Post Nationalist American Studies:

Post-Nationalist American Studies John Carlos Rowe, 2000-12-04 *Post Nationalist American Studies* seeks to revise the cultural nationalism and celebratory American exceptionalism that tended to dominate American Studies in the Cold War era. The goal of the book's contributors is a less insular more transnational comparative approach to American Studies one that questions dominant American myths rather than canonizes them. Articulating new ways to think about American Studies these essays demonstrate how diverse the field has become. Contributors are concerned with cross cultural communication race and gender global and local identities and the complex tensions between symbolic and political economies. Their essays explore among other topics the construction of foreign peoples and cultures the notion of borders territorial racial economic and sexual the multilingual reality of the United States the place of the Mexican American War in U S history and the significance of Tiger Woods in today's global market of consumption. Together the essays propose a renewed vision of the United States role in the world and how American Studies scholarship can address that vision. Each contributor includes a sample syllabus showing how the issues discussed in individual essays can be brought into the classroom.

Using reports in multicultural psychology and cultural neuroscience to interpret an array of cultural forms including literature art film advertising search engines urban planning museum artifacts visa policy public education and ostensibly non state media the argument fills a gap in contemporary criticism by a focus on what makes cultural canons symbolically effective or not for an individual exposed to them. The book makes important points about the limits of transnationalism as a paradigm evidencing how such approaches often reiterate presumptive and essentialized notions of identity that function as new dimensions of exceptionalism. In response to the shortcomings in transnational criticism the final chapter initiates a theoretical consideration of a postgeographic and postcultural form of community and of cultural analysis. *Re-framing the Transnational Turn in American Studies* Winfried Fluck, Donald E. Pease, John Carlos Rowe, 2011 What is the state of American studies in the twenty first century. *Handbook of Transatlantic North American Studies* Julia Straub, 2016-05-10 Transatlantic literary studies have provided important new perspectives on North American British and Irish literature. They have led to a revision of literary history and the idea of a national literature. They have changed the perception of the Anglo

American literary market and its many processes of transatlantic production distribution reception and criticism Rather than dwelling on comparisons or engaging with the notion of influence transatlantic literary studies seek to understand North American British and Irish literature as linked with each other by virtue of multi layered historical and cultural ties and pay special attention to the many refractions and mutual interferences that have characterized these traditions since colonial times This handbook brings together articles that summarize some of the crucial transatlantic concepts debates and topics The contributions contained in this volume examine periods in literary and cultural history literary movements individual authors as well as genres from a transatlantic perspective combining theoretical insight with textual analysis

A Concise Companion to American Studies John Carlos Rowe, 2010-02-12 A Companion to American Studies is an essential volume that brings together voices and scholarship from across the spectrum of American experience A collection of 22 original essays which provides an unprecedented introduction to the new American Studies a comparative transnational postcolonial and polylingual discipline Addresses a variety of subjects from foundations and backgrounds to the field to different theories of the new American Studies and issues from globalization and technology to transnationalism and post colonialism Explores the relationship between American Studies and allied fields such as Ethnic Studies Feminist Queer and Latin American Studies Designed to provoke discussion and help students and scholars at all levels develop their own approaches to contemporary American Studies

The New American Studies John Carlos Rowe, 2002 A clarion call for a more theoretically and politically informed approach to American Studies John Carlos Rowe a leading American Studies scholar has examined his field of study and declared it not ready for the twenty first century In The New American Studies Rowe demands a reinvention of the discipline that includes a commitment to making it more theoretically informed and he draws on the work of cultural critics postmodernist theorists and scholars in ethnic gender gay and media studies Rowe asserts that with American Studies s strong history of social criticism and practical pedagogy it is an easy leap to the type of progressive commitments characteristic of these areas of scholarship The New American Studies is a compelling combination of theory and application synthesis and polemic Rowe traces the evolution of American Studies over the last quarter century and looks to the future placing the field in a postnationalist context that encompasses all of the Americas and the disparate cultural zones within He then demonstrates the kind of literary and cultural interpretation he calls for examining subjects ranging from Hawthorne s and James s responses to nineteenth century sexual mores to the ways television legitimated itself in its first few decades to the Eli n Gonz lez custody case

Discrepant Parallels Gillian Roberts, 2015-05-01 The 49th parallel has long held a symbolic importance to Canadian cultural nationalists as a strong though permeable border. But in contemporary Canadian culture, the border has multiple meanings and imbalances of cultural power occur both across the Canada-US border as well as within Canada. *Discrepant Parallels* examines divergent relationships to and investments in the Canada-US border in a variety of media such as travel writing, fiction, poetry, drama, and television. Tracing cultural production in Canada since the 1980s through the periods of FTA and NAFTA negotiations and into the current post-9/11 context, Gillian Roberts grapples with the border's changing relevance to Canadian nationalist, Indigenous, African Canadian, and Latin American perspectives. Drawing on Kant and Derrida, she theorizes the 49th parallel to account for the imbalance of cultural, political, and economic power between the two countries as well as the current challenges to dominant definitions of Canadianess. Focusing on a border that is often overshadowed by the contentious US-Mexico divide, *Discrepant Parallels* analyzes the desire to establish Canadian-American sameness and difference from a multitude of perspectives as well as its implications for how Canada is represented within and outside its national borders.

Aberrations in Black Roderick A. Ferguson, 2013-11-30 A hard-hitting look at the regulation of sexual difference and its role in circumscribing African American culture, *The Sociology of Race Relations in America* typically describes an intersection of poverty, race, and economic discrimination. But what is missing from the picture? Sexual difference can be as instructive as what is present. In this ambitious work, Roderick A. Ferguson reveals how the discourses of sexuality are used to articulate theories of racial difference in the field of sociology. He shows how canonical sociology—Gunnar Myrdal, Ernest Burgess, Robert Park, Daniel Patrick Moynihan, and William Julius Wilson—has measured African Americans' unsuitability for a liberal capitalist order in terms of their adherence to the norms of a heterosexual and patriarchal nuclear family model. In short, to the extent that African Americans' culture and behavior deviated from those norms, they would not achieve economic and racial equality. *Aberrations in Black* tells the story of canonical sociology's regulation of sexual difference as part of its general regulation of African American culture. Ferguson places this story within other stories: the narrative of capital's emergence and development, the histories of Marxism and revolutionary nationalism, and the novels that depict the gendered and sexual idiosyncrasies of African American culture. Works by Richard Wright, Ralph Ellison, James Baldwin, Audre Lorde, and Toni

Morrison In turn this book tries to present another story one in which people who presumably manifest the dysfunctions of capitalism are reconsidered as indictments of the norms of state capital and social science Ferguson includes the first ever discussion of a new archival discovery a never published chapter of Invisible Man that deals with a gay character in a way that complicates and illuminates Ellison s project Unique in the way it situates critiques of race gender and sexuality within analyses of cultural economic and epistemological formations Ferguson s work introduces a new mode of discourse which Ferguson calls queer of color analysis that helps to lay bare the mutual distortions of racial economic and sexual portrayals within sociology

Aspects of Transnational and Indigenous Cultures Clara Shu-Chun Chang,Hsinya Huang,2015-01-12 Aspects of Transnational and Indigenous Cultures addresses the issues of place and mobility aesthetics and politics as well as identity and community which have emerged in the framework of Global Transnational American and Indigenous Studies With its ten chapters contributions from the U S Germany Australia Canada Japan Korea and Taiwan the volume conceptualizes a comparative trans national paradigm for crossing over national regional and international boundaries and in so doing to imagine a shared world of poetics and aesthetics in contemporary transnational scholarship

Beyond Imagined Uniqueness William Glass,2010-08-11 Beyond Imagined Uniqueness Nationalisms in Comparative Perspectives is a collection of essays from a variety of disciplines and theoretical perspectives that explore the contentious issue of nationalism in historical and contemporary settings They adopt an interdisciplinary approach to the topic of nationalism and its permutations and modes of expression The unspoken context of these essays is the trends subsumed under the processes of globalization Though the world may be becoming more integrated economically these essays suggest social cultural and political forces historically rooted keep the nation and national identity alive and well The comparative perspectives offered by the essays appear in two ways one set is the explicit comparisons of nations made by several authors within their essays and between the essays themselves when the authors focus on developments within a single nation A second and indeed more thought provoking set of comparisons come from the way the essays address nationalism in disparate scholarly approaches that include visual culture history sociology and literature Moreover while traditional themes in the study of nationalism are not ignored these essays expand the discussion with case studies of nationalism in Turkey Asia and Eastern Europe Even when nationalism is considered in those areas that have been the central focus of nationalism studies Western Europe and the USA the authors bring unique voices to the conversation as in the use of portraiture as a vehicle of nationalism in Cold War America or children s literature shaping a Swedish American identity or in the idea of a covenant as a source of Dutch nationalism or the role of minority languages in West European societies Section One of this volume contains essays that examine the terrain of the national imaginary

through language monuments and visual culture Several of the essays in this traverse the cultural sites of representation and commemoration of the nation looking carefully at the politics of memory in places material objects and texts Section Two provides more individual case studies of nations though many of these essays engage significant regional and international tensions especially in a post Cold War world that has often influenced the internal dynamics of nation building Section Three moves the focus away from the nation to immigrant communities especially those in the United States Canada and the Caribbean Diasporas throughout the world have challenged many theories about the nation as crossing borders becomes the norm rather the exception

American Studies Philip J. Deloria, Alexander I. Olson, 2017-08-29 American Studies has long been a home for adventurous students seeking to understand the culture and politics of the United States Despite being taught in universities around the world American Studies has resisted developing a coherent methodology for fear of losing the flexibility and freedom to imagine new avenues of thought But what if these fears are misplaced Through a fresh look at the origins of the field this book contends that a shared set of rules can offer a springboard to creativity American Studies A User s Guide offers readers a critical introduction to the history and methods of the field useful strategies for interpretation curation analysis and theory and case studies of American Studies in practice
