Royal Education Peter Gordon, Denis Lawton, 2003 Many people assume that kings and queens have generally received a good education perhaps the best that money could buy at the time This book investigates the reality what is known about the education of British sovereigns from the beginning of the Tudor period to the end of the 20th century There have been enormous differences in the seriousness with which education was regarded at different points in history For example Henry VIII and his children were educated at a high point in the Renaissance when educational ideas were regarded as important as well as

exciting Queen Elizabeth I was by any standards extremely well educated by contrast Queen Elizabeth II's education has been described as undemanding because her parents wanted her to have a happy childhood Peter Gordon and Denis Lawton have traced changes in royal education through the centuries and related them not only to educational ideas and theories but also to changing political social and religious contexts The monarchy itself has changed as an institution from the semi absolute authority of the Tudors to a much more limited kind of monarchy by the end of the Stuart period after one king had been executed and another exiled to the constitutional monarchy of the 20th century To what extent have such changes made any difference to royal education What is the most appropriate kind of education for future kings and queens in our present day democracy In this book the authors confront these and other such questions and explore some of the answers *The Mysteries of Astrology, and the Wonders of Magic* Charles W. relationship with television this book shows how she was ahead of the game in helping to change the face of British television from the outset of her reign in 1953 when she let the cameras into Westminster Abbey The Queen embraced television at a time when Winston Churchill and her government advisors recommended that she should keep them out on the grounds that the cameras would destroy her royal mystique right through the 1950s which was Britain's television decade for reasons that are not generally understood today when Britain became the first nation in the world to have public service television In 1969 the Queen opened the doors to the cameras once again for the invention of Britain's first family reality TV fly on the wall programme showing how she and her husband the Duke of Edinburgh and their children Charles and Anne went about their daily lives thereby giving the seal of royal approval to reality TV ahead of the first programmes in the United States and the UK that followed in her wake Queen Elizabeth II can accurately be described as a television queen the first monarch to understand and embrace television and in particular reality TV which is why she was light years ahead of other royals and her government ministers Television was for her a right of passage and not until she ran into bad and stormy weather with Princess Diana in the 1980s and 1990s did she have any image problems with television These problems no longer remain today evidently as once again the television arrangements are in full swing for her Diamond Jubilee celebrations this June Queen Elizabeth II remains the most televised and visualised person in the world
