Wagenaar,2016-10-14 Why does a large proportion of the population engage in some form of gambling although they know they are most likely to lose and that the gambling industry makes huge profits Do gamblers simply accept their losses as fate or do they believe that they will be able to overcome the negative odds in some miraculous way The paradox is complicated by the fact that those habitual gamblers who are most aware that systematic losses cannot be avoided are the least likely to stop gambling Detailed analyses of actual gambling behaviour have shown gamblers to be victims of a variety of cognitive illusions which lead them to believe that the general statistical rules of determining the probability of loss do not apply to them as individuals The designers of gambling games cleverly exploit these illusions in order to promote a false perception of the situation Much of the earlier interest in gambling behaviour has been centred on the traditional theories of human decision making where decisions are portrayed as choices among bets This led to a tradition of studying decision making in experiments on betting In this title originally published in 1988 the author argues that betting behaviour should not be used as a typical example of human decision making upon which a general psychological theory could be founded and that these traditional views can in no way account for the gambling behaviour reported in this book Riichi Mahjong: The Ultimate Guide to the Japanese Game Taking the World By Storm Scott D. Real Conditionals William G. Lycan, 2001-07-12 Philosophers and logicians have long debated how best to understand conditional or hypothetical sentences William G Lycan has a distinctive approach to this debate attending not just to the semantics of such sentences but equally to their syntax He shows how insights from linguistic theory help to illuminate problems about the meaning and function of conditionals For instance philosophers and logicians have had problems analysing the locutions only if unless and even if Lycan sets out a general semantic theory of conditionals which works for all such sentences he assigns meanings to them in a way that explains how and why those meanings depend upon features of utterance context According to Lycan's theory the if clauses refer to items called events circumstances or conditions Real Conditionals gives at last the definitive presentation of this original approach to a topic at the intersection of philosophy logic and linguistics Lycan's characteristically lively and witty expository style ensures that it can be enjoyed by readers from all three disciplines
