Nursing Diagnoses in Psychiatric Nursing Mary C. Townsend, 2001 This new edition combines Townsend's Pocket Guide and selected drug classifications with the associated drug data from Townsend's Drug Guide into one accessible reference. Discusses seven major psychotropic drug classifications that cover antianxiety agents, antidepressants, antimanic agents, antipsychotics, antiparkinsonian drugs, sedative hypnotics, and central nervous system stimulants. Five chapters added that cover HIV disease, homelessness, psychiatric home nursing care, forensic nursing, and complementary therapies. Each chapter covers a specific group of DSM-IV disorders including definition, predisposing factors, and symptomatology. Each nursing diagnosis includes the definition, etiologies, defining characteristics, goals, objectives, interventions, with selected rationales, and desired patient outcomes/discharge criteria. Each drug class includes general pharmacologic data, representative drugs from a given drug class, nursing diagnoses, and nursing implications.
