In ISSs, computer vision, pattern recognition, and artificial intelligence technologies are used to identify abnormal behaviours in videos. They present the development of real-time behaviour-based intelligent surveillance systems. The book focuses on the detection of individual abnormal behaviour based on learning and the analysis of dangerous crowd behaviour based on texture and optical flow. Practical systems include a real-time face classification and counting system, a surveillance robot system that utilizes video and audio information for intelligent interaction, and a robust person counting system for crowded environments.

The Lost Legions Alistair Paterson, 2008-01-17. The Lost Legions explores the cultural interactions between Indigenous peoples and European settlers. Paterson draws especially on archaeological evidence from central Australia where European pastoralists found themselves in the heart of the territory of the Aborigine Arabana people. Paterson also considers other sources of information such as oral histories, onomastics, and evidence of culture contact in the Americas and South Africa to develop a broad understanding of what happens when such different civilizations encounter one another.

Rediscovering Lost Landscapes Pietro Piana, Charles Watkins, Ross Balzaretti, 2021. Analysis of hundreds of art works from the period provides insights into forgotten landscapes and hidden geographies. After the Napoleonic wars, many wealthy British women and men settled along the coast in Liguria and travelled in Piedmont and Valle d'Aosta in search of warmth and health. They established English-speaking colonies of retired clerics, colonial officials, aristocrats, and industrialists at places such as Alassio, Bordighera, Sanremo, and Portofino. Many were keen artists. This book assesses hundreds of topographical drawings, paintings, and photographs of north-west Italy produced by these British visitors and residents in the nineteenth and early twentieth century. Through the identification and analysis of these works scattered today in private and public collections in Italy and Britain, it provides insights into the way Italian landscapes were understood and appreciated. Considered in conjunction with historical photography, maps, archives, and fieldwork, they deepen our knowledge of past land management traditions and recover how the contemporary landscape looked. The artists are placed in their intellectual and geographical contexts, and interconnections between British and Italian artists and between topographical art and photography are explored. Different chapters assess the main subjects depicted, including mountains, seascapes, rivers, agriculture, trees, and woodland, castles, churches, villages, industries, and landscapes of luxury.
