Lost Subjects Found Objects:

The Life and Death of Objects Lars Lerup, 2022-04-04 Lars Lerup's conceptual explorations as a designer and thinker have been inspired by philosophers and artists from Foucault to Beckett. Lerup's furniture designs elude consumer culture. They conform neither to what is commonly understood as useful nor to what is typically regarded as necessary. They question the assumed functions of furniture and at the same time their assigned place in space. His pieces interrogate their roles and positions and introduce a disturbing or at least disconcerting note to conventional floor plans. This autobiography of a design project is about rendering visible the consumerism that is driving the current economically motivated expansion of our cities and dealing with the consequences for the environment and society.

Found Objects in Art Therapy Daniel Wong, Ronald Lay, 2021-02-18 This book shows how art therapists can use found objects in their work with clients. Found objects can be a highly affordable, imaginative and creative way of working and are particularly effective when working with marginalised populations and clients who have experienced trauma. This edited collection contains chapters from a wide variety of contributors from around the world and covers a vast array of topics including the use of found objects in clinical settings, community and art practice, pedagogy and self-care. This is the ideal resource for any art therapist wishing to explore the use of this non-traditional medium to enrich their practice.

Enjoying What We Don't Have Todd McGowan, 2020-03-01 Although there have been many attempts to apply the ideas of psychoanalysis to political thought, this book is the first to identify the political project inherent in the fundamental tenets of psychoanalysis. And this political project, Todd McGowan contends, provides an avenue for emancipatory politics after the failure of Marxism in the twentieth century. Where others seeking the political import of psychoanalysis have looked to Freud's early work on sexuality, McGowan focuses on Freud's discovery of the death drive and Jacques Lacan's elaboration of this concept. He argues that the self-destruction occurring as a result of the death drive is the foundational act of emancipation around which we should construct our political philosophy. Psychoanalysis offers the possibility for thinking about emancipation not as an act of overcoming loss but as the embrace of loss. It is only through the embrace of loss, McGowan suggests, that we find the path to enjoyment and enjoyment is the determinative factor in all political struggles and only in a political project that embraces the centrality of loss will we find a viable alternative to global capitalism.

Lost Bodies Laura E. Tanner, 2018-07-05 If the dying body makes us flinch and look away, struggling not to see what we have seen, the lost body disappears from cultural view, buried along with the sensory traces of its corporeal presence from the Introduction. American popular culture conducts a passionate love affair with the healthy, fit, preferably beautiful body, and in recent years theories of embodiment have assumed importance in various scholarly disciplines. But what of the dying or dead

body Why do we avert our gaze speak of it only as absence This thoughtful and beautifully written book illustrated with photographs by Shellburne Thurber and other remarkable images finds a place for the dying and lost body in the material intellectual and imaginary spaces of contemporary American culture Laura E Tanner focuses her keen attention on photographs of AIDS patients and abandoned living spaces newspaper accounts of September 11 literary works by Don DeLillo Donald Hall Sharon Olds Marilynne Robinson and others and material objects including the AIDS Quilt She analyzes the way in which these representations of the body reflect current cultural assumptions revealing how Americans read imagine and view the dynamics of illness and loss The disavowal of bodily dimensions of death and grief she asserts deepens rather than mitigates the isolation of the dying and the bereaved *Lost Bodies* will speak to anyone imperiled by the threat of loss

Sound Effects: The Object Voice in Fiction, 2015-09-01 Sound Effects combines literary criticism and psychoanalytic theory in eleven original articles which explore the potential of the object voice as an analytic tool to approach fiction Alongside the gaze the voice is Jacques Lacan's original addition to the set of partial objects of classical psychoanalysis and has only recently been theorised by Mladen Dolar in *A Voice and Nothing More* 2006 With notable exceptions like Garrett Stewart's *Reading Voices* 1990 the sonorous element in fiction has received little scholarly attention in comparison with poetry and drama Sound Effects is a contribution to the burgeoning field of sound studies and sets out to fill this gap through selective readings of English and American fiction of the last two hundred years Contributors Fred Botting Natalja Chestopalova Mladen Dolar Matt Foley Alex Hope Phillip Mahoney Sylvia Mieszkowski Jorge Sacido Romero Marcin Stawiarski Garrett Stewart Peter Weise and Bruce Wyse

A Troublesome Subject Jonathan Fineberg, 2013-03-01 The first major book to consider the life and work of Robert Arneson *A Troublesome Subject* tells the fascinating story of how a high school art teacher transformed himself into an artist of international stature and ambition Representing the full scope of Arneson's career in a rich survey of color reproductions this book is at once a study of the trajectory of contemporary culture the work of Robert Arneson and the relationship between the two It shows how Arneson's work articulated the crisis of narcissism that has defined American culture since 1970 Jonathan Fineberg develops his ongoing work toward a psychosocial history of art as he proceeds through Arneson's career chronicling his early life the formation of a personal style and finding a unique subject matter in his famous post 1970 turn to self portraiture

Law, Psychoanalysis, Society Maria Aristodemou, 2014-06-27 I swear to tell the truth the whole truth and nothing but the truth we say in a court of law In a court of law the truth is precisely what we will not say says Lacan If God is dead everything is permitted writes Dostoyevsky If God is dead everything is prohibited responds Lacan I think therefore I am reasons Descartes I am where I do not think concludes Lacan What are we to make of Lacan's inversions of these mottos And what are the implications for the legal system if we take them seriously This book puts the legal subject on the couch and explores the incestuous relationship between law and desire enjoyment and transgression freedom and subjection ethics and atheism The process of analysis problematizes

fundamental tenets of the legal system leading the patient to rethink long held beliefs terms like guilt and innocence truth and lies reason and reality freedom and responsibility cause and punishment acquire new and surprising meanings By the end of these sessions the patient is left wondering along with Freud her analyst whether it is not psychology that deserves the mockery but the procedure of judicial enquiry A unique study on the nexus of Law and Psychoanalysis this book will interest students and scholars of both subjects as well as general readers looking to explore this perverse and fascinating relationship Lacanian Psychoanalysis Gertrudis Van De Vijver, Jos Antonius Maria De Kroon, Rémy Potier, 2020-04-01

The Lacanian Subject Bruce Fink, 2025-05-13 A lucid guide through the labyrinth of Lacanian theory This book provides an illuminating account of the theory of subjectivity found in the work of Jacques Lacan Guiding readers through many facets of Lacanian theory Bruce Fink unpacks such central notions as the Other object a the unconscious as structured like a language alienation and separation the paternal metaphor jouissance and sexual difference He demonstrates that against the tide of post structuralist thinkers who proclaim the death of the subject Lacan explores what it means to come into being as a subject in its ethical and ontological dimensions Presenting Lacan's thought in the context of his clinical preoccupations The Lacanian Subject offers one of the most balanced sophisticated and penetrating views of Lacanian psychoanalysis available

How Children Learn Language William O'Grady, 2005-01-06 Adults tend to take language for granted until they have to learn a new one Then they realize how difficult it is to get the pronunciation right to acquire the meaning of thousands of new words and to learn how those words are put together to form sentences Children however have mastered language before they can tie their shoes In this engaging and accessible book William O Grady explains how this happens discussing how children learn to produce and distinguish among sounds their acquisition of words and meanings and their mastery of the rules for building sentences *How Children Learn Language* provides readers with a highly readable overview not only of the language acquisition process itself but also of the ingenious experiments and techniques that researchers use to investigate this mysterious phenomenon It will be of great interest to anyone parent or student wishing to find out how children acquire language *Body and Representation* Sigrid Schade, Insa Härtel, 2013-04-17 The Body and Representation The Centre for Feminist Studies Meets the ifu The present work is the result of the cooperation between the Centre for Feminist Studies ZFS at the University of Bremen and the International Women's University Hanover 2000 ifu For the project area Body deans Prof Patricia McFadden and Prof Barbara Duden in which roughly one hundred fifty participants from all over the world took part the Centre for Feminist Studies developed and organized a two week study phase The Body and Representation Feminist Research and Theoretical Perspectives which was carried out on the campus of the University of Bremen from 30 July to 11 August 2000 concept and chair Prof Sigrid Schade collaboration I coordination Dr Insa Hartel It formed the third and fourth weeks of a program that lasted thirteen weeks in all This publication is neither a documentation of this study phase nor an ideal concept for such a curriculum Neither of these possible variants for such a publication was

feasible and neither would have made much sense for a number of reasons *Subjectivity and Otherness* Lorenzo Chiesa, 2007-09-28 The evolution of the concept of subjectivity in the works of Jacques Lacan Countering the call by some pro Lacanians for an end to the exegesis of Lacan's work and the dismissal by anti Lacanians of Lacan as impossibly impenetrable Subjectivity and Otherness argues for Lacan as a paradoxically systematic thinker and for the necessity of a close analysis of his texts Lorenzo Chiesa examines from a philosophical perspective the evolution of the concept of subjectivity in Lacan's work carrying out a detailed reading of the Lacanian subject in its necessary relation to otherness according to Lacan's orders of the Imaginary the Symbolic and the Real Chiesa emphasizes the continuity underlying apparently incompatible phases of Lacan's examination of the subject describing Lacan's theory as a consistent philosophical system but one that is constantly revised and therefore problematic Chiesa analyzes each old theory of the subject within the framework of a new elaboration and reassesses its fundamental tenets from the perspective of a general psychoanalytic discourse that becomes increasingly complex From the 1960s on writes Chiesa the Lacanian subject amounts to an irreducible lack that must be actively confronted and assumed this subjectivized lack Chiesa argues further offers an escape from the contemporary impasse between the death of the subject alleged by postmodernism and a return to a traditional substantialist notion of the subject An original treatment of psychoanalytic issues Subjectivity and Otherness fills a significant gap in the existing literature on Lacan taking seriously the need for a philosophical investigation of Lacanian concepts **Universal Grammar and American Sign Language** D.C. Lillo-Martin, 1991-09-30 AMERICAN SIGN LANGUAGE American Sign Language ASL is the visual gestural language used by most of the deaf community in the United States and parts of Canada On the surface this language as all signed languages seems radically different from the spoken languages which have been used to formulate theories of linguistic principles and parameters However the position taken in this book is that when the surface effects of modality are stripped away ASL will be seen to follow many of the patterns proposed as universals for human language If these theoretical constructs are meant to hold for language in general then they should hold for natural human language in any modality and if ASL is such a natural human language then it too must be accounted for by any adequate theory of Universal Grammar For this reason the study of ASL can be vital for proposed theories of Universal Grammar Recent work in several theoretical frameworks of syntax as well as phonology have argued that indeed ASL is such a language I will assume then that principles of Universal Grammar and principles that derive from it are applicable to ASL and in fact that ASL can serve as one of the languages which test Universal Grammar There is an important distinction to be drawn however between what is called here American Sign Language and other forms of manual communication **Embodied Performances** B. Allegranti, 2011-06-21 With a companion website that includes short online film episodes this book proposes expansive ways of deconstructing and reconstituting sexuality and gender and thus more embodied and ethical ways of doing life and offers an understanding and critique of embodiment through an integration of

performance psychotherapy and feminist philosophy **The Octopus Museum** Brenda Shaughnessy, 2021-06-29 Now in paperback this collection of bold and scathingly beautiful feminist poems imagines what comes after our current age of environmental destruction racism sexism and divisive politics Informed as much by Brenda Shaughnessy's worst fears as a mother as they are by her superb craft as a poet the poems in *The Octopus Museum* blaze forth from her pen in these pages we see that what was once a generalized fear for our children is now hyper reasonable specific and multiple school shootings nuclear attack loss of health care a polluted planet As Shaughnessy conjures our potential future she movingly and often with humor envisions an age where cephalopods might rule over humankind a fate she suggests we may just deserve after destroying their oceans These heartbreaking terrified poems are the battle cry of a woman who is fighting for the survival of the world she loves and a stirring exhibition of who we are as a civilization **Cultural Property in Cross-Border**

Litigation Mara Wantuch-Thole, 2015-03-10 This thesis comparatively investigates into the cross border enforcement of claims to misappropriated cultural objects initiated by states It identifies and categorises sovereign rights in cultural property and discusses the legal mechanisms to successfully implement these rights in foreign courts The results may be used by government officials museum officials lawyers art historians archaeologists art dealers academics Language

Acquisition By Eye Charlene Chamberlain, Jill P. Morford, Rachel I. Mayberry, 1999-08-01 This book focuses on the early acquisition of signed languages and the later development of reading by children who use signed languages It represents the first collection of research papers focused solely on the acquisition of various signed languages by very young children all of whom are acquiring signed languages natively from deaf parents It is also the first collection to investigate the possible relationships between the acquisition of signed language and reading development in school aged children The underlying questions addressed by the chapters are how visual gestural languages develop and whether and how visual languages can serve the foundation for learning a second visual representation of language namely reading *Language Acquisition by Eye* is divided into two parts anchored in the toddler phase and the school pupil phase The central focus of Part I is on the earliest stages of signed language acquisition The chapters in this part address important questions as to what babytalk looks like in signed language and the effect it has on babies attention what early babbling looks like in signed language what babies earliest signs look like how parents talk to their babies in signed language to ensure that their babies see what's being said and what the earliest sentences in signed languages tell us about the acquisition of grammar With contrasting research paradigms these chapters all show the degree to which parents and babies are highly sensitive to one another's communicative interactions in subtle and complex ways Such observations cannot be made for spoken language acquisition because speech does not require that the parent and child look at each other during communication whereas signed language does Part II focuses on the relationship between signed language acquisition and reading development in children who are deaf All of these chapters report original research that investigates and uncovers a positive relationship between the

acquisition and knowledge of signed language and the development of reading skills and as a result represents a historical first in reading research This section discusses how current theory applies to the case of deaf children s reading and presents new data that illuminates reading theory Using a variety of research paradigms each chapter finds a positive rather than a negative correlation between signed language knowledge and usage and the development of reading skill These chapters are sure to provide the foundation for new directions in reading research
