The study of economic concepts in this way leads to asking new questions concerning various issues relevant to economics. The goal of the text is to provide an interdisciplinary perspective to readers in order to equip them with information that is key to address global economic challenges. Thus this pluralist approach calls for a reflection of the evolution of global social and economic conditions to demonstrate problem solving approaches that align with the goal of addressing these challenges. *Pluralist Readings in Economics* Key concepts and policy tools for the 21st century is suitable to a broad interdisciplinary readership as it will benefit all those who seek to better understand the complex stakes of the capitalist system in the tensions between regulatory policies, free market equilibria and participatory openings in governance. Resek, Janet R. Fitch, 1980 **Islamic Microeconomics** Lukman Hanif Arbi, M. Ishaq Bhatti, 2023-11-01 This book bridges the gap between Islamic and conventional micro economics by demonstrating how modern tools and theories of microeconomics can be applied to Islamic assumptions regarding economics and finance. In contrast to the tendency for Islamic economics and finance proponents to use qualitative and normative approaches based on idealistic assumptions, this book demonstrates how one can instead construct analytical models of Islamic economics and finance and simply compare the implications with those predominant in today's world. This book also offers extensive literature reviews demonstrating that for a long time the gap between Islamic and conventional economics and finance is not as wide as previously thought, allowing those with an interest in both fields to participate more effectively and meaningfully in the ongoing discourse between the two fields. The authors conceptualize a general approach and apply it to basic consumer theory. More advanced microeconomic ideas are then discussed, culminating in demonstrations of how contract theory can facilitate a deeper analysis and appreciation of Islamic financial securities. A wide spectrum of academic literature on both Islamic and conventional economics and finance is drawn upon to facilitate a better appreciation for both fields and to inspire future works comparing the two in a more objective manner.
