within the pre modern Islamic world **Venice and the Islamic World, 828-1797** Institut du Monde Arabe (Paris),2007-01-01 From 828 when Venetian merchants carried home from Alexandria the stolen relics of St Mark to the fall of the Venetian Republic to Napoleon in 1797 the visual arts in Venice were dramatically influenced by Islamic art Because of its strategic location on the Mediterranean Venice had long imported objects from the Near East through channels of trade and it flourished during this particular period as a commercial political and diplomatic hub This monumental book examines Venice s rise as the bazaar of Europe and how and why the city absorbed artistic and cultural ideas that originated in the Islamic world Venice and the Islamic World 828 1797 features a wide range of fascinating images and objects including paintings and drawings by familiar Venetian artists such as Bellini Carpaccio and Tiepolo beautiful Persian and Ottoman miniatures and inlaid metalwork ceramics lacquer ware gilded and enameled glass textiles and carpets made in the Serene Republic and the Mamluk Ottoman and Safavid Empires Together these exquisite objects illuminate the ways Islamic art inspired Venetian artists while also highlighting Venice s own views toward its neighboring region Fascinating essays by distinguished scholars and conservators offer new historical and technical insights into this unique artistic relationship between East and West *Practising Diplomacy in the Mamluk Sultanate* Doris Behrens-Abouseif,2014-05-16 Elaborate and sensational gifts were the hallmark of Mamluk diplomacy From Cairo where they controlled the medieval spice trade and the holy sites of Christianity and Islam the Mamluk Sultans conscious of their humble slave origins augmented their claims to legitimacy through brilliant displays of diplomatic gift giving creating a celebrated reputation for the Sultanate from Europe to the Far East From spices ceremonial textiles and military objects to elephants and giraffes and even humans either living or as severed heads the offerings varied in combination and emphasis according to the status and circumstances of giver and receiver but always created a sensation Through an unparalleled study of primary sources and rigorous fieldwork this original book richly illustrated in colour explores the unpredictable and nuanced art of the regal gift in the Mamluk Sultanate from 1250 1517 Doris Behrens Abouseif not only provides the first study of this subject but makes an important contribution to the study of diplomacy economics visual arts and material culture in the medieval period *A History of Social Justice and Political Power in the Middle East* Linda T. Darling,2013-05-02 From ancient Mesopotamia into the 20th century the Circle of Justice as a concept has pervaded Middle Eastern political thought and underpinned the exercise of power in the Middle East The Circle of Justice depicts graphically how a government s justice toward the population generates political power military strength prosperity and good administration This book traces this set of relationships from its earliest appearance in the political writings of the Sumerians through four millennia of Middle Eastern culture It explores how people conceptualized and acted upon this powerful insight how they portrayed it in symbol painting and story and how they transmitted it from one regime to the next Moving towards the modern day the author shows how although the Circle of Justice was largely dropped from political discourse it did not disappear from people s political culture and expectations of

government The book demonstrates the Circle's relevance to the Iranian Revolution and the rise of Islamist movements all over the Middle East and suggests how the concept remains relevant in an age of capitalism A must read for students policymakers and ordinary citizens this book will be an important contribution to the areas of political history political theory Middle East studies and Orientalism

In Synchrony with the Heavens, Volume 2 Instruments of Mass Calculation David King, 2005-06-01 This is the first investigation of one of the main interests of astronomy in Islamic civilization namely timekeeping by the sun and stars and

the regulation of the astronomically defined times of Muslim prayer The study is based on over 500 medieval astronomical manuscripts first identified by the author now preserved in libraries all over the world and originally from the entire Islamic world from the Maghrib to Central Asia and the Yemen The materials presented provide new insights into the early development of the prayer ritual in Islam They also call into question the popular notion that religion could not inspire serious scientific activity Only one of the hundreds of astronomical tables discussed here was known in medieval Europe which is one reason why the entire corpus has remained unknown until the present A second volume also to be published by Brill deals with astronomical instruments for timekeeping and other computing devices

Encounters: Medieval Islamic History in 50 Objects Marcus Milwright, 2025-10-27 This book consists of fifty case studies and offers an innovative approach to the study of Medieval Islamic history concentrating on the analysis of physical objects from the seventh to the eighteenth centuries and across most of the regions that make up the pre Modern Islamic world These include a wide range of objects from portable items like coins vessels and books to major constructions including mosques tombs castles dams and canal systems The central argument is that the interdisciplinary study of physical objects provides invaluable perspectives that can deepen or challenge the evidence in the written record Object based study can also shed light on the lives of social groups who are seldom discussed in Islamic texts written before the modern period To demonstrate these points each case study focusses on a single object or small group of related objects The case studies combine close analysis of the material and visual characteristics with a discussion of the wider context in which such objects were commissioned made used adapted and exchanged The book is intended as an introduction to the historical study of Islamic objects employing perspectives from the fields of art history archaeology numismatics ethnography and epigraphy Written with a minimum of technical language and supported by a critical introduction an extensive glossary a timeline and guide for further reading the book is aimed at students and general readers who are interested in the political economic social cultural religious and intellectual histories of the Islamic world
