among Us Gerald N. Grob, 1994-02-21 In the first comprehensive one volume history of the treatment of the mentally ill the foremost historian in the field compellingly recounts our various attempts to solve this ever present dilemma from colonial times to the present Gerald Grob charts the growth of mental hospitals in response to the escalating numbers of the severely and persistently mentally ill and the deterioration of these hospitals under the pressure of too many patients and too few resources Mounting criticism of psychiatric techniques such as shock therapies drugs and lobotomies and of mental institutions as inhumane places led to a new emphasis on community care and treatment While some patients benefited from the new community policies they were ineffective for many mentally ill substance abusers Grob's definitive history points the way to new solutions It is at once an indispensable reference and a call for a humane and balanced policy in the future
