Postcapitalist Futures Adam Fishwick,Nicholas Kiersey,2021-05-20 This book critically engages with the proliferation of literature on postcapitalism which is rapidly becoming an urgent area of inquiry both in academic scholarship and in public life It collects the insights from scholars working across the field of Critical International Political Economy to interrogate how we might begin to envisage a political economy of postcapitalism The authors foreground the agency of workers and other capitalist subjects and their desire to engage in a range of radical experiments in decommodification and democratisation both in the workplace and in their daily lives It includes a broad range of ideas including the future of social reproduction human capital circulation political Islam the political economy of exclusion and eco communities Rather than focusing on the ending of capitalism as an implosion of the value form this book focuses on the dream of equal participation in the determination of people s shared collective destiny

Post-Capitalist Entrepreneurship Boyd Cohen,2017-09-22 Post Capitalist Entrepreneurship Startups for the 99% details the implications of the post capitalist society on entrepreneurship around the globe and it challenges many of our underlying assumptions about how entrepreneurs form startups and the objectives and roles or lack thereof of startup investors in a post capitalist society The author explores real emerging stories about different forms of post capitalist entrepreneurship PCE with chapters dedicated to subjects such as platform cooperatives alternative currencies local crypto and time banking and the emergence of blockchain enabled Distributed Autonomous Organizations DAOs This book will help aspiring and current entrepreneurs investors and policymakers to Understand emerging trends in new forms of economic activity that will shape the future of entrepreneurial opportunities Discover new approaches to business modeling in the post venture capital opportunity space Embrace Lean startup and collaborative startup approaches that can accelerate startups in these new markets Recognize new spaces and avoid being disintermediated by new forms of startups and financing Know why and how local governments should reshape entrepreneurship policy to support post capitalist entrepreneurship for the 99%

The ^ACritique of Commodification Christoph Hermann,2021-07-05 In The Critique of Commodification Christoph Hermann argues that commodification entails production for profit rather than provision for need The focus on profits Hermann shows means that social needs are met in a way that excludes those who cannot pay and ensures high profits In going through the damaging effects of commodification Hermann also discusses alternatives based on the satisfaction of needs rather than maximization of profits

Understanding Neoliberal Rule in Higher Education Mark Abendroth, Brad J.

Porfilio, 2015-06-01 The word fundamentalism usually conjures up images of religions and their most zealous followers. Much less often the word appears in connection with political economy. The phrase free market gives the connotation that capitalism is freedom. Neoliberalism is the rise of global free market fundamentalism. It reaches into nearly every aspect of our daily lives as it seeks to dominate and eliminate the last vestiges of public domains through wanton privatization and deregulation. It degrades all that is public. The good news is that a global community of resistance continues to struggle against neoliberal oppression. Formal and informal education entities contribute to these struggles offering visions and strategies for creating a better future. The purpose of this volume is twofold. Several contributors will highlight how the neoliberal agenda is impacting educational policy formation, teaching and learning, and relationships between institutions of higher education and communities. Other contributors will highlight how the global community has gradually become conscious of the ideological doctrine and how it is responsible for human suffering and misery. The volume is needed because the growing body of educational research linked to exploring the impact of neoliberalism on education and society fails to provide conceptual or historical understanding of this ideology. It is also an important scholarly intervention because it provides insights as to why educators, scholars, and other global citizens have challenged the intrusion of market forces over life inside universities and colleges. Teaching faculty, research faculty, and anyone who yearns to understand what is behind the debilitating trend of commercial forces subverting humanizing educational projects would benefit from this volume. Activists, educators, youth, and scholars who seek strategies and visions for building democratic higher education and a more democratic society would consider this volume essential reading.

The Philosophy of Marx (RLE Marxism) William Leon McBride, 2015-04-24 This book first published in 1977 presents for the first time a serious and systematic assessment of Marx primarily as a philosopher. It considers all major aspects of Marx's theory: its methodology, its ontological dimensions, its approaches to the descriptions of history and of societies and their economic structures, its alleged predictions, and its vision of the future as well as some of its intellectual antecedents and twentieth-century heirs. The presentation of Marx's ideas attempts to be at once faithful to them as distinguished from their reinterpretations by later Marxists and yet novel in form and language. From this unique standpoint the book aims to bring the student of philosophy and of political ideas to a closer understanding of the intellectual foundations of Marx's *Capital* and his writings in collaboration with Engels.

The Anthropocene and its Future Karl Bruckmeier, 2024-04-30 This book analyses the complex social and ecological processes of the Great Acceleration, the Great Transformation, and sustainable development that shape the future of the global society in the twenty-first century. The first process takes place for a longer time, the second over the past thirty years, with attempts to build a sustainable economy and society in the global policy of sustainable development. The processes and their interaction will be discussed with knowledge from inter- and transdisciplinary transformation research, social and political ecology, and

theories of modern society The guiding theoretical concepts for the social ecological transformation will be clarified the concepts of acceleration transformation and sustainable development and the societal and ecological processes they include To obtain a more detailed picture of the changes in the global social ecological system different parts of the global transformation the digital transformation the transformation of food systems and the transformation of modes of living in the social lifeworld are described to show the complex changes in the epoch of the Anthropocene more concretely The global change processes in society and nature are caused by human forces but are difficult to control through policy and governance With the interdisciplinary integration of concepts and knowledge it becomes possible to provide a more detailed picture of the difficulties to achieve a sustainable future society *The Encarta Book of Quotations* Bill Swainson,2000-09-30 Here are 25 000 quotations drawn from the history politics literature religions science and popular culture of the world ranging from the earliest Chinese sages through Shakespeare to the present day *Practical Necessity, Freedom, and History* David James,2021 By means of careful analysis of relevant writings by Hobbes Rousseau Kant Hegel and Marx David James argues that the concept of practical necessity is key to understanding the nature and extent of human freedom Practical necessity means being or believing oneself to be constrained to perform certain actions in the absence whether real or imagined of other more attractive options or by the high costs involved in pursuing other options Agents become subject to practical necessity as a result of economic social and historical forces over which they have or appear to have no effective control and the extent to which they are subject to it varies according to the amount of economic and social power that one agent possesses relative to other agents The concept of practical necessity is also shown to take into account how the beliefs and attitudes of social agents are in large part determined by social and historical processes in which they are caught up and that the type of motivation that we attribute to agents must recognize this Practical Necessity Freedom and History From Hobbes to Marx shows how Rousseau Kant Hegel and Marx in contrast to Hobbes explain the emergence of the conditions of a free society in terms of a historical process that is initially governed by practical necessity The role that this form of necessity plays in explaining history necessity invites the following question to what extent are historical agents genuinely subject to both practical and historical necessity *Deepening Democracy* Joseph Tharamangalam,Jos Chathukulam,2022-12-30 This book examines the renewed interest and commitment that countries across the world have shown in recent decades towards adopting models of decentralising or downsizing the state and moving towards more participatory models of government It examines systems of decentralised development such as self managing co operatives from a global and comparative perspective with a focus on developing countries Drawing on examples from Kerala and a few other states in India as well as Cuba Bangladesh and South Africa among other countries the book offers critical perspectives on the positive impacts of these experiments and the promises these offer for the future It discusses the challenges of implementing these models how well these work in coordination with the civil society and the state issues of transparency

and democratic oversight as well as corruption and capture of power due to entrenched structures of inequality The volume analyses welfare and development models and self management interventions in countering the effects of the COVID 19 pandemic It also looks at the merits and demerits of decentralisation in countering the global socioeconomic and environmental crisis and the rise of authoritarian populism in many countries The book will be of interest to students and researchers of development studies political science business community development social justice as well as of co operative management programmes It will also appeal to students of political economy as well as development professionals think tanks and policymakers

Managing in a Time of Great Change Peter Ferdinand Drucker, 2009-11-02 For more than half a century Peter F Drucker's landmark essays have inspired and educated managers and influenced the nature of business Now the learning continues with the Harvard Business Press release of the new Drucker Library Series In *Managing in a Time of Great Change* the first book in the series Drucker offers advice to executives for thriving in the global business environment of the future covering such topics as team building cutting costs in retail changes in the U S economy and doing business in Japan

Modernity and its Futures Past Nishad Patnaik, 2023-11-20 The work reimagines emancipatory possibilities in the face of reified capitalist modernity The enlightenment resulted in a disenchanted world stripped of anthropomorphised meaning and purpose This world in its capitalistic figuration alienates us from others and from nature To rearticulate emancipatory possibilities requires a non alienated relation to society and nature Yet modernist disenchantment cannot be undone by returning to pre modern enchantment Rather such rearticulation calls for the recovery of unalienated life from within non reified modernity by renewing its universalist dimension

Tradition Modernization and Globalization Prem Narain Pandey, 2015-01-01 The present volume provides a sequential nexus of Tradition Modernization and Globalization right from the early stages up to present time The continuum of tradition and modernity is delineated clearly in different papers in the wake of modern scientific inventions and technological innovations Some of the very brilliant analyses of the features of tradition modernization and globalization done by the sociologists of international repute and specialized scholars of social sciences have made this book a unique specimen that provides a critical and crosscultural analysis of tradition modernization and global developments with concrete instances in different domains of societies The book is divided in two major parts Part one deals with the historical perspective of tradition and modernization and part two focuses on the emerging features of tradition modernization and globalization and their impacts on different components of economy polity and social structure in the developed societies of Europe and USA as well as developing societies of Asia Africa and Latin America This book may be an academic stimulant to administrators planners and policymakers of governments and scholars of higher studies as well as scientists and technologists interested in the fields of modernization and overall global development The present volume is the outcome of a joint academic endeavour with Prof S K Srivastava who left for heavenly abode on 12 May 2012 in the mid journey of the publication
