Affectionate Authorities Philip Grace,2016-03-16 In one of his sermons the medieval preacher Bernardino of Siena listed seven fathers to whom one owed obedience God one s natural father godfather confessor benefactor a government

official and any elderly man This book seeks to answer the question of why medieval Europeans saw the need for so many fathers Why was fatherhood so appealing as a metaphor Situated at the intersection of social and cultural history the study draws upon a variety of late medieval and early modern sources including witness depositions personal letters and pedagogical treatises from the city of Basel Switzerland It focuses on how people from different walks of life invoked ideas about fatherhood in the pursuit of various goals not only the ideological agendas of scholarly elites but also the more pragmatic problems of closing a business deal claiming an inheritance or choosing sides in a fistfight before turning to what these ideas reveal about fatherhood on the ground The book argues that it was precisely fatherhood's basis in lived experience that gave it a familiar shape in the several roles that fathers played including provision affection disciplinary authority and education The most potent rhetorical aspect of fatherhood however was not as a static image or shape but rather the possibility of invoking connections between one role and another The most potent connection between roles was the idea that fathers were affectionate authorities combining power over subordinates with desire for their well being Tracing the connections and contradictions of these identities this study provides a nuanced view of concepts of fatherhood on the eve of the Reformation

The Early Modern Italian Domestic Interior, 1400-1700 Erin J. Campbell, Stephanie R. Miller, Elizabeth Carroll Consavari, 2016-03-23 Emphasizing on the one hand the reconstruction of the material culture of specific residences and on the other the way in which particular domestic objects reflect shape and mediate family values and relationships within the home this volume offers a distinct contribution to research on the early

modern Italian domestic interior Though the essays mainly take an art historical approach the book is interdisciplinary in that it considers the social implications of domestic objects for family members of different genders age and rank as well as for visitors to the home By adopting a broad chronological framework that encompasses both Renaissance and Baroque Italy and by expanding the regional scope beyond Florence and Venice to include domestic interiors from less studied centers such as Urbino Ferrara and Bologna this collection offers genuinely new perspectives on the home in early modern Italy
