transition from the old into a new society and civilization The author covers topics such as our primate small group social behavior the development of the matriarchal agricultural ideological system the ideology involved in barbarism and the rise of the patriarchal monogamous ideologically based societies and their civilizations Learn why the green revolution is falling behind the biologically related build up of stress and how lagging energy supplies will affect the world Two of the last chapters lay out the structural make up of every successful mainstream world view ideological system They use that to build a facsimile of what the core of such a new and advanced system would have to be like to succeed a perpetual lack of which would ensure that this is indeed The Last Civilization because no other can follow without it Marginal Groups and Mainstream American Culture Yolanda Estes,2000 They are often portrayed as outsiders ethnic minorities the poor the disabled and so many others all living on the margins of mainstream society Countless previous studies have focused on their pain and powerlessness but that has done little more than sustain our preconceptions of marginalized groups Most accounts of marginalization approach the subject from a distance and tend to overemphasize the victimization of outsiders Taking a more intimate approach this book reveals the personal moral and social implications of marginalization by drawing upon the actual experiences of such individuals Multidisciplinary and multicultural Identity on the Margin addresses marginalization at a variety of social levels and within many different social phenomena going beyond familiar cases dealing with race ethnicity and gender to examine such outsiders as renegade children conservative Christians and the physically and mentally disabled And because women are especially subject to the effects of marginalization feminist concerns and the marginalization of sexual practices provide a common denominator for many of the essays From problems posed by complimentary racism to the status of gays in Tony Blair s England from the struggle of Native Americans to preserve their identities to the singular problems of single mothers Identity on the Margin takes in a broad spectrum of cases to provide theoretical analysis and ethical criticism of the mechanisms of identity formation at the edges of society In all of the cases the authors demonstrate the need for theory that initiates social change by considering the ethical implications of marginalization and criticizing its harmful effects Bringing together accounts of marginalization from many different disciplines and perspectives this collection addresses a broad audience in the humanities and social sciences It offers a basis for enhancing our understanding of this process and for working toward meaningful social change
