Mullen,2023-06-20 A remarkable story of work worry art faith community life and hope An instant classic Heather Cox Richardson author of the New York Times bestseller Democracy Awakening A heartfelt and moving story Just as important it s also a well timed lesson in civics Richard Russo author of Empire Falls Two unforgettable women from opposite poles of power in Maine forge an uplifting bond through good old fashioned letter writing that helps them navigate the COVID crisis Both women bring civility grace wit and wisdom to the challenge of protecting those who depend on them in other words leadership This trip to the Vacationland of Maine where the state motto is I Lead offers an inspiring tale of civility and purpose of doing the right thing and not just surviving but prevailing The first woman to serve as governor of Maine Janet Mills had been in office a year when COVID 19 reached the United States The recently widowed 72 year old wrote in her journal there is no playbook for a pandemic as she imposed unprecedented restrictions on her state When early support for the governor s response curdled to rampant opposition a young mother named Ashirah Knapp sent a letter of support from a remote homestead in the woods of

Maine Ashirah's handwritten dispatch detailed how the public health emergency was upending her family's life and livelihood and she promised to keep writing every week until we are through this time to remind the governor how many Mainers supported her despite the disruption. Ashirah's letters with their simple wisdom and striking penmanship stood out in a flood of correspondence Governor Mills was receiving that ranged in tone from appreciative to furious. They helped keep her grounded as she made wrenching often unpopular choices. Shannon A Mullen weaves from these two women's letters and the governor's journal which were never intended for publication an intimate and compelling true story that is a celebration of civility and compassion in the face of rancor and of resolve in the face of adversity E-government 2003 Mark A.

web dissipation in a linear oscillator is commonly described by the relaxation time or equivalently the dissipation rate or by either of two dimensionless quantities the quality factor q and the relaxation factor

dissipation enhanced unidirectional transport in topological systems - May 06 2022

web nov 17 2023 dissipation is a common occurrence in real world systems and is generally considered to be detrimental to transport in this study we examine the transport properties of a narrow quantum anomalous hall system with dissipation applied on one edge when the fermi level resides within the hybridization gap we find that while transport is
