**Handbook to Life in Renaissance Europe** Sandra Sider, 2007 The word renaissance means rebirth and the most obvious example of this phenomenon was the regeneration of Europe's classical Roman roots The Renaissance began in northern Italy in the late 14th century and culminated in England in the early 17th century Emphasis on the dignity of man though not of woman and on human potential distinguished the Renaissance from the previous Middle Ages In poetry and literature individual thought and action were prevalent while depictions of the human form became a touchstone of Renaissance art In science and medicine the macrocosm and microcosm of the human condition inspired remarkable strides in research and discovery and the Earth itself was explored situating Europeans within a wider realm of possibilities Organized thematically the Handbook to Life in Renaissance Europe covers all aspects of life in Renaissance Europe History religion art and visual culture architecture literature and language music warfare commerce exploration and travel science and medicine education daily life

**Writing East** Iain Macleod Higgins, 2010-11-24 No

work revealed more of the mysterious East to statesmen explorers readers and writers of the late Middle Ages than the Book of John Mandeville One of the most widely circulated documents of its day it first appeared in French between 1356 and 1371 and was soon translated into nine other European languages Ostensibly the account of one English knight s journeys through Africa and Asia it is rather a compilation of travel writings first shaped by an unknown redactor Writing East is a study of how Mandeville s Travels came to appear in its various versions explaining how it went through a series of transformations as it reached new audiences in order to serve as both a response to previous writings about the East and an important voice in the medieval conversation about the nature and limits of the world Higgins offers a palimpsestic reading of this multi text that demonstrates not only how the original French author overwrote his precursors but also how subsequent translators molded the material to serve their own ideological agendas

**The Homosexual Revival of Renaissance Style, 1850-1930** Y. *Bibliographie Internationale de l'Humanisme et de la Renaissance*, 1992      *Science, Technology, and Warfare* Monte D. Wright, Lawrence J. Paszek, 2001 This book originally published in 1969 discusses the development of the complex relationships between science and technology and warfare from the Renaissance to the 1960s The nature of warfare has always been largely determined by contemporary technology Instances of technological change undertaken for the sake of military advantage have also been relatively common in history The relationships between science and warfare however have been much more variable and ambiguous Science Technology and Warfare requires a fourth term to be complete Management because the primary military innovator never has been the scientist technologist or soldier but rather the administrative organizer of victory      **Proceedings of the Military History Symposium, USAF Academy** United States.
