Medical Thinking The Psychology Of Medical Judgment And Decision Making:

Medical Thinking Steven Schwartz, Timothy Griffin, 2011-10-04 Decision making is the physician's major activity. Every day in doctors' offices throughout the world patients describe their symptoms and complaints while doctors perform examinations, order tests, and on the basis of these data decide what is wrong and what should be done. Although the process may appear routine even to the physicians involved, each step in the sequence requires skilled clinical judgment. Physicians must decide which symptoms are important, whether any laboratory tests should be done, how the various items of clinical data should be combined, and finally which of several treatments, including doing nothing, is indicated. Although much of the information used in clinical decision making is objective, the physician's values, a belief that pain relief is more important than potential addiction to pain-killing drugs, for example, and subjectivity are as much a part of the clinical process as the objective findings of laboratory tests. In recent years, both physicians and psychologists have come to realize that patient management decisions are not only subjective but also probabilistic, although this is not always acknowledged overtly. When doctors argue that an operation is fairly safe because it has a mortality rate of only 1%, they are at least implicitly admitting that the outcome of their decision is based on probability.

Heuristics and Biases Thomas Gilovich, Dale Griffin, Daniel Kahneman, 2002-07-08 This book first published in 2002 compiles psychologists' best attempts to answer important questions about intuitive judgment.

Judgment and Decision Making Terry Connolly, Hal R. Arkes, Kenneth R. Hammond, 2000 This work examines issues such as medical diagnosis, weather forecasting, labour negotiations, risk, public policy, business strategy, eyewitnesses, and jury decisions. This is a revision of Arkes and Hammond's 1986 collection of papers on judgment and decision making. Updated and extended, the focus of this volume is interdisciplinary and applied.

Decision Making from a Cognitive Perspective, 1995-10-20 The Psychology of Learning and Motivation publishes empirical and theoretical contributions in cognitive and experimental psychology ranging from classical and instrumental conditioning to complex learning and problem solving. This guest-edited special issue is devoted to research and discussion on decision making from a cognitive perspective. Topics include judgment and decision making with respect to memory processes and techniques, domain specificity, and confirmation bias. Key Features: Synthesis of decision and cognitive research; New theoretical treatments of critical phenomena; New findings and systematic reviews of past work; Coverage of preference inference, prediction, and hypothesis testing. Written by the new leading generation of researchers.

The Sociology of Health and Illness Peter Conrad, 2005 This collection of 49 readings offers an integrated analysis of the most important issues regarding health and health care from a critical and sociological perspective. Substantive introductions provide context for the readings. With ten new and two revised essays, the Seventh Edition contains more coverage of key areas such as alternative medicine, the pharmaceutical industry, and the relationship between healthcare and politics.

Decision Science and Technology James Shanteau, Barbara A. Mellers, David A. Schum, 2012-12-06 Decision Science and Technology is a compilation of

chapters written in honor of a remarkable man Ward Edwards Among Ward s many contributions are two significant accomplishments either of which would have been enough for a very distinguished career First Ward is the founder of behavioral decision theory This interdisciplinary discipline addresses the question of how people actually confront decisions as opposed to the question of how they should make decisions Second Ward laid the groundwork for sound normative systems by noticing which tasks humans can do well and which tasks computers should perform This volume organized into five parts reflects those accomplishments and more The book is divided into four sections Behavioral Decision Theory examines theoretical descriptions and empirical findings about human decision making Decision Analysis examines topics in decision analysis Decision in Society explores issues in societal decision making The final section Historical Notes provides some historical perspectives on the development of the decision theory Within these sections major multi disciplinary scholars in decision theory have written chapters exploring some very bold themes in the field as an examination of the book s contents will show The main reason for the health of the Decision Analysis field is its close links between theory and applications that have characterized it over the years In this volume the chapters by Barron and Barrett Fishburn Fryback Keeney Moreno Pericchi and Kadane Howard Phillips Slovic and Gregory Winkler and above all von Winterfeldt focus on those links Decision science originally developed out of concern with real decision problems and applied work such as is represented in this volume will help the field to remain strong

Current Catalog National Library of Medicine (U.S.), First multi year cumulation covers six years 1965 70 *Effect of Cancer On*

Quality of Life David Osoba, 2021-11-01 This book is comprised of extensive reviews and instructional chapters that discuss the quality of life in several aspects of cancer. The first six chapters deal with conceptual issues relating to measuring quality of life in adult and pediatric populations with cancer. The next five chapters provide practical information on how to select quality of life measures, the statistical analysis of trials, economic evaluations to be considered, and some possible abuses of quality of life measures. Five chapters review the results of studies using selected quality of life measures and provide recent information on their performance. These are followed by three chapters dealing with specific issues relating to nausea and vomiting associated with cancer therapy. Three chapters are devoted to the problems of assessing and controlling pain in patients who have cancer. There are also two chapters that deal with the quality of life in palliative care. *Effect of Cancer on Quality of Life* is intended for all who have an interest in measuring the quality of life in patients with cancer. This includes investigators who are just entering the field and can benefit from instructions on how to conduct quality of life research as well as those who are experienced in conducting this kind of research.
