European Revolutions and the American Literary Renaissance Larry J. Reynolds, Professor of English and Thomas Franklin Mayon Professor of Liberal Arts Larry J Reynolds, W. Michael Reynolds, 1988-01-01 Political issues and events have always acted as a catalyst on thought and art In this pioneering study Larry J Reynolds argues that the European revolutions of 1848 49 quickened the American literary imagination and shaped the characters plots and themes of the American renaissance He traces the impact of the revolutions on Emerson Fuller Hawthorne Melville Whitman and Thoreau showing that the upheavals abroad both inspired and disturbed Extraordinarily well informed and creative treatment of the influences of the 1848 49 European revolutions on writers of the American Renaissance The book is especially effective in providing a historical context for reading major writings It demonstrates influences at work at a number of levels and presents historical narrative and subtle readings of literary texts with equal clarity Highly recommended Choice

The Mythology of Science R. J. Rushdoony, 2009-11-16 The mythology of science is its religious devotion to the myth of evolution In evolution man is the highest expression of intelligence and reason and such thinking will not yield itself to submission to a God it views as a human cultural creation useful if at all only in a cultural context Views of origins are dependent on faith and one s position speaks much as to one s religious tenets Evolutionary faith however cannot tolerate any view of the natural

world or science that places it under another faith such as the Christian belief in a sovereign causative God Darwin gave an ostensibly scientific justification for man's rebellion against God He put men at the top of the evolutionary ladder allowing them to believe they had realized Satan's lure to Adam and Eve and become as gods knowing determining good and evil Genesis 3:5 We can attack the science of evolution all we want but the battle for our faith true science and our culture is a religious one over the nature of truth Evolution is a religious faith that has become entrenched as a presupposition of modern thought For Christians to argue about the unproven nature of the evolutionary hypothesis or the circular reasoning of its thought is of some value but the essential issue is that two opposing religious faiths are in conflict Evolution is popular because it is such a useful paradigm to sinful men it dispenses with God as a prerequisite of all things But Christianity as a religious faith depends not on proofs that are constructions of man's fallen mind but on the reality of an almighty God who reveals Himself to us by grace Christianity too depends on circular reasoning we even begin and end with faith in God and His revelation The purpose of this book first published in 1967 is to define the nature of the opposing religious systems of thought Christian creationism and Darwinism in its various forms It is a call to urge Christians to stand firm for Biblical six day creationism as a fundamental aspect of their faith in the Creator Yearbook Grand Rapids (Mich.).
