Repairing The American Metropolis Common Place Revisited:

Repairing the American Metropolis Doug Kelbaugh, 2002 Repairing the American Metropolis is based on Douglas Kelbaugh's Common Place Toward Neighborhood and Regional Design first published in 1997. It is more timely and significant than ever with new text, charts and images on architecture sprawl and New Urbanism, a movement that he helped pioneer. Theory and policies have been revised, refined, updated and developed as compelling ways to plan and design the built environment. This is an indispensable book for architects, urban designers and planners, landscape architects, architecture and urban planning students and scholars, government officials, developers, environmentalists and citizens interested in understanding and shaping the American metropolis.

Portico, 2000 **Sprawling Places** David Kolb, 2010-01-25 People often bemoan the spread of malls, suburban strips, subdivisions and other sprawling places in contemporary America. But are these places as bad as critics claim? In *Sprawling Places*, David Kolb questions widely held assumptions about our built environments. Kolb agrees there is a lot not to like about many contemporary places but to write them off simply as commodified nonplaces does not treat them critically. Too often, Kolb says, aesthetic character and urban authenticity are the focus of critics when it is more important to understand a place's complexity and connectedness. Kolb acknowledges that the places around us increasingly have banal exteriors yet they can be complex and can encourage their inhabitants to use them in multiple nonlinear ways. Ultimately, Kolb believes human activity within a place is what defines it. Even our most idealized classical places, he shows, change over the course of history when subjected to new linkages and different flows of activity. Engaging with the work of such writers and critics as Henri Lefebvre, Manuel Castells, Karsten Harries and Christian Norberg-Schulz, Kolb seeks to move discussions about sprawl away from the idea that we must choose between being rooted in the local Black Forest soil or wandering in directionless space. By increasing our awareness of complexity and other issues, Kolb hopes to broaden and deepen people's thinking about the contemporary built environment and to encourage better designs in the future.

Public Places Urban Spaces Matthew Carmona, 2021-02-15 *Public Places Urban Spaces* provides a comprehensive overview of the principles, theory and practices of urban design for those new to the subject and for those requiring a clear and systematic guide. In this new edition, the book has been extensively revised and restructured. Carmona advances the idea of urban design as a

continuous process of shaping places fashioned in turn by shifting global local and power contexts At the heart of the book are eight key dimensions of urban design theory and practice temporal perceptual morphological visual social functional and two new process dimensions design governance and place production This extensively updated and revised third edition is more international in its scope and coverage incorporating new thinking on technological impact climate change adaptation strategies for urban decline cultural and social diversity place value healthy cities and more all illustrated with nearly 1 000 carefully chosen images Public Places Urban Spaces is a classic urban design text and everyone in the field should own a copy

The Working Landscape Peter F. Cannavo, 2007-06-22 In America today we see rampant development unsustainable resource exploitation and commodification ruin both natural and built landscapes disconnecting us from our surroundings and threatening our fundamental sense of place Meanwhile preservationists often respond with a counterproductive stance that rejects virtually any change in the landscape In The Working Landscape Peter Cannav identifies this zero sum conflict between development and preservation as a major factor behind our contemporary crisis of place Cannav offers practical and theoretical alternatives to this deadlocked polarized politics of place by proposing an approach that embraces both change and stability and unifies democratic and ecological values creating a working landscape Place Cannav argues is not just an object but an essential human practice that involves the physical and conceptual organization of our surroundings into a coherent enduring landscape This practice must balance development which he calls founding and preservation Three case studies illustrate the polarizing development preservation conflict the debate over the logging of old growth forests in the Pacific Northwest the problem of urban sprawl and the redevelopment of the former site of the World Trade Center in New York City Cannav suggests that regional democratic governance is the best framework for integrating development and preservation and he presents specific policy recommendations that aim to create a working landscape in rural suburban and urban areas A postscript on the mass exile displacement and homelessness caused by Hurricane Katrina considers the implications of future climate change for the practice of place

Managing the Magic of Old Places Jeremy

Wells, 2025-10-14 From 1849 to the early 1980s the development of US historic preservation policy was shaped by fewer than one hundred elite White men from Europe and America This orthodox preservation doctrine has too long silenced the vibrant experiential relationships between everyday people and their heritage Managing the Magic of Old Places Crafting Public Policies for People Centered Historic Preservation offers a radical rethinking of how historic preservation is approached in the United States Author Jeremy C Wells argues for a revolutionary shift in federal preservation policy one that embraces community based participatory practice and draws from environmental psychology to tap into the intangible emotional connections people have with old places Wells highlights the experiential values that laypeople often ascribe to historic environments which are frequently dismissed by expert driven policies He contends that if historic preservation policy continues to ignore these aspects the field will lose relevance as the gap between professionals and the public widens

Drawing from interdisciplinary research in the social sciences particularly phenomenology and environmental psychology Wells's vision of public preservation policy centers the lived experiences of communities reinvigorating the field and ensuring that the preservation of historic places resonates with a wider more inclusive audience Wells positions his work within the growing field of critical heritage studies yet his focus on the psychological and emotional aspects of preservation distinguishes it as a unique contribution By placing the needs and experiences of the public at the heart of preservation efforts Wells critiques the historical foundations of US preservation policy while offering a bold agenda for reform

Sustainable Practices: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources, 2013-12-31 This reference explores some of the most recent developments in sustainability delving into topics beyond environmental science to cover issues of sustainable economic political and social development Provided by publisher

Green and Ecological Technologies for Urban Planning: Creating Smart Cities Ercoskun, Ozge Yalciner, 2011-12-31 Ecological and technological eco tech planning provides a possible response to the essential issues of sustainability and rehabilitation in rapidly growing urban spaces Green and Ecological Technologies for Urban Planning Creating Smart Cities addresses the ecological technological and social challenges faced in the smart urban planning and design of settlements when using eco technologies from sustainable land use to transportation and from green areas to municipal applications with a focus on resilience Containing research from leading international experts this book provides comprehensive coverage and definitions of the most important issues concepts trends and technologies within the planning field **Shaping Places**

David Adams, Steven Tiesdell, 2013 Shaping Places explains how towns and cities can turn real estate development to their advantage to create the kind of places where people want to live work relax and invest It contends that the production of quality places which enhance economic prosperity social cohesion and environmental sustainability require a transformation of market outcomes The core of the book explores why this is essential and how it can be delivered by linking a clear vision for the future with the necessary means to achieve it Crucially the book argues that public authorities should seek to shape regulate and stimulate real estate development so that developers landowners and funders see real benefit in creating better places Key to this is seeing planners as market actors whose potential to shape the built environment depends on their capacity to understand and transform the embedded attitudes and practices of other market actors This requires planners to be skilled in understanding the political economy of real estate development and successful in changing its outcomes through smart intervention Drawing on a strong theoretical framework the book reveals how the future of places will come to be shaped through constant interaction between State and market power Filled with international examples essential case studies color diagrams and photographs this is essential reading for undergraduate and graduate students taking planning property real estate or urban design courses as well as for social science students more widely who wish to know how the shaping of place really occurs
