Renaissance In Perspective:

The Renaissance in Perspective Philip Lee Ralph, 1974 **Changing Images of Pictorial Space** William V. Dunning, 1991-03-01 No artist critic or art historian disputes the importance of recording how and why our conceptions and methods of depicting pictorial space have changed from ancient to modern times and yet no previous book has provided a comprehensive history centered around these changing images of pictorial space and the ways in which their evolution reflects ideological changes in society Dunning traces the two thousand year evolution of the conception and the depiction of space in European primarily Italian and French and American painting Unraveling one illusory image after another into their particular elements he explains the development of new styles and images in painting as a continuous rearrangement of these basic elements Following this progression through the Greco Roman period the Italian Renaissance impressionism and the end of modern art the author concludes with today's postmodern concentration on linguistic aspects in painting a change from the former emphasis on space and illusion *Changing Images of Pictorial Space* with over forty illustrations will be of interest to a wide audience from art historians painters and art educators to general readers who wish to understand more about one of the central organizing principles in all schools and periods of art *The Renaissance* Lillo Canta, 1995-01 A boy studies the background and work of the artists of the Italian Renaissance and how their discovery of how to depict perspective in painting spread to other parts of Europe The Psychology of Perspective and Renaissance Art Michael Kubovy, 1986 Michael Kubovy an experimental psychologist recounts the lively history of the invention of perspective in the fifteenth century and shows how as soon as the invention spread it was used to achieve subtle and fascinating aesthetic effects A clear presentation of the fundamental concepts of perspective and the reasons for its effectiveness drawing on the latest laboratory research on how people perceive leads into the development of a new theory to explain why Renaissance artists such as Leonardo and Mantegna used perspective in unorthodox ways which have puzzled art scholars This theory illuminates the author's broader consideration of the evolution of art the book proposes a resolution of the debate between those who believe that the invention discovery of perspective is a stage in the steady progress of art and those who believe that perspective is merely a conventional and arbitrary system for the representation of space *The Renaissance Rediscovery of Linear Perspective* Samuel Y. Edgerton, 1976 *The Poetics of Perspective* James Elkins, 2018-10-18 Perspective has been a divided subject orphaned among various disciplines from philosophy to gardening In the first book to bring together recent thinking on perspective from such fields as art history literary theory aesthetics psychology and the history of mathematics James Elkins leads us to a new understanding of how we talk about pictures Elkins provides an abundantly illustrated history of the theory and practice of perspective Looking at key texts from the Renaissance to the present he traces a fundamental historical change that took place in the way in which perspective was conceptualized first a technique for constructing pictures it slowly became a metaphor for subjectivity That gradual transformation he observes has

led to the rifts that today separate those who understand perspective as a historical or formal property of pictures from those who see it as a linguistic cognitive or epistemological metaphor Elkins considers how the principal concepts of perspective have been rewritten in work by Erwin Panofsky Hubert Damisch Martin Jay Paul Ricoeur Jacques Lacan Maurice Merleau Ponty and E H Gombrich The Poetics of Perspective illustrates that perspective is an unusual kind of subject it exists as a coherent idea but no one discipline offers an adequate exposition of it Rather than presenting perspective as a resonant metaphor for subjectivity a painter s tool without meaning a disused historical practice or a model for vision and representation Elkins proposes a comprehensive revaluation The perspective he describes is at once a series of specific pictorial decisions and a powerful figure for our knowledge of the world *Perspective in Renaissance Painting* Said A. M. Seddik, 2016-11-06 Linear perspective is not just a geometrical conception of how to conceive or present objects on a pictorial space it s a system of thinking a philosophy of art and a complicated structural theorem May be the Italian painters were the first to apply its techniques in painting however the architect had as well applied the theory of perspective in their great accomplishment in building churches as a dominant dogma and a place of worshiping God To create the sensation of third dimension in painting the early Italian painters used the chiaroscuro as basic techniques to draw the vanishing point where the conception of pictorial space is possible This return to the Euclidian geometry couldn t be done without the study of its solid geometry that attempted in the beginning to do more than replicate what the human eye perceives according to the tenets of Euclidian geometry which medieval Europeans understood as synonymous with the vision of God True the Italian painters were influenced by the Greek geometry and its notion of beauty that was endorsed for centuries in the classic style The Italian schools of art in Florence Siena Padua were giving classes in how to reproduce the Greek s great masterpieces However this very didactical mean of learning wasn t limited in just reproducing the Greek painting and its geometrical perspective of deepness but also in their composition of objects which showed the sky on the top While the medieval painters used golden as background their paintings were flat and missing the tree Euclidian s notions of space harmony unity and infinity The perception of space was limited on drawing geometrical lines without the opportunity to depict the deepness in composing the space **Looking at Art** Peter V. Moak, 2016-09-06 This guide contains a new approach to looking at and appreciating art One not found elsewhere It makes you aware of abilities you already have to see things in various ways The key to these abilities is what I call the visual ego the place between your eyes from which you see the world The guide then describes a series of particular ways of seeing and making works of art Finally it applies these ways which I call perspectives to works of art painting sculpture architecture and the decorative arts covering a period of some seventy thousand years The results I find to be amazing including new understandings and appreciation of many works of art and artists and their place in the history of art **Noël Carroll and Film** Mario Sluga, 2019-01-30 Noël Carroll is one of the most prolific widely cited and distinguished philosophers of art but how specifically has cinema impacted his thought This

book one of the first in the acclaimed Film Thinks series argues that Carroll's background in both cinema and philosophy has been crucial to his overall theory of aesthetics. Often a controversial figure within film studies as someone who has assertively contested the psychoanalytic, semiotic and Marxist cornerstones of the field, his allegiance to alternative philosophical traditions has similarly polarised his readership. Mario Slušan proposes that Carroll's defence of the notions of truth and objectivity provides a welcome antidote to anything goes attitudes and postmodern scepticism towards art and popular culture including film. Carroll's thinking has loosened the grip of continental philosophers on cinema studies from Maurice Merleau-Ponty to Gilles Deleuze and Jacques Lacan by turning to cognitive and analytical approaches. Slušan goes further to reveal that Carroll's methods of evaluation and interpretation in fact usefully bridge gaps between these opposing sides to look at artworks anew. Throughout Slušan revisits and enriches Carroll's definitions of popular art, mass art, horror, humour and other topics and concludes by tracing their origins to this important thinker's relationship with the medium of cinema.

The Virtual Window Anne Friedberg, 2009-02-13 From the Renaissance idea of the painting as an open window to the nested windows and multiple images on today's cinema, television and computer screens, a cultural history of the metaphoric, literal and virtual window. As we spend more and more of our time staring at the screens of movies, televisions, computers and handheld devices, windows full of moving images, texts and icons, how the world is framed has become as important as what is in the frame. In *The Virtual Window*, Anne Friedberg examines the window as metaphor, as architectural component and as an opening to the dematerialized reality we see on the screen. In *De pictura* 1435, Leon Battista Alberti famously instructed painters to consider the frame of the painting as an open window. Taking Alberti's metaphor as her starting point, Friedberg tracks shifts in the perspectival paradigm as she gives us histories of the architectural window, developments in glass and transparency and the emerging apparatuses of photography, cinema, television and digital imaging. Single point perspective, Alberti's metaphorical window, has long been challenged by modern painting, modern architecture and moving image technologies. And yet, notes Friedberg, for most of the twentieth century the dominant form of the moving image was a single image in a single frame. The fractured modernism exemplified by cubist painting, for example, remained largely confined to experimental avant-garde work. On the computer screen, however, where multiple windows coexist and overlap, perspective may have met its end. In this wide-ranging book, Friedberg considers such topics as the framed view of the camera obscura, Le Corbusier's mandates for the architectural window, Eisenstein's opinions on the shape of the movie screen and the multiple images and nested windows commonly displayed on screens today. *The Virtual Window* proposes a new logic of visuality, framed and virtual, an architecture not only of space but of time.

Digital Material Marianne van den Boomen, 2009 This is a compelling study of the often controversial role and meaning of the new media and digital cultures in contemporary society. Three decades of societal and cultural alignment of new media yielded to a host of innovations, trials and problems accompanied by versatile popular and academic discourse. New Media Studies crystallized internationally into an established

academic discipline which begs the question where do we stand now which new issues have emerged now that new media are taken for granted and which riddles remain unsolved and is contemporary digital culture indeed all about you or do we still not really understand the digital machinery and how it constitutes us as you From desktop metaphors to Web 2 0 ecosystems from touch screens to bloggging to e learning from role playing games to Cybergoth music to wireless dreams this timely volume offers a showcase of the most up to date research in the field from what may be called a digital materialist perspective **The City Rehearsed** , Continuity and Change in Art Sidney J. Blatt,Ethel S. Blatt,2014-04-04 The representation of the form of objects and of space in painting from paleolithic through contemporary time has become increasingly integrated complex and abstract Based on a synthesis of concepts drawn from the theories of Piaget and Freud this book demonstrates that modes of representation in art evolve in a natural developmental order and are expressions of the predominant mode of thought in their particular cultural epoch They reflect important features of the social order and are expressed in other intellectual endeavors as well especially in concepts of science A fascinating evaluation of the development of cognitive processes and the formal properties of art this work should appeal to professionals and graduate students in developmental cognitive aesthetic personality and clinical psychology to psychoanalysts interested in developmental theory and to anyone interested in cultural history especially the history of art and the history of science

The Parthenon and Liberal Education Geoff Lehman,Michael Weinman,2018-03-01 The Parthenon and Liberal Education seeks to restore the study of mathematics to its original place of prominence in the liberal arts To build this case Geoff Lehman and Michael Weinman turn to Philolaus a near contemporary of Socrates The authors demonstrate the influence of his work involving number theory astronomy and harmonics on Plato s Republic and Timaeus and outline its resonance with the program of study in the early Academy and with the architecture of the Parthenon Lehman and Weinman argue that the Parthenon can be seen as the foremost embodiment of the practical working through of mathematical knowledge in its time serving as a mediator between the early reception of Ancient Near Eastern mathematical ideas and their integration into Greek thought as a form of liberal education as the latter came to be defined by Plato and his followers With its Doric architecture characterized by symmetria commensurability and harmonia harmony joining together concepts explored contemporaneously by Philolaus the Parthenon engages dialectical thought in ways that are of enduring relevance for the project of liberal education Dealing with the Visual Caroline van Eck,Edward Winters,2017-11-30 One of the issues underlying current debates between practitioners of art history visual culture and aesthetics is whether the visual is a unique irreducible category or whether it can be assimilated with the textual or verbal without any significant loss Can paintings buildings or installations be read in the way texts are read or deciphered or do works of visual art ask for their own kind of appreciation This is not only a question of choosing the right method in dealing with visual works of art but also an issue that touches on the roots of the disciplines involved can a case be made for the visual as an irreducible category of art

and if so how is it best studied and appreciated In this anthology this question is approached from the angles of three disciplines aesthetics visual culture and art history Unlike many existing overviews of visual culture studies it includes both painting and architecture and investigates historical ways of defining and appreciating the visual in their own contemporary terms *Dealing with the Visual* will be of great use to advanced students because it offers an overview of current debates and to graduate students and professionals in the field because the essays offer in depth investigations of the methodological issues involved and various historical ways of defining visuality The topics included range from early modern ways of viewing pictures and sixteenth century views of Palladio's villas in their landscape settings to contemporary debate about whether there is life yet in painting

Cognition and the Book: Typologies of Formal Organisation of Knowledge in the Printed Book of the Early Modern Period, 2004-12-01 The printed book the most important invention of the early modern period brought about not only an explosion of knowledge but also major changes in the perception of texts This volume investigates the methods by which knowledge was presented to the early modern reader and the organisation of material that guided his cognition of them It focuses not merely on book historical questions but on the intersection of layout and paratexts with issues of genre content and intended function of texts A team of experts in various disciplines English French German Neo Latin philosophy art history the history of science and book history makes a first effort to understanding this fascinating topic Contributors include Maximilian Bergengruen Manuel Braun Kai Bremer Karl A E Enenkel Romy Gnathart Detlef Haberland Frans A Janssen Jörg Jungmayr Ursula Kocher Robert Luff Ann Moss Wolfgang Neuber Matthijs van Otegem Hilmar M Pabel Thomas Rahn Paul J Smith Dietmar Till Ian F Verstegen and Claus Zittel

The American Optic Mikko Tuhkanen, 2010-07-02 The American Optic charts new territory in the relationship of psychoanalysis to critical race studies Focusing on the work of Richard Wright and Jacques Lacan it explores the political and ethical implications of psychoanalysis for African American and other diasporic African cultural texts Mikko Tuhkanen develops a theory of racialization that recasts the genealogy of the Western concept of racial difference as outlined by critical race theory through the theory of the real which Lacan developed in his later work By engaging a wide array of resources including the work of W E B Du Bois Booker T Washington and Frantz Fanon as well as nineteenth century slave narratives and studies of blackface minstrelsy Tuhkanen not only illuminates the unexpectedly rich connections between Lacanian psychoanalysis and black literary and cultural studies but also demonstrates the ways in which the artistic and political traditions of the African diaspora allow us to reinvent the Lacanian ethics of becoming

Theories of Art Moshe Barasch, 2013-09-13 This book the first in Moshe Barasch's series on art theory offers a comprehensive analysis and reassessment of major trends in European art theory and its development from the time of Plato to the early eighteenth century Barasch expertly guides the reader from the interwoven attitudes and traditions of antiquity through the writings of St Thomas Aquinas and the aesthetic values of the Middle Ages to the branching out of several disciplines art history art criticism abstract aesthetics in the late Renaissance

Clearly outlining the development of art theory and exploring the central issues of each historical period Theories of Art is a valuable resource for the art historian as well as a stimulating introduction for the general reader **Art, Desire, and God** Kevin G. Grove, Christopher C. Rios, Taylor J. Nutter, 2023-08-24 Bringing together thinkers from philosophy of religion religious studies music art and film while drawing on a wealth of phenomenological resources and methods a team of renowned scholars provide new vantages on the question of how art is an expression of the human desire for God In three interrelated parts chapters employ phenomenological tools to propose new ways for speaking of the desire for God Scholars first draw upon music sculpture film and painting to develop ways of expressing diverse philosophical and religious aspects characteristic of aesthetic experience The discussion then opens up to examine the mystical and wounded aspects of embodied interface with God The final part investigates embodied aesthetic praxis in philosophy of religion and religious studies With several contributions engaging with the embodied aesthetic experience of underrepresented voices Art Desire and God offers constructive phenomenological bridges across divides of disciplines aesthetic experiences and embodied actions The Principles of Architectural Perspective George Alexander Thomas Middleton, 1919
