**The Ecology of Browsing and Grazing** Iain J. Gordon,Herbert H.T. Prins,2007-09-14 Extensive grazing and browsing by domestic and wild herbivores shape the vegetation composition structure and dynamics of many terrestrial ecosystems This volume investigates how large herbivores not only influence the structure and distribution of the vegetation but also affect nutrient flows and the responses of associated fauna The mechanisms and processes underlying the herbivores behaviour distribution movement and direct impact on the vegetation and the dynamics of nutrients plant species and vegetation composition in terrestrial ecosystems are discussed in detail It is shown that an understanding of plant animal interactions can provide practical advice on the management of large herbivores to integrate production and conservation in terrestrial systems particularly in the face of environmental and climate change

*Coastal Dunes* M. L. Martínez,Norbert P. Psuty,2007-09-14 Coastal dunes occur in almost every latitude from tropical to polar and have been substantially altered by human activities Many are already severely and irreversibly degraded Although these ecosystems have been studied for a long time as early as 1835 there has been a strong emphasis on the mid latitude dune systems and a lack of attention given to the tropics where unfortunately much of the modern exploitation and coastal development for tourism is occurring This book brings together coastal dune specialists from tropical and temperate latitudes which together cover a wide set of topics including geomorphology community dynamics ecophysiology biotic interactions and environmental problems and conservation A major product of this book is a set of recommendations for future research identifying relevant topics where detailed knowledge is still lacking It also identifies management tools that will promote and maintain the rich diversity of the dune environments in the context of continuing coastal development
