On Becoming An Innovative University Teacher Reflection In Action:

On Becoming An Innovative University Teacher: Reflection In Action Cowan, John, 2006-03-01 This innovative and readable book is not something to be cherry picked for quick hints and tips It is a work to be read and re read and savoured for its humanity sagacity practicality and reflection upon the all important relationships between teaching and learning and the teacher and the learner British Journal of Educational Technology a delightful and unusual reflective journey the whole book is driven by a cycle of questions examples strategies and generalizations from the examples In all it is the clearest example of practise what you preach that I have seen John Biggs Honorary Professor of Psychology University of Hong Kong This is a unique book written by a well known figure in HE who has broad experience and a long track record as an exemplary and caring teacher The book is unique because it is written in a very personal manner with a sharing of the author s varied experiences and great enthusiasm for the processes of teaching and communication Jenny Moon Bournemouth Media Centre and Independent Consultant Cowan s innovative approach to the authorship of a well researched and practical book is worthy of particular mention Practitioners that are keen to allow spaces for innovative approaches to professional development in learners will find this text readable and thought provoking Teaching in Higher Education On Becoming an Innovative University Teachers shows readers how to plan and run innovative activities to engage their students in effective reflective learning The book uses an unusual and accessible method each chapter begins by posing a question with which university and college teachers can be expected to identify then answers the question by presenting a series of examples thereafter the writer frankly airs his own second thoughts on what he has offered In the second edition of this popular book Cowan maintains his relaxed and readable style and the book features revised coverage to make it even more accessible and useful The examples have been updated throughout and a new chapter looks at innovation and reflection in the context of contemporary higher education This is key reading for all university teachers whether new or experienced who want to revitalise their teaching

On Becoming an Innovative University Teacher John Cowan, 1998 This book will assist university teachers to plan run innovative activities to enable their students to engage in effective learning and give them a rationale for the place of reflective teaching and learning in higher education Lecturing Sally Brown, Phil Race, 2003-12-16 Lecturing can be a terror a chore or an exhilarating experience For most lecturers at one time or another it is all of these things For many in HE FE it remains the staple form of teaching and as student groups get ever larger good lecturing becomes ever more important This is an accessible friendly and confidence boosting book for inexperienced and experienced lecturers alike Written in a lively and straightforward style it guides readers through the art of good lecturing This is a book to use both to gain confidence and to work with as the your lecturing becomes more assured The authors show how to improve lecturing and how lecturing is a flexible and essential tool for enhancing learning and understanding Illustrated throughout with fascinating case studies and scenarios and with helpful hints and tips key issues covered include

the place and types of lecture voice and body language causing learning in lectures making lectures more effective lecturing tools and processes engaging groups ensuring and developing quality tips for day to day use **Advancing Practice in Academic Development** David Baume, Celia Popovic, 2016-01-13 Within the field of academic development the last twenty years have seen a great expansion of published research into practice and the further development of theoretical approaches This growth in the scholarship of academic development matches a growth in the scholarship of teaching and learning Advancing Practice in Academic Development draws on these evolving scholarships to advance professional practice in academic development addressing questions such as How have global academic developers and their units developed and changed over recent decades How has the context in which academic development work is done altered What have academic developers and their professional associations learnt Case studies and examples are used throughout the text to illustrate development scenarios and methods Academic development is considered as among others a critical a scholarly a principled a pragmatic a supporting and a leadership role This book is ideal for use on academic development courses run by SEDA and other international organisations as well as by those who have responsibility for leading the improvement of educational practice Written in a scholarly accessible stimulating and practical style this book acknowledges difficulties and offers ways forward As well as analysing problems it offers solutions Links to web sources referenced in this book can be found at www.seda.ac.uk/apad

Teaching and Learning Culture Mads Jakob Kirkebæk, Xiang-Yun Du, Annie Aarup Jensen, 2013-11-19 This book is based on educational research conducted by researchers from the Department of Learning and Philosophy and the Confucius Institute for Innovation and Learning at Aalborg University Empirically it reports on different approaches to teaching and learning of culture including a student centered task based problem based learning PBL approach a digital technology supported approach and more It also reports on how when teaching and learning culture teachers professional identity and the informal teaching and learning environment impact the teaching and learning of culture in different educational settings from primary school to university A central theme in the book is the power of context

The studies illustrate in multiple ways and from different angles that culture is not taught in a vacuum or learned in isolation but may be influenced by many factors both inside and outside the classroom at the same time culture also influences the context of the learning The context may be invisible and hide itself as tacit knowledge or embedded values or it may be very visible and present itself as a fixed curriculum or an established tradition No matter what forms and shapes the context takes the studies in this book strongly indicate that it is essential to be aware of the power of context in teaching and learning culture in order to understand it and negotiate it This book suggests that teachers should not try to limit or avoid contextual influences but instead should explore how the context may be integrated into and used constructively in the teaching and learning of culture This allowance of context in the classroom will allow for teachers students subjects and contexts to enter into a dialogue and negotiation of meaning that will enrich each other and achieve the established goal acquisition of cultural awareness and intercultural understanding *Empowering Professional Teaching in Engineering* John Heywood, 2018-03-01 Each one of us has views about education how discipline should function how individuals learn how they should be motivated what intelligence is and the structures content and subjects of the curriculum Perhaps the most important beliefs that beginning teachers bring with them are their notions about what constitutes good teaching The scholarship of teaching requires that beginning teachers should examine evaluate these views in the light of knowledge currently available about the curriculum and instruction and decide their future actions on the basis of that analysis Such evaluations are best undertaken when classrooms are treated as laboratories of inquiry research where teachers establish what works best for them Two instructor centred and two learner centred philosophies of knowledge curriculum and instruction are used to discern the fundamental basic questions that engineering educators should answer in respect of their own beliefs and practice They point to a series of classroom activities that will enable them to challenge their own beliefs and at the same time affirm develop or change their philosophies of knowledge curriculum and instruction **An A-Z of Creative Teaching in Higher Education** Sylvia Ashton, Rachel Stone, 2021-03-31 HE students rightly have high expectations of their lecturers and tutors As staff in HE adapt their teaching to fit the changing share of HE more support is needed This A Z guide is an essential resource to support those teaching in HE today to enhance their practice This text is a rich source of innovative approaches for learning and teaching in HE It addresses some common issues faced by lecturers in HE and includes case studies and practical suggestions for teaching The text takes a critical approach to exploring themes from different perspectives and highlights important and recent theory in the field This second edition includes more content on teaching and learning online a new chapter on decolonising the curriculum and many more updates throughout **Interactivity, Game Creation, Design, Learning, and Innovation** Anthony L. Brooks, Eva Brooks, Nikolas Vidakis, 2018-03-06 This book constitutes the proceedings of two conferences The 6th International Conference on ArtsIT Interactivity and Game Creation ArtsIT 2017 and the Second International Conference on Design Learning and Innovation DLI 2017 The event was hosted in Heraklion Crete

Greece in October 2017 and attracted 65 submissions from which 50 full papers were selected for publication in this book. The papers represent a forum for the dissemination of cutting edge research results in the area of arts design and technology including open related topics like interactivity and game creation.
