Magic for Non-Magicians Shari Lewis,1977-04-01 **Magic for Non-Magicians** Shari Lewis,Abraham B. Hurwitz,1977-04-01 Describes the illusion preparation and secret of over sixty easy magic tricks *Magic in Theory* Peter Lamont,Professor Richard Richard Wiseman,2005-10-28 A useful manual for any magician or curious spectator who wonders why the tricks seem so real this guide examines the psychological aspects of a magician s work Exploring the ways in which human psychology plays into the methods of conjuring rather than focusing on the individual tricks alone this explanation of the general principles of magic includes chapters on the use of misdirection sleight of hand and reconstruction provides a better understanding of this ancient art and offers a section on psychics that warns of their deceptive magic skills *A Worldbuilder's Guide to Magic* Brent A. Stypczynski,2021-10-12 Constructing a functional system of magic that helps readers suspend disbelief is a crucial part of worldbuilding in the fantasy genres Yet creating a believable compelling and original fictional universe can be daunting To help inspire writers this guide provides an overview of how magic has been understood in history and used in myth legend and modern fiction Different forms of magic are explored and a broad range of stories from Nordic myths to modern novels are described and referenced Discussion explores how magic as a concept shapes and is shaped by fictional worlds and societies *A Worldbuilder's Guide to Societies* Brent A. Stypczynski,2023-09-29 In fantastic worlds like Gondor Westeros Ankh Morpork Waterdeep and Hogsmeade the societies that inhabit them play important roles in capturing the feel of their settings Societies create characters and plots provide space for action and reflect history Building vibrant and interesting societies is a core element of worldbuilding in the fantasy genres This guide walks the reader through different aspects of societies to help construct fictional worlds with greater ease Examples of societies built by numerous authors in the fantasy urban modern fantasy and paranormal romance genres are interwoven to illustrate concepts Throughout this book is descriptive and suggestive rather than prescriptive and is intended to inform as well as inspire the worldbuilder **The Psychology of Magic and the Magic of Psychology** Amir Raz,Jay A. Olson,Gustav Kuhn,2016-11-18 Magicians have dazzled audiences for many centuries however few researchers have studied how let alone why most tricks work The psychology of magic is a nascent field of research that examines the underlying mechanisms that conjurers use to achieve enchanting phenomena including sensory illusions misdirection of attention and the appearance of mind control and nuanced persuasion Most studies to date have focused on either the psychological principles involved in watching and performing magic or neuromagic the neural correlates of such phenomena Whereas performers sometimes question the contributions that modern science may offer to the advancement of the magical arts the history of magic reveals that scientific discovery often charts new territories for magicians In this research topic we sketch out the symbiotic relationship between psychological science and the art of magic On the one hand magic can inform psychology with particular benefits for the cognitive social developmental and transcultural components of behavioural science Magicians

have a large and robust set of effects that most researchers rarely exploit Incorporating these effects into existing experimental even clinical paradigms paves the road to innovative trajectories in the study of human behaviour For example magic provides an elegant way to study the behaviour of participants who may believe they had made choices that they actually did not make Moreover magic fosters a more ecological approach to experimentation whereby scientists can probe participants in more natural environments compared to the traditional lab based settings Examining how magicians consistently influence spectators for example can elucidate important aspects in the study of persuasion trust decision making and even processes spanning authorship and agency Magic thus offers a largely underused armamentarium for the behavioural scientist and clinician On the other hand psychological science can advance the art of magic The psychology of deception a relatively understudied field explores the intentional creation of false beliefs and how people often go wrong Understanding how to methodically exploit the tenuous twilight zone of human vulnerabilities perceptual logical emotional and temporal becomes all the more revealing when top down influences including expectation symbolic thinking and framing join the fray Over the years science has permitted magicians to concoct increasingly effective routines and to elicit heightened feelings of wonder from audiences Furthermore on occasion science leads to the creation of novel effects or the refinement of existing ones based on systematic methods For example by simulating a specific card routine using a series of computer stimuli researchers have decomposed the effect and reconstructed it into a more effective routine Other magic effects depend on meaningful psychological knowledge such as which type of information is difficult to retain or what changes capture attention Behavioural scientists measure and study these factors By combining analytical findings with performer intuitions psychological science begets effective magic Whereas science strives on parsimony and independent replication of results magic thrives on reproducing the same effect with multiple methods to obscure parsimony and minimise detection This Research Topic explores the seemingly orthogonal approaches of scientists and magicians by highlighting the crosstalk as well as rapprochement between psychological science and the art of deception

Performing Deception

Brian Rappert,2022-05-27 In Performing Deception Brian Rappert reconstructs the practice of entertainment magic by analysing it through the lens of perception deception and learning as he goes about studying conjuring himself Through this novel meditation on reasoning and skill Rappert elevates magic from the undertaking of mere trickery to an art that offers the basis for rethinking our possibilities for acting in the modern world Performing Deception covers a wide range of theories in sociology philosophy psychology and elsewhere in order to offer a striking assessment of the way secrecy and deception are woven into social interactions as well as the illusionary and paradoxical status of expertise

Do You Believe In Magic? (A Wild Thing Book) Laura Krantz,2024-10-08 Inspired by her popular Wild Thing podcast journalist Laura Krantz incorporates the scientific method and her journalistic skills to determine if magic might be real in Do You Believe in Magic Magic spells and curses hexes and potions superstition and rituals We ve all heard stories of alchemists attempting to turn abundant lead into precious rare gold Or of poor unfortunate souls asking potion masters to brew up unappetizing concoctions that will help them find love And of course we re familiar with curses muttering magical words for the purposes of exacting revenge on an enemy or protecting a hidden treasure Who wouldn t like the idea of special powers or control over the natural world It seems pretty fun even if it s just the stuff of fantasy books and movies But a lot of what we call magic has grounding in real practices In fact magic is at the root of many scientific fields from chemistry to botany to astronomy and has been an important part of human culture for thousands of years Do You Believe in Magic takes readers through a world where magic and science collide What do they have in common Where do they differ What role has magic played in our history and the history of science Why is magic still significant even when it doesn t seem to line up with reality And is it possible to be scientifically minded and still believe in magic Readers are encouraged to weigh the facts and go beyond their gut assumptions to stretch their imaginations and think about why magic and science might be two sides of the same coin Includes color illustrations an at home science magic experiment glossary bibliography and index A Wild Thing series The Search for Sasquatch Is There Anybody Out There Do You Believe in Magic
