Repairs Reuse Recycling First Steps Toward A Sustainable Society Worldwatch Paper No 23:

The Liberation of Life Charles Birch, John B. Cobb, 1985-01-10 This book is about the liberation of the concept of life from the bondage fashioned by the interpreters of life ever since biology began and about the liberation of the life of humans and non humans alike from the bondage of social structures and behaviour which now threatens the fullness of life s possibilities if not survival itself It falls into a tradition of writings about human problems from a perspective informed by biology It rejects the mechanistic model of life dominant in the Western world and develops an alternative ecological model which is applicable to the life of the cell and the life of the human community For the first time it brings together in one work the insights of modern biology with those of a modern holistic philosophy and a liberal theology in a way which challenges conventional approaches to science agriculture sociology politics economics development and liberation movements

Foreign Affairs Research Papers Available Foreign Affairs Research Documentation Center, 1978 **Resources in Education**, 1979 Building Sustainable Societies: A Blueprint for a Post-industrial World Dennis Clark Pirages, 2016-09-16 A collection of articles addressing the issue of whether the industrial model of human progress can be sustained in the long term It asks what the social political economic and environmental implications as well as potential solutions to the problem of resource intensive growth are *Recycling and the Politics of Urban Waste* Matthew Gandy, 2014-06-03 The affluence of western society has given rise to unprecedented quantities of waste presenting one of the most intractable environmental problems for contemporary society This book examines recycling and municipal waste management in three major cities London New York and Hamburg A range of political and economic issues are examined to illustrate how any reduction in the size of the waste stream in order to achieve more equitable and environmentally sustainable patterns of resource use is incompatible with the current emphasis in the use of the market for environmental protection The case studies show how contrary to the hopes of many environmentalists and policy makers municipal waste management is moving steadily towards the profitable option of incineration with energy recovery rather than the recycling of materials or waste reduction at source The evidence suggests that the achievement of a more sustainable pattern of recycling and waste management policy would demand a fundamental change in public policy to give government a more active role in environmental protection Steps toward a Philosophy of Engineering Carl Mitcham, 2019-12-06 The rise of classic Euro American philosophy of technology in the 1950s originally emphasized the importance of technologies as material entities and their mediating influence within human experience Recent decades however have witnessed a subtle shift toward reflection on the activity from which these distinctly modern artifacts emerge and through which they are engaged and managed that is on engineering What is engineering What is the meaning of engineering How is engineering related to other aspects of human existence Such basic questions readily engage all major branches of philosophy ontology epistemology ethics political philosophy and aesthetics although not always to the same degree The historico philosophical and critical reflections collected here record a series of

halting steps to think through engineering and the engineered way of life that we all increasingly live in what has been called the Anthropocene The aim is not to promote an ideology for engineering but to stimulate deeper reflection among engineers and non engineers alike about some basic challenges of our engineered and engineering lifeworld **The Ecological Community** Roger S. Gottlieb,2014-01-02 The Ecological Community offers important and previously unexplored responses to the environmental crisis The premise of this volume writes editor Roger Gottlieb is that the environmental crisis challenges the presuppositions of and creates a rich field of creative work in philosophy politics and moral theory These eighteen essays are fresh and compelling interrogations of the existing wisdom in a host of areas including liberalism communicative ethics rights theory and environmental philosophy itself Contributors Avner de Shalit Gus diZerega Roger S Gottlieb Eric Katz Robert Kirkman Andrew Light Brian Luke David Macauley Mark A Michael Carl Mitcham John O Neill Holmes Rolston III David Schlosberg William Throop Steven Vogel Mark I Wallace Peter S Wenz Michael E Zimmerman

Subcommittee on Department of the Interior and Related Agencies,1979 Tomorrow's World Duncan McLaren,Dr Duncan|Bullock McLaren (Simon|Yousuf, Nusrat),Simon Bullock,Nusrat Yousuf,2013-11-05 This title uses the concept of environmental space to resolve many of the issues facing us in the future and applies the lessons specifically to the UK Believing that we occupy more environmental space than the world can afford this book seeks to explain what we can do to live comfortably within what we actually have through efficiency and sufficiency In addition it aims to present the sustainable levels of consumption for Britain as targets for government industry and households as well as an idea of how to achieve them Bibliography on Sustainable Development ,1995
