Koff,2017-07-05 Nursing in the European Union demonstrates how the European Union EU has refashioned the nursing world throughout the Member States via its power in many other policy domains Volume 1 focused on the EU s impact on nursing education regulation and research endeavours This volume focuses on real life situations and problems EU nurses face wages stress work environments and dispute resolution and places them in a comparative perspective In this unique work Sondra Z Koff develops a profile of nurses workplaces highlighting similarities and diversities challenges and nurses opinions Though it has limited formal authority in the health and health care sectors the EU has had a significant impact on the working life of these practitioners in areas such as employment options industrial relations and their outcomes organizational and environmental features of nurses workplaces collective action and more New policies and legalities are regulating the production distribution practices and organization of nursing according to supranational standards Koff helps to fill a gap in the literature given the dearth of comparative cross national book length studies of the nursing profession By adopting a framework focused on an institution policies and politics Koff addresses these topics from the perspective of multiple actors both national and international **European Dimensions and the Secondary School Curriculum** Ivor Goodson,Veronica McGivney,2018-10-03 Originally published in 1985 Europe and the EEC seemed to be virtually synonymous for the majority of our population and the ambivalent feelings many people have about the Community together with the consistently bad press it received in the UK seemed to engender a hostility in educational circles towards teaching about Europe as a whole However if one of the aims of education is to increase children s awareness tolerance and understanding of the world about them to widen their experience and horizons then teaching about the wider world must have a place in the curriculum This book argues for education about Europe not necessarily in favour of Europe breaking down the national insularity of the UK curriculum and using Europe as one convenient window on the wider world
