Rents Taxes And Peasant Resistance The Lower Yangzi Region 1840-1950:

Rents, Taxes, and Peasant Resistance Kathryn Bernhardt, 2022 *China Transformed* R. Bin Wong, 2018-10-18 The assumption still made in much social science research that Europe provides a universal model of development is fundamentally mistaken according to R Bin Wong The solution is not however simply to reject Eurocentric norms but to build complementary perspectives such as a Sinocentric one to evaluate current understandings of European developments A genuinely comparative perspective he argues will free China from wrong expectations and will allow those working on European problems to recognize the distinct character of Western development Living Standards in the Past Robert C. Allen, Tommy Bengtsson, Martin Dribe, 2005-03-24 Why did Europe experience industrialisation and modern economic growth before China India or Japan This is one of the most fundamental questions in Economic History and one that has provoked intense debate The main concern of this book is to determine when the gap in living standards between the East and the West emerged The established view dating back to Adam Smith is that the gap emerged long before the Industrial Revolution perhaps thousands of years ago While this view has been called into question and many of the explanations for it greatly undermined the issue demands much more empirical research than has yet been undertaken How did the standard of living in Europe and Asia compare in the seventeenth and eighteenth centuries The present book proposes an answer by considering evidence of three sorts The first is economic focusing on income food production wages and prices The second is demographic comparing heights life expectancy and other demographic indicators The third combines the economic and demographic by investigating the demographic vulnerability to short term economic stress The contributions show the highly complex and diverse pattern of the standard of living in the pre industrial period The general picture emerging is not one of a great divergence between East and West but instead one of considerable similarities These similarities not only pertain to economic aspects of standard of living but also to demography and the sensitivity to economic fluctuations In addition to these similarities there were also pronounced regional differences within the East and within the West regional differences that in many cases were larger than the average differences between Europe and Asia This clearly highlights the importance of analysing several dimensions of the standard of living as well as the danger of neglecting regional social and household specific differences when assessing the level of well being in the past Civil War in China Suzanne Pepper, 1999 Many books have tried to analyze the reasons for the Chinese communist success in China s 1945_1949 civil war but Suzanne Pepper s seminal work was the first and remains the only comprehensive analysis of how the ruling Nationalists lost that war not just militarily but by alienating the civilian population through corruption and incompetence Now available in a new edition this authoritative investigation of Kuomintang failure and communist success explores the new research and archival resources available for assessing this pivotal period in contemporary Chinese history Even more relevant today given the contemporary debates in Hong Kong and Taiwan over the terms of reunification with a communist led national government in

Beijing this book is essential reading for anyone seeking a nuanced understanding of twentieth century Chinese politics

Village China Under Socialism and Reform Huaiyin Li, 2009-03-12 Village China Under Socialism and Reform offers a comprehensive account of rural life after the communist revolution detailing villager involvement in political campaigns since the 1950s agricultural production under the collective system family farming and non agricultural economy in the reform and everyday life in the family and community Li's rich examination draws on original documents from local agricultural collectives newly accessible government archives and his own fieldwork in Qin village of Jiangsu province to highlight the continuities in rural transformation Firmly disagreeing with those who claim that recent developments in rural China represent a radical break with pre reform sociopolitical practices and patterns of production Li instead draws a clear history connecting the current situation to ecological social and institutional changes that have persisted from the collective era

Marginality and Subversion in Korea Sun Joo Kim, 2013-11-01 In the history of Korea the nineteenth century is often considered an age of popular rebellions Scholarly approaches have typically pointed to these rebellions as evidence of the progressive direction of the period often using the theory of class struggle as an analytical framework In Marginality and Subversion in Korea Sun Joo Kim argues that a close reading of the actors and circumstances involved in one of the century's major rebellions the Hong Kyongnae Rebellion of 1812 leads instead to more complex conclusions Drawing from primary sources in Korean Japanese and classical Chinese this book is the most extensive study in the English language of any of the major nineteenth century rebellions in Korea Whereas previous research has focused on economic and landlord tenant tensions suggesting that class animosity was the dominant feature in the political behavior of peasants Sun Joo Kim explores the role of embittered local elites in providing vital support in the early stages to spur social change that would benefit these elites as much as the peasant class Later however many of these same elites would rally to the side of the state providing military and material contributions to help put down the rebellion Kim explains why these opportunistic elites became discontented with the state in the scramble for power prestige and scarce resources and why many ultimately worked to rescue and reinforce the Choson dynasty and the Confucian ideology that would prevail for another one hundred years This sophisticated groundbreaking study will be essential reading for historians and scholars of Korean studies as well as those interested in early modern East Asia social transformation rebellions and revolutions

Of Camel Kings and Other Things Roxann Prazniak, 1999-01-14 From the perspective of village activists across China this book tells the stories of farmers and rural laborers who raised the banner of opposition to constitutional reform during the first decade of the twentieth century The author brings to life the stories of the Camel King of Zunhua county Qu Shiwen and the Four Mountains of Laiyang county and many others who criticized government modernization efforts known collectively as the New Policy Using county archives including oral histories as well as memoirs periodical literature missionary records and official documents both Chinese and foreign Of Camel Kings and Other Things constructs from fragmented sources a

coherent historical view vital to our understanding of China's twentieth century crises and the dilemmas of modernity itself

An Economic History of China Richard von Glahn, 2016-03-10 The first comprehensive study of China's economic development across 3 000 years of history to be published in English **Tigers, Rice, Silk, and Silt** Robert Marks, 1998-02-28 Challenging the conventional wisdom conveyed by Western environmental historians about China this book examines the correlations between economic and environmental changes in the southern Chinese provinces of Guangdong and Guangxi from 1400 to 1850 but also provides substantial background from 2CE on Robert Marks discusses the impact of population growth on land use patterns the agro ecology of the region and deforestation the commercialization of agriculture and its implications for ecological change the impact of climatic change on agriculture and the ways in which the human population responded to environmental challenges This book is a significant contribution to both Chinese and environmental history It is groundbreaking in its methods and in its findings The Great Leveler Walter Scheidel, 2025-05-20 How only violence and catastrophes have consistently reduced inequality throughout world history Are mass violence and catastrophes the only forces that can seriously decrease economic inequality To judge by thousands of years of history the answer is yes Tracing the global history of inequality from the Stone Age to today Walter Scheidel shows that inequality never dies peacefully Inequality declines when carnage and disaster strike and increases when peace and stability return The Great Leveler is the first book to chart the crucial role of violent shocks in reducing inequality over the full sweep of human history around the world Ever since humans began to farm herd livestock and pass on their assets to future generations economic inequality has been a defining feature of civilization Over thousands of years only violent events have significantly lessened inequality The Four Horsemen of leveling mass mobilization warfare transformative revolutions state collapse and catastrophic plagues have repeatedly destroyed the fortunes of the rich Scheidel identifies and examines these processes from the crises of the earliest civilizations to the cataclysmic world wars and communist revolutions of the twentieth century Today the violence that reduced inequality in the past seems to have diminished and that is a good thing But it casts serious doubt on the prospects for a more equal future An essential contribution to the debate about inequality The Great Leveler provides important new insights about why inequality is so persistent and why it is unlikely to decline anytime soon
