On Becoming A Professional Geographer:

On Becoming a Professional Geographer Martin S. Kenzer, 1989 **Academic Writing for Geographers** James A. Tyner, 2023-08-21 There are many how to books on writing for academics none of these however relate specifically to the discipline of geography In this book the author identifies the principle modes of academic writing that graduate students and early career faculty will encounter specifically focusing on those forms expected of geographers that is those modes that are reviewed by academic peers This book is readily accessible to senior undergraduate and graduate students and early career faculty who may feel intimidated by the process of writing This volume is not strictly a how to or step by step manual for writing an article or book rather through the use of real concrete examples from published and unpublished works the author demystifies the process of different types of scholarly pieces geographers have to write with the specific needs and challenges of the discipline in mind Although chapters are thematic based e.g. stand alone chapters on book reviews articles and books the manuscript is structured around the concept of story telling for it is the author's contention that all writing whether a scientific study or more humanist essay is a form of story telling **Applied Geography: Issues, Questions, and Concerns** M.S. Kenzer, 2013-11-11 The completion of this collection took many months and for a variety of reasons required the assistance and/or indulgence of a number of individuals First and foremost I would like to thank Tim Hudson for his useful input and support at the outset of the project Likewise I would like to thank Jesse O McKee for providing a hospitable environment during my affiliation with the University of Southern Mississippi At Louisiana State University I am grateful to Sam Hilliard and Carville Earle for their invaluable understanding The book became part of the GeoJournal Library as a result of Wolf Tietze's confidence in the topic and because of Henri G van Dorssen's and Kluwer Academic Publishers' good nature despite numerous problems Curtis C Roseman and the remainder of the Geography Department at the University of Southern California where I completed many last minute details for the volume are to be thanked for the cordial and warm environment I received while a visitor in Los Angeles Finally no multi-authored collection reaches completion without the help of many patient contributors This particular book suffered many setbacks along the way so I am particularly grateful to the authors herein They demonstrated their compassion and exceptional professionalism throughout by never second-guessing my decisions and by allowing me to remedy the setbacks in my own way They were a pleasure to work with and they should take pride in their achievements **The Work in the World** Michael R. Curry, 1996 Minnesota Archive Editions uses digital technology to make long unavailable books once again accessible to scholars students researchers and general readers Rich with historical and cultural value these works are published unaltered from the original University of Minnesota Press editions The books offered through Minnesota Archive Editions are produced in limited quantities according to customer demand and are available through select distribution partners **Leadership in American Academic Geography** Michael S. DeVivo, 2014-11-14 Leadership in American Academic Geography The

Twentieth Century examines the practice of leadership in the most influential geography departments in the United States Throughout the twentieth century transformational leaders often emerged as inspirational department chairs shaping the content and nature of the discipline and establishing models of leadership often fueling the success of programs and sparking shifts in paradigms Yet on occasion departmental chairmanships fell to individuals marked by laissez faire attributes lapses in integrity or autocratic behaviors which at times led to disaster Effective leaders within key academic departments played imperative roles in the discipline's prosperity and in contrast mediocrity in leadership contributed to periods of austerity Michael S DeVivo aims to offer not only a historical perspective on the geographic discipline but also insight to leaders in geography today and in the future so that they might be able to avoid failure and instead develop strategies for success by recognizing effective leadership behaviors that foster high levels of achievement

Research Design and Proposal

Writing in Spatial Science Jay D. Gatrell, Gregory D. Bierly, Ryan R. Jensen, 2011-11-25 The complex interactions between human and physical systems confronting social scientists and policymakers pose unique conceptual methodological and practical complications when doing research Graduate students in a broad range of related fields need to learn how to tackle the discipline specific issues of space place and scale as they propose and perform research in the spatial sciences This practical textbook and overview blends plenty of concrete examples of spatial research and case studies to familiarize readers with the research process as it demystifies and exemplifies how to really do it The appendix contains both completed and in progress proposals for MA and PhD theses and dissertations Emphasizing research as a learning and experiential process while providing students with the encouragement and skills needed for success in proposal writing Research Design and Proposal Writing in Spatial Science can serve as a textbook for graduate level research design courses as well as for undergraduate level project based spatial science courses Keywords proposal writing grant writing research geography spatial science

Thriving in an Academic Career Michael Solem, Kenneth Foote, Shannon O'Lear, LaToya Eaves, Jongwon Lee, 2024-12-30 This book provides an invaluable guide on how to achieve a successful and fulfilling academic career Academics must balance multiple roles and responsibilities between teaching research and offering services to the department university and broader community This book provides practical research based guidance on how to adopt a healthy and balanced perspective that accounts for these interconnections Research shows that faculty who achieve early balance in their academic responsibilities and home life are more likely to succeed in all aspects of their career while strengthening the quality and climate of their programs and campuses This book's chapters accordingly feature case studies and examples that dig deeper into strategies and principles of holistic and balanced career practice and planning This book assists readers in understanding the relationships between their individual talents as teachers and scholars the obligations of their department as a community nested with others contributing to the university mission and the role and responsibility of their university and discipline in the wider society The themes of balance and harmony underpin this book's approach to

faculty development Thriving in an Academic Career is for anyone beginning their academic career in geography and related social and environmental sciences at all types of higher education institutions This book will be of particular interest to graduate students and early career faculty in geography and nearby social environmental and natural sciences

Transnational Geographers in the United States Alan P. Marcus, 2016-07-26 This volume was written by eight transnational geographers These narratives comprise a collection of essays as a way to map personal trajectories and experiences which examine the concept of place at the micro level Eight transnational geographers convey their professional and personal identities in a global age By using an approach called autobiogeography these narratives will be of interest to geographers and other social science and humanities scholars as well as of interest to the general public This volume explores the concepts of transnationalism borders fragmentation movement displacement space place and home Drawing from various national ethnic and cultural perspectives the authors write about various important adjustments within contemporary global trends which in turn reflect ever changing ways to look at geography migration processes and transnationalism Like other migrants who have left their home they all left something behind **International**
