Global Geopolitical Power and African Political and Economic Institutions John James Quinn,2015-12-30 Global Geopolitical Power and African Political and Economic Institutions When Elephants Fight describes the emergence and nature of the prevailing African political and economic institutions in two periods In the first most countries adopted political and economic institutions that funneled significant levels of political and economic power to the political elites usually through one or no party military political systems inward oriented development policies and or state led and often state owned industrialization In the second period most countries adopted institutions that

diluted the overarching political and economic power of ruling elites through the adoption of de jure multiparty electoral systems more outward oriented trade policies and the privatization of many state owned or controlled sectors though significant political and economic power remains in their hands The choices made in each period were consistent with prevailing ideas on governance and development the self interests of political elites and the perceived availability of support or autonomy vis vis domestic regional and international sources of power at the time This book illustrates how these two region wide shifts in prevailing political and economic institutions and practices of Africa can be linked to two prior global geopolitical realignments the end of WWII with the ensuing American and Soviet led bipolar system and the end of the Cold War with American primacy Each period featured changed or newly empowered international and regional leaders with competing national priorities within new intellectual and geopolitical climates altering the opportunities and constraints for African leaders in instituting or maintaining particular political and economic institutions or practices The economic and political institutions of Africa that emerged did so as a result of a complex mix of contending domestic regional and international forces material and intellectual all which were themselves greatly transformed in the wake of these two global geopolitical realignments

Whitman Cobb, 2019-07-09 Political science has changed the way students learn has changed so too should the way it s taught This is political science today Political Science Today by Wendy Whitman Cobb gives you a holistic view of the subfields that make up political science by dedicating one chapter to each of the topics at the core of the discipline Unlike denser texts on the market Political Science Today uses a field based approach that allows you to engage with the material directly and dig into each of the discipline s diverse subfields while also developing critical thinking skills discerning the differences between politics and political science conducting and consuming research and broadening your future career aspirations The book s innovative table of contents begins with foundational tools like theories and research methods then builds up to subfield chapters on Comparative Politics International Relations

American Government Political Economy and Public Policy and Administration Current case studies throughout the text provide a backdrop for engaging classroom discussions on topics such as President Trump's travel ban on ISIS as a state and strengths and weaknesses of the United Nations This unique approach provides short segments of topic coverage plenty of summarizing content and review questions as well as comprehensive learning objectives which will help you understand the realities of political science today

The Promise and Perils of Transnationalization Benjamin Stachursky, 2013 To date most constructivist international relations studies have characterized the influence of transnationalism on domestic forms of activism as uniformly positive In particular transnational interactions are viewed as positive factors for the development and daily impact of gender activism Benjamin Stachursky's book questions the unvarying positive view of transnationalism on domestic forms of activism arguing for a more nuanced analysis that permits an understanding of the enabling and restricting effects of transnationalism Stachursky also challenges the dominant view of civil society as normatively homogenous by illustrating the complex relationships and conflicts that exist between NGOs and other civil society representatives He grounds his theoretical arguments with a comparative case study on women's rights activism in Egypt and Iran which uses semi structured interviews with women's rights activists in the two countries and analysis of documentation by local political and societal actors Looking at the period from the mid 1980s up to present developments such as the Arab Spring Stachursky analyzes the emergence and development of NGO activism in Egypt and Iran the social political and legal context of NGO activism and key domestic debates on the impact and legitimacy of the actors operating in women's rights activism By closely examining the ambivalent relationship between transnationalism and human rights organizations Stachursky proves that transnationalization has both enabling and constraining effects on the domestic legitimacy of women's rights activists and on their ability to create meaningful social and political change

Political Theory and Power Sarah Joseph, 2004 This book draws attention to certain significant changes in the way in which power has been defined and it also examines some of the critical responses which those changes have evoked The objective is not to try and evolve a universally acceptable and comprehensive definition of power and of related terms like authority and influence The argument of the book is that that would be an impossible project since social and political theories themselves constitute an intervention into political discourse of a society and they may implicitly or explicitly embody a political perspective
