Magic And Rationality In Ancient Near Eastern And Graecoroman Medicine Studies In Ancient Medicine:

Magic and Rationality in Ancient Near Eastern and Graeco-Roman Medicine Manfred Horstmanshoff, Marten Stol, 2018-07-17 For the first time medical systems of the Ancient Near East and the Greek and Roman world are studied side by side and compared Early medicine in Babylonia Egypt the Minoan and Mycenaean world later medicine in Hippocrates Galen Aelius Aristides Vindicianus the Talmud The focus is the degree of rationality or irrationality in the various ways of medical thought and treatment Fifteen specialists contributed thoughtful and well documented chapters on important issues

Perplexing Remedies in Ancient Medicine Maddalena Rumor, 2024-11-18 The topic of a potential relationship between Babylonian and Greco Roman medicine has been discussed for a long time yet it is notoriously difficult to give it flesh and bones by means of concrete examples The main goal of this study is to identify real elements in the therapeutical traditions of the one system that can be connected to those of the other which would confirm a certain degree of practical knowledge sharing between the two cultures By analyzing Dreckapotheke filthy medicaments and similarly perplexing medical ingredients and by exploiting the concept of misunderstandings in translation I show how elements of Assyro Babylonian therapy were still present or emerging in the pharmaceutical compositions of the Early Roman Empire ultimately supporting the idea of at least occasional transfers of medical knowledge between the two cultures With its positive findings this study contributes to a broader reconstruction of the context within which ancient medicine developed It also finds reciprocal explanations of obscure passages and fuels further questions regarding the medical interrelations interconnections between these neighboring ancient cultures *Translating Writings of Early Scholars in the Ancient Near East, Egypt, Greece and Rome* Annette Imhausen, Tanja Pommerening, 2016-11-21 Ancient cultures have left written evidence of a variety of scientific texts But how can should they be translated Is it possible to use modern concepts and terminology in their translation and which consequences result from this practice Scholars of various disciplines discuss the practice of translating ancient scientific texts and present examples of these texts and their translations Writings of Early Scholars in the Ancient Near East, Egypt, Rome, and Greece Annette Imhausen, Tanja Pommerening, 2010-11-19 Medicine astronomy dealing with numbers even the cultures of the pre modern world offer a rich spectrum of scientific texts But how are they best translated Is it sufficient to translate the sources into modern scientific language and thereby above all to identify their deficits Or would it be better to adopt the perspective of the sources themselves strange as they are only for them not to be properly understood by modern readers Renowned representatives of various disciplines and traditions present a controversial and constructive discussion of these problems *Tobit* Beate Ego, 2025-07-16 This commentary sets the ancient Jewish story of Tobit within a broad tradition historical context analyzing the conceptions of angels and demons it contains as well as its notions of ancient medicine together with its understanding of the Torah Presented along with this is a synchronically oriented interpretation of the whole text which shows that the narrative should ultimately be understood in

terms of historical theology It reveals how in the days of Hellenistic rule ancient Judaism was able to cope with the threat from the aggressive politics of the empires Within this context the elderly Tobit's hymn of praise at the end of the narrative in Tob 13 opens a vista of hope for its addressees **Women's Divination in Biblical Literature** Esther J.

Recognizing Miracles in Antiquity and Beyond Maria Gerolemou,2018-04-23 In recent years scholars have extensively explored the function of the miraculous and wondrous in ancient narratives mostly pondering on how ancient authors view wondrous accounts i e the treatment of the descriptions of wondrous occurrences as true events or their use More precisely these narratives investigate whether the wondrous pursues a display of erudition or merely provides stylistic variety sometimes such narratives even represent the wish of the author to grant a rational explanation to extraordinary actions At present however two aspects of the topic have not been fully examined a the ability of the wondrous miraculous to set cognitive mechanisms in motion and b the power of the wondrous miraculous to contribute to the construction of an authorial identity that of kings gods or narrators To this extent the volume approaches miracles and wonders as counter intuitive phenomena beyond cognitive grasp which challenge the authenticity of human experience and knowledge and push forward the frontiers of intellectual and aesthetic experience Some of the articles of the volume examine miracles on the basis of bewilderment that could lead to new factual knowledge the supernatural is here registered as something natural although strange the rest of the articles treat miracles as an endpoint where human knowledge stops and the unknown divine begins here the supernatural is confirmed Thence questions like whether the experience of a miracle or wonder as a counter intuitive phenomenon could be part of long term memory i e if miracles could be transformed into solid knowledge and what mental functions are encompassed in this process are central in the discussion

Systems of Classification in Premodern Medical Cultures Ulrike Steinert,2020-07-21 Systems of Classification in Premodern Medical Cultures puts historical disease concepts in cross cultural perspective investigating perceptions constructions and experiences of health

and illness from antiquity to the seventeenth century Focusing on the systematisation and classification of illness in its multiple forms manifestations and causes this volume examines case studies ranging from popular concepts of illness through to specialist discourses on it Using philological historical and anthropological approaches the contributions cover perspectives across time from East Asian Middle Eastern and Mediterranean cultures spanning ancient Egypt Mesopotamia Greece and Rome to Tibet and China They aim to capture the multiplicity of disease concepts and medical traditions within specific societies and to investigate the historical dynamics of stability and change linked to such concepts Providing useful material for comparative research the volume is a key resource for researchers studying the cultural conceptualisation of illness including anthropologists historians and classicists among others *Anglo-Saxon Prognostics, 900-1100* Sándor Chardonnens, 2007-06-30 Recent scholarship on the Anglo Saxon prognostics has tried to place these texts within the realm of folklore and medicine inspired largely by studies and editions from the nineteenth and early twentieth centuries By analysing prognostic material in its manuscript context this book offers a novel approach to the status and purpose of prognostic texts in the early Middle Ages with particular attention to the Anglo Saxon tradition From this perspective it emerges that prognostication in Anglo Saxon England was not folkloric but a scholarly pursuit by monks not primarily interested in the medical aspects of prognostication In addition this book offers for the first time a comprehensive edition of prognostics in Old English and Latin from Anglo Saxon and early post Conquest manuscripts Brill s Texts and Sources in Intellectual History vol 3 *Anglo-Saxon Prognostics, 900-1100* László Sándor Chardonnens, 2007 This book offers an analysis of the status and function of the Anglo Saxon prognostics in their manuscript context a study of their introduction to and transmission in Anglo Saxon England and for the first time a comprehensive edition of prognostics in Old English and Latin
