Throughout the European Renaissance authors famous and obscure debated the nature goals and value of rhetoric In a host of treatises handbooks letters and orations written in both Latin and the vernacular they attempted to assess the central role that rhetoric clearly played in their culture Was rhetoric a valuable tool of legitimation for rulers or a dangerous instrument of resistance to political and religious authority Would its employment maintain the social hierarchy or foster social mobility Was rhetoric merely the art of lies or was it a means to arrive at the only form of truth available to human beings In this fascinating volume Wayne A Rebhorn enables modern day readers to follow Renaissance thinkers as they struggle with these and other crucial questions about rhetoric Arranged chronologically the twenty five selections in this anthology most of which have never before appeared in English include key texts by Petrarch Valla Erasmus Vives Melanchthon Ramus Wilson Amyot and Bacon All the selections have been fully annotated and have headnotes providing essential background information In addition the volume features a biographical glossary of frequently mentioned historical and mythological figures a comprehensive index and a detailed bibliography

Lees,2016-04-30 Modern scholarship generally treats the debate about women querelle des femmes as a late medieval phenomenon perhaps touched upon by canonic authors like Chaucer but truly begun by Christine de Pizan 1364 1429 and therefore primarily of English and French origin That emphasis has obscured the ways in which both writers were participating in a much wider much older cultural phenomenon with varied and intractable roots Articles in this collection explore how gender is put into debate in Anglo Saxon German Spanish and Italian cultures and they re examine French and Middle English debate literature The collection is carefully planned to be accessible to students seeking an idea of the debate s motifs and contours while maintaining the high level of issue involvement necessary to commanding a more seasoned audience Contributors include Pamela Benson Alcuin Blamires Margaret Franklin Roberta Krueger Clare Lees and Gillian Overing Ann Matter Karen Pratt Helen Solterer Julian Weiss and Barbara Weissberger

Renaissance is famous as a period of intellectual and cultural flourishing associated with the rebirth of antiquity. It is now recognized however that there was considerable continuity with the preceding medieval centuries. While much that was new about the Renaissance derived from the recovery, restoration and revival of ancient ideas and culture, the process of renewal took place against the backdrop of intellectual and cultural structures inherited from the Middle Ages. This volume of *A Cultural History of Ideas* explores the ways in which distinctively Renaissance ideas and a distinctively Renaissance culture emerged from the complex interaction of ancient and medieval influences. The emphasis is on the interplay between culture and ideas observed at close quarters through studies of scholars, physicians, botanists and scientists, popes, cardinals and bishops, Catholics, Lutherans, Calvinists, Anabaptists and heretics, missionaries and Mughal administrators, artists, craftsmen, merchants and butchers. Contributors to the volume look not only at philosophical, scientific, medical, pharmacological, astronomical, astrological and cosmological treatises but also at gardens, botanical collections and drawings, woodcuts, broadsides, frontispieces, peace treaties and commercial contracts. The 6 volume set *A Cultural History of Ideas* is part of *The Cultural Histories Series*. **The Humanist-Scholastic Debate in the Renaissance and the Reformation** Erika Rummel, 2013-10-01. In the last half of the fifteenth century the classic Platonic debate over the respective merits of rhetoric and philosophy was replayed in the debate between humanists and scholastics over philology and dialectic. The intense dispute between representatives of the two camps fueled many of the most important intellectual developments of the Renaissance and Reformation. Erika Rummel delves into the extensive primary sources of the times, bringing the issues and their continuing legacy to light and making a valuable contribution to our understanding of the intellectual climate of early modern Europe. Rummel demonstrates how the passionately fought issue of the period changed focus as humanists such as Lorenzo Valla and Desiderius Erasmus applied philological skills to Scripture. The controversy over form versus content entered a new phase pitting humanists trained as philologists against scholastic theologians trained as dialecticians. Rummel shows us the framework for the debate still intact as the medium message dichotomy and traces its development into quarrels over qualification and entitlement in the academy as theologians and humanists disputed the intellectual and territorial boundaries of their respective disciplines. Finally in the first half of the sixteenth century we see the controversy entering the sphere of doctrinal dispute. The question of authority became centered not only on professional competence but also on the more explosive issues of faith and Christian teaching. This in-depth study will reclaim the attention of those who believe these debates were merely personal and episodic. Rummel's innovative research provides ample evidence that the

polemics of the age arose from a fundamental conflict over methodology and the freedom to pursue research *Debate Index* Carnegie Library of Pittsburgh, 1911 **Religion, Conflict, and Democracy in Modern Africa** Samuel K.

Elolia, 2012-03-02 Spanning various regions of Sub Saharan Africa the authors of this volume come together to explore the complex relationship between religion and democracy in contemporary Africa As a result of the end of the Cold War and the fall of the Soviet Union many African countries have come to the realization however partial that political and social change is inevitable in spite of government heavy handedness and threats It has also become evident that no political system that refuses to permit freedom of political expression and alternative systems of governance could continue to be sustained It is in precisely this political climate that religious institutions have collaborated with other elements of civil society to call for political reforms with the church often becoming the prominent voice against oppressive governments in countries such as Kenya and South Africa It is the purpose of this book to assess how religion shapes political issues and to what extent religious forces influence the civil society By acknowledging the role of the civil society the essays recognize the resilience that comes out of Africa even when the sociopolitical situation seems unbearable Seven Lies about Catholic History Diane Moczar, 2010-09 The world hates the Church that Jesus founded just as He said it would John 15 18 It reviles her doctrines mocks her moral teachings and invents lies about her history In every age but especially in our modern day historians and political powers have distorted the facts about her past or just made up novel falsehoods from scratch to make the Church and the civilization it fostered seem corrupt backward or simply evil In Seven Lies about Catholic History Diane Moczar Islam at the Gates tackles the most infamous and prevalent historical myths about the Church popular legends that you encounter everywhere from textbooks to T V and reveals the real truth about them She explains how they got started and why they re still around and best of all she gives you the facts and the arguments you need to set the record straight about The Inquisition how it was not a bloodthirsty institution but a merciful and necessary one Galileo s trial why moderns invented a myth around it to make science appear incompatible with the Catholic faith it s not The Reformation why the 16th century Church was not totally corrupt as even some Catholics wrongly believe and how the reformers made things worse for everybody and other lies that the world uses to attack and discredit the Faith Written in a brisk style that s fun and easy to read Seven Lies about Catholic History provides the lessons that every Catholic needs in order to defend and explain not just apologize for the Church s rich and complex history **The Sex of Knowing** Michèle Le Doeuff, 2013-10-18 Michèle Le Doeuff is a leading French philosopher and one of the most important feminist thinkers writing today The Sex of Knowing Le Doeuff s most significant work to date provides a comprehensive account of her views This is the first English translation of her inspiring book Le Doeuff s target is the continuing tendency to think that men are more rational more analytic than women a tendency that persists in spite of our thinking we know better She argues that the conceptual links between masculinity and rationality are deeply rooted in the public imagination and institutions of learning and continue to have

devastating effects on what women are able to achieve To shed light on the depth and persistence of the problem Le Doeuff leads us on provocative archeological journey through the great texts and authors of the past and present from Plato and Descartes to Evelyn Fox Keller and Kate Millett in search of the origins and extent of a set of contemporary reflexes that hold misogynistic thinking in place both in the larger society and within science and philosophy An ambitious and highly persuasive book *The Sex of Knowing* received widespread critical attention in the French press Lorraine Code and Kathryn Hamer s superb translation is sure to have a similar impact on English speaking audiences everywhere **Cornelius**

**Agrippa, The Humanist Theologian and His Declamations** Marc van der Poel,1997-05-01 This study based on a fresh reading of the entire correspondence the surviving orations declamations and other relevant treatises contains an innovative interpretation of the philosophical and theological thought of Henry Cornelius Agrippa of Nettesheim 1486 1535 The first chapters contain a close study of his controversy with the scholastic theologians which Agrippa carried on throughout his life particularly with the theologians of Louvain University Detailed analyses of Agrippa s declamations are included in the second part of the book The chapter on the humanist declamation offers a new approach to the interpretation of rhetorical texts in the heyday of learned humanism in Northern Europe in this context special attention is paid to Agrippa s indebtedness to Erasmus Throughout the book Agrippa emerges as an important intermediary between scholasticism and humanism and a strong opponent of the professional theologians of his time Standing Apart Miranda Wilcox,John D. *Women's History as Scientists* Leigh Ann Whaley,2003-08-13 A comprehensive historical review of the debates surrounding women s contributions and roles in science with emphasis on women s access to education training and professional careers This remarkable work illuminates the debates surrounding women s involvement with science throughout history covering a broad range of disciplines Unlike a biographical compendium of great scientists it examines the question posed throughout history Are women capable of doing science Whether people have the right to even ask the question is germane to the debate itself The coverage discusses Hypatia the first female scientist about whom we have information examines the contradictory behavior of the church in the treatment of women during the medieval era and covers the 17th century debates over women s education It examines women physicians discusses feminism and science and delves into why there are so few women in science even today The debate that began during the time of Plato and Aristotle

Haron,2019-01-03 In addition to offering a comprehensive overview and fair insight over more than twenty five years into the relations between two South Middle Powers namely South Africa and Malaysia this book also discusses them within their respective regional structures and evaluates their respective diplomatic and commercial connections It also explores issues that have generally be neglected by International Relations specialists and in this regard it gives attention to cultural contacts that bring to the fore the critical role of non state actors in international affairs Since the ideas espoused by South Africa and Malaysia s political leaders are rooted in their specific national and broad regional philosophies the study also unpacks the notions of the African ways vis vis the Asian ways in maintaining and sustaining state to state relations within the two regions This book which uses Critical Theory as an appropriate framework that takes full cognisance of various developments in International Relations will be of interest to scholars and researchers in both the Social Sciences and the Humanities
