functioning social support being able to meet the requirements of professional life positive emotions etc Power 2003 Work on subjective well being SWB on the other hand was developed in the context of healthy everyday life it also has a history of more than 30 years During this 30 year period factors that have an impact on SWB such as SES gender health age and religiosity have been identified Diener 2000 A third independent line of research pertains to what has been called Positive Psychology Seligman Csikszentmihalyi 2000 that is an emphasis on human strengths such as optimism hope wisdom positive emotions resilience etc which contribute to positive functioning in life Recently SWB has been associated to human strengths and to the movement of positive psychology but this did not happen for QoL possibly because of its emphasis on people with health problems However QoL can be conceived of as a generic term that pertains to all people healthy or not In this sense it is closely related to SWB defined as happiness Diener 2000 Also QoL encompasses positive emotions that go beyond happiness and has the advantage that it can be applied to many different domains of life such as interpersonal relations health related situations and professional and educational strivings Moreover the mechanisms that underpin QoL and SWB can be studied in relation to people's goals and strengths of character that is from a positive psychological perspective Such a perspective can reveal the specificities of quality in the various domains of life and specifically the positive emotions and strengths that contribute to a happier healthier and more successful life even in face of adversity Therefore despite the differences among the three theoretical traditions namely QoL SWB and positive psychology it is possible to find the common ground they share and each of them can benefit from notions developed in the others The aim of the present book is to bring together these three traditions show the interactions of variables emphasized by them and give an integrative perspective from the positive psychology point of view It also aims to extend the range of life situations in which one can look for quality and which go beyond the traditional emphasis of QoL on health problems Thus the content of the proposed book covers different age populations from children to older adults healthy and people facing health problems as well as people facing problems in their interpersonal lives or in their pursuits It also discusses factors that contribute to marital satisfaction well being in the school context and things that people value and cherish The chapters refer to notions such as happiness interest resilience wisdom hope altruism optimism and spirituality religiosity that represent unique human strengths Finally it emphasizes the role of goals and motivation that connect SWB with self regulation and managing of one's life priorities To conclude the chapters included in the proposed edited book aim at bringing to the fore new theoretical developments and research on QoL SWB and positive psychology that bridges previously distinct theoretical traditions The proposed book covers a broad range of topics addresses different theoretical interests and paves the way for a more integrative approach Finally it brings together an international set of authors from USA Europe Australia and Asia
