Census Office,1923 *Gender, Work and Wages in Industrial Revolution Britain* Joyce Burnette,2008-04-17 A major study of the role of women in the labour market of Industrial Revolution Britain It is well known that men and women usually worked in different occupations and that women earned lower wages than men These differences are usually attributed to custom but Joyce Burnette here demonstrates instead that gender differences in occupations and wages were instead largely driven by market forces Her findings reveal that rather than harming women

competition actually helped them by eroding the power that male workers needed to restrict female employment and minimising the gender wage gap by sorting women into the least strength intensive occupations Where the strength requirements of an occupation made women less productive than men occupational segregation maximised both economic efficiency and female incomes She shows that women s wages were then market wages rather than customary and the gender wage gap resulted from actual differences in productivity *The Rough Guide to England* ,2004-03 This is a comprehensive and up to the minute handbook to England It includes recommendations of the best places to stay eat and drink in all budget ranges and in all regions It also includes accounts of every type of attraction Comprising the Southern Counties, Kent to Cornwall Frederic W.
