El crecimiento de la oferta de posgrados a nivel mundial en los últimos años ha venido cobrando cada vez mayor intensidad. Este fenómeno es parte de un conjunto de transformaciones que se dan en la educación superior y que van reconfigurando los sistemas de enseñanza de este nivel. En la Argentina en la última década ha ocurrido una importante expansión de la oferta de posgrados siguiendo las tendencias internacionales y bajo el impulso de una serie de políticas pensadas con la intención de promover su desarrollo. Sin embargo a pesar del importante crecimiento los resultados fueron limitados en distintos aspectos relativos a la calidad y la eficiencia del proceso. Estos problemas responden a una serie de causas tales como la escasa integralidad de las políticas a la falta de respuesta a las demandas del mercado laboral y a un sesgo muchas veces excesivamente academicista. Hoy la formación de posgrados como también la evaluación y acreditación de los mismos son aspectos de gran influencia sobre la calidad y la equidad del conjunto del sistema de educación superior en particular y de los sistemas educativos en general. Por otra parte la educación superior es estratégica para el desarrollo en la medida que genera externalidades y tiene influencia sobre los procesos políticos económicos y sociales. Este libro es el resultado de varios años de investigación sobre los posgrados en la Argentina y su evaluación. Para lograr una perspectiva integral se aborda el tema desde diferentes dimensiones entre las cuales existen múltiples interacciones: las tendencias internacionales de la educación superior, la evolución de los posgrados universitarios en la Argentina, la evaluación de las carreras de posgrados, la investigación y su relación con la formación de posgrado, el financiamiento de los mismos, la vinculación con el sector productivo y finalmente las políticas de posgrados y sus impactos.

Tendencias recientes de los posgrados en América Latina Mabel Dávila, 2012

El posgrado se ha vuelto en el actual escenario internacional una prioridad para los gobiernos y los sectores productivos nacionales en términos de su contribución a la competitividad internacional y al desarrollo nacional. Tanto los gobiernos como los sectores de la producción demandan a las universidades una formación de recursos humanos altamente calificados así como también una producción científica y tecnológica de calidad que motiva un escenario de debate y reconfiguración de las políticas de posgrado. En este libro se analizan las tendencias recientes de los posgrados en América Latina, su desarrollo y sus principales características desde una perspectiva que considera entre otros aspectos las tradiciones educativas nacionales, los procesos sociales y políticos y las influencias internacionales que crecientemente cobran mayor importancia sobre los sistemas nacionales de educación superior.

University and Development in Latin America

,2008-01-01 Latin American countries are increasing their investments in science and technology introducing legislation to stimulate innovation but the impact of these efforts in the economy and society has been limited Most of the existing research takes place in universities and does not relate easily with business government and society There are however exceptions This book looks at the science technology and innovation systems of Argentina Brazil Chile and Mexico telling the stories of sixteen university research teams from different fields of knowledge working in very different national contexts but having in common the experience of producing high quality scientific knowledge in their fields while being very active in transferring their knoweldge to society They are deviations from the more traditional academic centers in the their own countries which tend to work according to the research agendas established by their individual members with subsidies from the education and science and techology authorities and even when working in applied fields have difficulties or give low priority to put their competence to practical use In spite of their differences they have to deal with some common issues how to stimulate academic entrepreneurship how to deal with issues of intellectual property how to relate with their universities and make the best possible use their countries innovation agencies In so doing they help their countries to come closer to the needs of the knowledge societies of today
