Braham, 2019-05-29 This title was first published in 2002 This really is a text that will fill a long felt want A key figure in that history is Am d e Ozenfant painter critic and friend of Le Corbusier who in the first half of this century founded a school in London where he conducted experiments and wrote about color in architecture Those experiments have been reconstructed for the book which also includes reprints of his most important articles on the subject This book provides a fascinating survey of this most contemporary topic that will inspire and inform designers and architects Color has often been regarded as the final dressing

of a building subject to the vagaries of fashion and left to the client to select There have been a number of studies of polychromy in the architecture of the more distant past particularly in relation to modern conservation practices but there is little or nothing on the architectural color of recent times and especially within Modernism *Collours* Rem Koolhaas,2001 The nature of colour should change no longer just a thin layer of change but something that genuinely alters perception this stipulation of Rem Koolhaas is echoes by the world famous architects and designers Alessandro Mendini and Norman Foster In this volume they present between them a total of 90 colours each covering half a page accompanied by comments on the background the significance and the applications of the colours Studies of colours from each office form the basis of this book and were previously only available in extravagant individual editions With this comprehensive and consistent presentation of the varying approaches to colour we have a compendium which shows the wide use of colour in today s technologically advanced architecture with its modern post modern and deconstructive orientation The range of examples of the colours in practice includes load bearing structures facades interior design furnishing and the entire specturm of product design

n profunda y verdadera del surrealismo exclamation a Andr Breton en 1929 apelando a la importancia del compromiso revolucionario frente a otras consideraciones como la estética En este sentido el surrealismo que empapa la obra de Rem Koolhaas es heredero fiel de estas palabras pertenece al ámbito del proceso frente al de la forma Se encuentra oculto pero manteniendo importantes conexiones con los tres campos del conocimiento que el surrealismo tomó del psicoanálisis y que sirven para organizar el libro en tres partes El automatismo psíquico los sueños y la locura Javier Arias plantea colocar en una mesa de disección el trabajo de OMA Rem Koolhaas buscando vínculos no sólo con el surrealismo como el movimiento de vanguardia sino con otras corrientes de pensamiento y de creación artística del siglo XX a las que influyó notablemente y que comparten su principio básico el entendimiento de la realidad como una unidad superior de la que solo percibimos una parte reprimida por la razón y por tanto la reivindicación de lo irracional la imaginación la fantasía y el delirio Color for Architects (Architecture Brief) Juan Serra Lluch, 2019-05-14 As far back as the earliest Greek temples color has been an integral part of architecture but also one of its least understood elements Color theory is rarely taught in architecture schools leaving architects to puzzle out the hows and whys of which colors to select and how they interact complement or clash Color for Architects is profusely illustrated and provides a clear concise primer on color for designers of every kind This latest volume in our Architecture Briefs series combines the theoretical and practical providing the basics on which to build a fuller mastery of this essential component of design A wealth of built examples exercises and activities allows students to apply their learning of color to real world situations **Dictionary of Today's Landscape Designers** Pierluigi Nicolin, Francesco Repishti, 2003 The aim of the book is to illustrate the different ways of understanding landscape creating a dictionary that can convey not just the scope of the designing processes and their related actors but to provide a first key for interpreting the various approaches to this discipline that has given rise to an entirely new dimension in designing the cityscape turning the open space of the city into a space for art and sculpture for garden and architecture and into a new field for cultural activity It documents the surprising extent of the planning experience and profiles world renowned architects engineers landscape architects artists and photographers It also provides the reader with a key interpretation of the different approaches to an experience that has introduced a new dimension in the physical transformation of our environment The dictionary features leading figures from the international scene including Tadao Ando Emilio Ambasz Daniel Buren Tony Cragg Walter de Maria Michael Heizer Nancy Holt Toyo Ito Anish Kapoor Rem Koolhaas Maya Lin Richard Long and James Turrell to name a few Over the last decade the concept of landscape has dramatically changed References to the discipline of landscape architecture can be found in urban planning in projects that reconstruct large disused areas in the design of public spaces parks and private gardens in Land Art and in photography This field has come to greater prominence with the increase in public projects and by keeping pace with new theoretical approaches and design practices This volume will be an invaluable reference for anyone involved in urban planning public art landscape architecture and landscape design Duty

Christian Parreno, 2021-02-11 Boredom is a ubiquitous feature of modern life Endured by everyone it is both cause and effect of modernity and of situations spaces and surroundings As such this book argues boredom shares an intimate relationship with architecture one that has been seldom explored in architectural history and theory Boredom Architecture and Spatial Experience investigates that relationship showing how an understanding of boredom affords us a new way of looking at and understanding the modern experience It reconstructs a series of episodes in architectural history from the 19th century to the present to survey how boredom became a normalized component of the everyday how it infiltrated into the production and reception of architecture and how it serves to diagnose moments of crisis in the continuous transformations of the built environment Erudite and innovative the work moves deftly from architectural theory and philosophy to literature and

psychology to make its case Combining archival material scholarly sources and illuminating excerpts from conversations with practitioners and thinkers including Charles Jencks Rem Koolhaas Sylvia Lavin and Jorge Silvetti it reveals the complexity and importance of boredom in architecture Envisioning Architecture Eugenio Morello, Barbara E.
