Internationally renowned architect I M Pei commented that if Marcel Breuer s church for Saint John s Abbey had been built in New York instead of the north woods of Minnesota it would be world famous Hamilton Smith Breuer s longtime associate

wrote that the completed church was that rare thing an architectural design fully realized and he regarded it as Breuer's finest achievement. The junior member of the twelve monk planning committee recounts in warm and frequently humorous detail how its members related to the Hungarian born Bauhaus trained architect who had no background in church architecture but shared their belief in the enduring quality of simple materials sympathetically used. How the strong architect-client relationship survived the strain of disagreement at a critical moment in completion of the church is the narrative high point in this informal record of four years in which the reader sees a masterpiece of modern church architecture take shape.

David Barlex, 2007 *Designing UNESCO* Christopher E.M. Pearson, 2017-07-05 *Designing UNESCO: Art, Architecture and International Politics at Mid-Century* represents the first full-length monograph on the genesis, construction and reception of the Paris headquarters of the United Nations Educational, Scientific and Cultural Organization (UNESCO). The book traces the long and complex birth of UNESCO's permanent seat from its conception in 1950 to its inauguration in 1958, showing how its history constitutes a unique nexus of modernist practices in twentieth-century international politics, art, architecture and criticism. Drawing on a wide range of unpublished archival material and examining critical reception of the building in the local and international press, Christopher Pearson's analysis operates on formal, structural and theoretical levels, revealing many of the largely unspoken assumptions of modern architecture at mid-century and elucidating the conflicted relation between art and science in the post-war period. The volume also throws new light on many of the major architects and artists of the period, among them Breuer, Gropius, Le Corbusier and Eero Saarinen, as well as Picasso, Moore, Miró, Calder and Noguchi. *Designing UNESCO* is a compelling and original account of one of the most important yet underappreciated buildings of twentieth-century modernism.
