The New Peasantries Jan Douwe van der Ploeg, 2018-06-13 When first published in 2008 The New Peasantries revolutionized our ways of thinking of what constitutes the peasantry and re-peasantization It showed how a new era of empire and globalization was creating new forms of peasantry This new edition is thoroughly revised with a reorganization of chapters and several new chapters added It includes a new chapter on China based on the author s extensive fieldwork there and much more information on Brazil It integrates and critically reviews the many publications on peasants peasantries and peasant modes of agricultural production published in recent years The theoretical discussion is enriched with more attention to the seminal work of Chayanov Greater attention is also paid to the construction of new markets a theme that will remain a major issue in the coming decade It combines and integrates different bodies of literature the rich traditions of peasant studies development and rural sociology neo institutional economics and debates on empire and globalization The original book has been used in several international postgraduate courses The experience and feedback thus obtained has been used to

simplify the structure of the book and make it more accessible as a textbook for students

Evaluating Sustainable Development Okechukwu Ukaga, Chris Maser, 2023-07-12 This book presents the principles and the tools for participatory evaluation of sustainable development growth that does not compromise the ability of future generations to meet their needs. It is intended for any citizen or group that may be concerned with protecting or recovering a cultural heritage, assessing the impact of a project or of plans that impact an environment or ecosystem. The authors describe participatory evaluation processes that will empower all interested stakeholders, anyone impacted by a proposed venture, to determine and control what is to be evaluated and how it is evaluated, to articulate and define their community's vision, and to ensure that development plans meet their community's needs sustainably. Acknowledging that the specific concepts, challenges, opportunities, and circumstances surrounding sustainable development differ significantly from one place or group to another, the authors provide an adaptable framework for developing an evaluation plan, as well as the tools for collecting, analyzing, interpreting, and presenting data. They explain how to use and communicate findings to ensure a full and appropriate debate about the issues and finally how to implement the evaluation plan. An important and practical book for anyone concerned with the impact of planning and development issues and who wants to ensure that all sectors of their community are given a voice in decisions that affect them.
