McCall,Lesley A. Whyte,2007-04-05 This title is directed primarily towards health care professionals outside of the United States It is a well known text that provides guidelines for over 40 common nursing procedures carried out by carers in a variety of settings The development of competence in these practices is one of the most important aspects of pre registration programmes and this is one of the few UK based texts that takes an educational approach to these practices as opposed to a purely procedure driven approach As in previous editions the emphasis is on a holistic approach with the recognition that each patient is a unique individual Each procedure contains rationale and information for patient education in addition to step by step guidance Skills explained step by step to facilitate learning The comprehensive range of procedures including advanced practices will give readers

confidence when they begin clinical work. Relevance to hospital and community settings makes it applicable to a wide audience. The rationale sections link to the evidence base thereby ensuring best practice.

Cardiothoracic Manual for Perioperative Practitioners Dr Bhuvaneswari Krishnamoorthy, 2020-02-03 Cardiothoracic surgery is constantly evolving in many aspects and there are many text books exist to fulfil the gap of new evidences. Most of these books are written for surgeons, anaesthetists and there is a significant deficit in many important areas which are explored in this book. It is aimed for all perioperative practitioners such as surgical care practitioners, surgical cardiothoracic trainees, anaesthetic trainees, anaesthetic practitioners, recovery practitioners, ward advanced nurse practitioners and perfusionists. It is very important for the perioperative practitioner who wants to start their career in cardiothoracic surgery to understand the step by step surgical procedure is vital. Cardiothoracic Manual for Perioperative Practitioners is devoted to delivering comprehensive coverage of all aspects of cardiothoracic surgery with emphasis on the roles and importance of the full theatre team. Details are provided throughout initial theatre set up and surgical instrumentation selection. A step by step walk through of routine surgical procedures, cardiopulmonary bypass guidance, investigations undertaken during the intraoperative period and a detailed background of surgical anatomy is provided. The book also covers essential aspects associated with recovery of the patient and the common pitfalls in surgery and recovery and how these can be avoided. The structure and organisation of the theatre environment, ethical and legal issues, preventive and protective measures and the importance of swab counts are explained succinctly and systematically by experts in this field. The reader will have reliable and complete guidance to provide all the knowledge required to be ready to work in the theatre environment. Each chapter contains important references for further reading and greater in depth study. All chapters are written by an experienced practising surgeons, anaesthetists and practitioners.
