Psychological Theories Of Religion:

Psychological Theories of Religion James Forsyth, 2003 This book surveys the major theorists in the psychology of religion Sigmund Freud C G Jung William James Erich Fromm Gordon Allport Abraham Maslow and Viktor Frankl who are all seminal thinkers and represent the classical theories in this field Each of these theorists presents a more or less comprehensive theory of religion which attempts to give an account of the psychological origin and or value of religion The approach of the book in each case shows how the theory of religion emerges not only from the theorist's psychological theory but also from his own life experience Each chapter contains an introductory overview of the theory biographical material on the theorist his theory of personality his theory of religion and an evaluation of the theory of religion This consistent chapter format discusses the theorist's influence on the field points out some developments from and reactions to the theory and raises certain questions in order to stimulate readers' own critical responses For individuals who want to view and better understand religion from the psychological perspective

Eight Theories of Religion Daniel L. Pals, 2006 Why do human beings believe in divinities Why do some seek eternal life while others seek escape from recurring lives Why do the beliefs and behaviors we typically call religious so deeply affect the human personality and so subtly weave their way through human society Revised and updated in this second edition *Eight Theories of Religion* considers how these fundamental questions have engaged the most important thinkers of the modern era Accessible systematic and succinct the text examines the classic interpretations of religion advanced by theorists who have left a major imprint on the intellectual culture of the twentieth century The second edition features a new chapter on Max Weber a revised introduction and a revised expanded conclusion that traces the paths of further inquiry and interpretation traveled by theorists in the most recent decades *Eight Theories of Religion* Second Edition begins with Edward Burnett Tylor and James Frazer two Victorian pioneers in anthropology and the comparative study of religion It then considers the great reductionist approaches of Sigmund Freud Emile Durkheim and Karl Marx all of whom have exercised wide influence up to the present day The discussion goes on to examine the leading challenges to reductionism as articulated by sociologist Max Weber new to this edition and Romanian American comparativist Mircea Eliade Finally it explores the newer methods and ideas arising from the African field studies of ethnographer E E Evans Pritchard and the interpretive anthropology of Clifford Geertz Each chapter offers biographical background theoretical exposition conceptual analysis and critical assessment This common format allows for close comparison and careful evaluation throughout Ideal for use as a supplementary text in introductory religion courses or as the central text in sociology of religion and courses centered on the explanation and interpretation of religion *Eight Theories of Religion* Second Edition offers an illuminating treatment of this controversial and fascinating subject

Advances in the Psychology of Religion Michael Argyle, 2013-10-22 This collection of previously unpublished papers written by well known researchers in the psychology of religion is unique in its broad coverage and in its comparison between quite different and

strictly theoretical perspectives The subjects range from theoretical analyses of social science perspectives on religion and its methods to reports of experimental correlational or descriptive studies of religious experience and attitudes The emphasis throughout is on the directions in which this work might move in the future *Attachment, Evolution, and the Psychology of Religion* Lee A. Kirkpatrick, 2005-01-01 In this provocative and engaging book Lee Kirkpatrick establishes a broad comprehensive framework for approaching the psychology of religion from an evolutionary perspective Kirkpatrick argues that religion is a collection of byproducts of numerous psychological mechanisms and systems that evolved for other functions Theories of Religion Seth Daniel Kunin, Jonathan Miles-Watson, 2006 This book provides a comprehensive selection of readings that relate to and explore the definition of religion The texts come from a wide range of approaches unified both by the questions they are addressing and their broadly social scientific perspective The disciplines covered include anthropology phenomenology psychology and sociology The editors have also included some key texts relating to the feminist approach to and critique of religion The first section of the book includes some of the foundational texts such as materials by Marx Freud and Durkheim The remaining sections look at more recent discussions of the issues from the different disciplinary perspectives Each reading is introduced by a biographical sketch of the author The book also includes introductory discussions to each section that both raise the key issues developed in a particular discipline and address the disciplinary approaches from a more critical stance Theories of Religion A Reader is an invaluable critical resource accessible to a broad audience as well as students of theology and religious studies **The Psychology of Religion, Fourth Edition** Ralph W. Hood, Jr., Peter C. Hill, Bernard Spilka, 2009-07-15 Scholarly and comprehensive yet accessible this state of the science work is widely regarded as the definitive graduate level psychology of religion text The authors synthesize classic and contemporary empirical research on numerous different religious groups Coverage includes religious thought belief and behavior across the lifespan links between religion and biology the forms and meaning of religious experience the social psychology of religious organizations and connections to morality coping mental health and psychopathology Every chapter features thought provoking quotations and examples that bring key concepts to life New to This Edition Revised and updated with the latest theories methods and empirical findings Many new research examples Restructured with fewer chapters for better fit with a typical semester More attention to the differences between religion and spirituality Covers emerging topics genetics and neurobiology positive psychology atheism and more **Psychology, Religion, and the Nature of the Soul** Graham Richards, 2011-06-02 Neither a book about the psychology of spirituality nor America's ongoing turf wars between religion and science Psychology Religion and the Nature of the Soul takes to task many of the presumed relationships between the two from sharing common concerns to diametrically hostile opposites to analyze the myriad functions religion and psychology play in our understanding of the human life and mind Graham Richards takes the historical and philosophical long view in these rigorous and readable essays which trace three long running and potentially outmoded threads that

psychology and religion are irrelevant to each other that they are complementary and should collaborate and that one will eventually replace the other He references a stunning variety of texts from Freud and Allport to Karen Armstrong and Paul Tillich reflecting the evolution of these ideas over the decades to emphasize both the complexity of the issues and the enduring lack of easy answers The eloquence of the writing and passionate objectivity of the argument will interest readers on all sides of the debate as the author examines the religious origins of psychology the original dichotomy mythos versus logos the authenticity of religious experience Religion and personality the problematic role of prayer and Religion in the history of psychotherapy For those making a serious study of the history of psychology Psychology Religion and the Nature of the Soul will inspire a fresh wave of critical discussion and inquiry **Freud and Jung on Religion** Michael

Palmer, 2022-10-27 In this outstanding book originally published in 1997 and subsequently translated into many languages Michael Palmer presents a detailed and comparative study of the two most famous theories of religion in the history of psychology those of Freud and Jung The first part of the book analyses Freud's claim that religion is an obsessional neurosis a psychological illness fueled by sexual repression and the second part considers Jung's rejection of Freud's theory and his own assertion that it is the absence of religion not its presence which leads to neurosis Originally given as a series of lectures at Bristol University this Classic edition of Freud and Jung on Religion is important reading for general and specialist readers alike as it assumes no prior knowledge of the theories of Freud or Jung and is an invaluable teaching text **21st Century**

linking theological ideas with political economic processes in terms of the structural relations of power Ethnographically this research investigates the theological processes of Hong Kong Chinese Christians during a period of significant social change and crisis precipitated by the return of Hong Kong to China in 1997 It shows how local Christians and Christian institutions mediated the significant regional national and transnational forces of political economic change by connecting theological practice to the structural relations of power The Christian response was a contested process closely intertwined with the broader contested processes of social organization This study develops an understanding of Christianity that goes beyond ecclesiastical hegemony to encompass struggles over human practice meaning and representation in relation to the changing political economic context These findings implicate religious ideas and practice as significant to an understanding of social inequalities and powerlessness by connecting ideologies to material conditions Christian ideas may be used to legitimize an oppressive social order or they may be used to liberate those who are oppressed Issues related to the policies and practice of development should take seriously the role of religious beliefs and practices
