the multiple meanings of comida food from something as simple as a meal to something as complex as one's identity. She listens intently to the voices of New York City residents with Cuban, Dominican, or Puerto Rican backgrounds as well as to those of the nutritionists and health professionals who serve them. She argues with sensitivity that the migrants' health depends not only on food culture but also on important structural factors that underlie their access to food, employment, and high quality healthcare. People in Hispanic Caribbean communities in the United States present high rates of obesity, diabetes, and other diet-related diseases, conditions painfully highlighted during the COVID-19 pandemic. Both eaters and dietitians may blame these diseases on the shedding of traditional diets in favor of highly processed foods. Or conversely, they may blame these on the traditional diets of fatty meat, starchy root vegetables, and rice. Applying a much needed intersectional approach, Fuster shows that nutritionists and eaters often misrepresent and even racialize or pathologize a cuisine's healthfulness or unhealthfulness if they overlook the kinds of economic and racial inequities that exist within the global migration experience.

Food Quality and Consumer Value Monika J.A. Schröder, 2013-03-09. Consumer markets for foods and beverages in developed countries are well supplied and highly fragmented. Yet the question being asked is how close retailers actually come to fulfilling their customers' requirements. The concept of consumer value is one of the main pillars underpinning the theory of market differentiation. This book takes an interdisciplinary approach to the analysis of satisfaction in relation to the consumption of food, with both food science and consumer science playing central parts. It approaches food quality from both the technical and the consumer satisfaction perspectives and assesses the roles of management and regulatory tools in
