Psychiatric Nursing Skills Graham Dexter, Michael Wash, 2013-12-01 In this book we have attempted to identify skills which are needed by the psychiatric nurse and in doing so to identify a body of knowledge unique to the professional psychiatric nurse The book has been written to demonstrate the basis of a skills approach for both the experienced and the inexperienced nurse to build upon for we believe that psychiatric nurses due to both their training and their particular mixture of interests are well equipped to be in the forefront of psychiatry as a developing art and science We hope that this book in some small way helps this development Some of the more recent advances in psychiatric nursing have been reinforced by the publication of a training syllabus for mental nurses English and Welsh National Boards 1982 This document highlights the need for a change from a medical model to a social model and from a task oriented learning experience to a skills approach We have attempted to reflect this change in emphasis by including such aspects as personal development and self awareness human sexuality the nursing process and counselling skills

The Lancet, 1880 **Nursing Our Healer's Heart** Lorre Laws, 2024-12-10

The nursing profession is in crisis. Within a decade the world will have just over half the number of nurses it needs. The global nursing workforce has experienced mass complex trauma secondary to healthcare system inadequacies and a global pandemic. Traumatized and burned out nurses are leaving their roles or the profession in unprecedented numbers. Those who remain are stretched to or beyond their capacity. While system level strategies aim to address this crisis, none of them consider nurse traumatization and its impact upon patient safety, outcomes and quality of care. We cannot wait for health systems to prioritize nurse safety. Nurses can and must come together as a global community to heal through avoidable and unavoidable nurse specific traumatization while partnering with healthcare leaders to usher in a new era of nursing. This book, through an actionable framework, guides nurses in healing the traumas and hardships they've endured as individuals and nursing communities. Grounded in the sciences of unitary caring, integrative nursing, neurophysiology and transpersonal neurobiology, this book supports nurses in restoring their healer's heart as they come together to address the deep trauma, burnout, attrition and presenteeism that are central to the nursing crisis. Nurses will learn the language of their nervous system and how to navigate it as a foundational practice to support professional wellbeing. Each nurse will discover their unique innate care plan which will guide their healing and co-healing with other nurses. By embracing the healing and practices offered in this book, nurses will learn how to support their nervous system regulation so they can thrive instead of survive in practice. Working from their healed scars instead of their open wounds, nurses can effectively lead sustainable

organizational change and health care reforms that prioritize nurse safety and professional wellbeing **Professionalism and Social Change** Lara Maestripieri, Andrea Bellini, 2023-08-04 This book guides the reader in discovering contemporary professions and the critical changes they have lived through after the post industrial transformation of advanced capitalist societies Two interrelated concepts are used to interpret what is happening in professional work differentiation namely the set of processes by which professions and professionalism have become more diverse and heterogeneity the outcomes of such processes A novel analytical framework delves into differentiation and understands heterogeneity based on three dimensions within how professions are structured internally between how professions distinguish themselves from other occupations and from each other and beyond how professions govern societal changes and influence differentiation processes The book presents a collection of studies covering different countries and professions to demonstrate the analytical potential of the within between beyond model The conclusions show how neo liberal professionalism is putting the very idea of collegiate professions at stake while exposing emerging professions to market risks Chapters 1 and 10 are available open access under a Creative Commons Attribution 4.0 International License via link [springer.com](https://www.springer.com) Current Directions in Family Nurse Practitioner Curricula ,1977
