## **Repertoires And Cycles Of Collective Action:**

Repertoires and Cycles of Collective Action Mark Traugott, 1995 The modern era has generated a bewildering profusion of popular protest including widespread social movements and sporadic revolutionary upheaval Despite the seemingly chaotic character of such collective action social scientists have increasingly noted the remarkable regularities exhibited by even the most tumultuous social change In this volume sociologists political scientists and historians come together to assess the complementary concepts of repertoires and cycles as tools for illuminating the consistent patterns that emerge from the apparent chaos The significance of repertoires recurrent forms or tactics of social protest is explored in an essay on eighteenth and nineteenth century Britain by the originator of the concept Charles Tilly Sidney Tarrow whose work has most directly linked the concept of repertoires with that of cycles the recurrent peaks and troughs in the historical incidence of collective action contributes an essay that focuses on twentieth century Italy Other essays investigate the rhythms and logic of social change in contexts as diverse as sixteenth through nineteenth century Japan nineteenth century Europe and twentieth century America Through inquiries into the consequences of violent repression for social mobilization the struggle to control the linguistic terms of social conflict the unacknowledged antecedents of contemporary movements and the importance of movement families this volume demonstrates the usefulness of these two concepts and defines the relationship between them Collected from past issues of Social Science History with a new introduction and two new essays Repertoires and Cycles of Collective Action will reward an interdisciplinary audience of readers with the extraordinary vitality that emerges from this rich blend of historical perspectives Contributors Charles Brockett Craig Calhoun Doug McAdam Marc Steinberg Sidney Tarrow Charles Tilly Mark Traugott James White

**Key Concepts in Critical Social Theory** Nick Crossley, 2005 Clear and accessible Key Concepts in Critical Social Theory makes difficult ideas available to an undergraduate audience Larry Ray Professor of Sociology University of Kent The SAGE Key Concepts series provides students with accessible and authoritative knowledge of the essential topics in a variety of disciplines Cross referenced throughout the format encourages critical evaluation through understanding Written by experienced and respected academics the books are indispensable study aids and guides to comprehension Key Concepts in Critical Social Theory Provides brief accounts of the central ideas behind the key concepts Prepares students to tackle primary texts giving them a point of reference when they find themselves stuck Discusses each concept in an introductory way Offers further reading guidance for independent learning This is an essential companion for reading for students across the social sciences who are exploring critical theory for the first time

Contesting Psychiatry Nick Crossley, 2006-03-17 Resistance and social movements in mental health have been important in shaping current practice in both mental health and psychiatry Contesting Psychiatry focusing largely on the UK examines the history of resistance to psychiatry between 1950 and 2000 Building on the author's extensive research the book provides an empirical account and exploration of the key features

including an account of the key social movements and organizations who have contested psychiatry over the last fifty years the theorization of resistance to psychiatry which might apply to other national contexts and to social movement formation and protest in other medical arenas the exploration of theories of power in psychiatry Original and provocative in its approach this book offers a new sociological perspective on psychiatry Women's Health Care Carol S.

Weisman,1998-04-24 Because women have different health needs than men they experience the health care system differently Women have higher morbidity experiencing more disease and disability throughout the life span At the same time because women live longer they are more susceptible to late on set disease such as osteoporosis and dementia Yet until recently the question of gender equity in U S health care has received little attention **Transgressive Citizenship and**

**the Struggle for Social Justice** Lucy Earle,2017-03-29 This book analyses the struggle for social justice in S o Paulo Brazil It takes the wave of protests that began in the city in 2013 as a starting point and grounds them in the history of social movement mobilisation in urban Brazil Drawing on ethnographic fieldwork with a federation of housing movements this work demonstrates the ongoing relevance of the concept of the right to the city for social movements of the urban poor and examines these movements creative interpretation of national legislation to support their claims for housing and urban citizenship **Youth Movements and Elections in Eastern Europe** Olena Nikolayenko,2017-10-12 At the turn of the

twenty first century a tide of nonviolent youth movements swept across Eastern Europe Young people demanded political change in repressive political regimes that emerged since the collapse of communism The Serbian social movement Otpor Resistance played a vital role in bringing down Slobodan Milosevic in 2000 Inspired by Otpor s example similar challenger organizations were formed in Azerbaijan Belarus Georgia and Ukraine The youth movements however differed in the extent to which they could mobilize citizens against the authoritarian governments on the eve of national elections This book argues that the movement s tactics and state countermoves explain in no small degree divergent social movement outcomes Using data from semi structured interviews with former movement participants public opinion polls government publications non governmental organization NGO reports and newspaper articles the book traces state movement interactions in five post communist societies Azerbaijan Belarus Georgia Serbia and Ukraine *Revolutionizing Repertoires* Robert S.

Jansen,2017-10-17 Politicians and political parties are for the most part limited by habit they recycle tried and true strategies draw on models from the past and mimic others in the present But in rare moments politicians break with routine and try something new Drawing on pragmatist theories of social action *Revolutionizing Repertoires* sets out to examine what happens when the repertoire of practices available to political actors is dramatically reconfigured Taking as his case study the development of a distinctively Latin American style of populist mobilization Robert S Jansen analyzes the Peruvian presidential election of 1995 He finds that ultimately populist mobilization emerged in the country at this time because newly empowered outsiders recognized the limitations of routine political practice and understood how to modify transpose invent

and recombine practices in a whole new way Suggesting striking parallels to the recent populist turn in global politics Revolutionizing Repertoires offers new insights not only to historians of Peru but also to scholars of historical sociology and comparative politics and to anyone interested in the social and political origins of populism **Advances in the Visual**

**Analysis of Social Movements** Nicole Doerr,Alice Mattoni,Simon Teune,2013-03-14 This special issue is a key text in the current study of social movements It introduces new analytical concepts for understanding visuals in social movements and examines case studies from across the globe such as analysis of the symbols used in the Egyptian uprising and contested images from anti surveillance protests in Europe **The State against Society** Grzegorz Ekiert,1996-09-30 Classical

images of state socialism developed in contemporary social sciences were founded on simple presuppositions State socialist regimes were considered to be politically stable due to their pervasive institutional and ideological control over the everyday lives of their citizens impervious to reform and change and representative of extreme political and economic dependency Despite their contrasting historical experiences they have been treated as basically identical in their institutional design social and economic structures and policies Grzegorz Ekiert challenges this notion in a comparative analysis of the major political crises in post 1945 East Central Europe Hungary 1956 63 Czechoslovakia 1968 76 and Poland 1980 89 The author maintains that the nature and consequences of these crises can better explain the distinctive experiences of East Central European countries under communist rule than can the formal characteristics of their political and economic systems or their politically dependent status He explores how political crises reshaped party state institutions redefined relations between party and state institutions altered the relationship between the state and various groups and organizations within society and modified the political practices of these regimes He shows how these events transformed cultural categories produced collective memories and imposed long lasting constraints on mass political behavior and the policy choices of ruling elites These crises shaped the political evolution of the region produced important cross national differences among state socialist regimes and contributed to the distinctive patterns of their collapse *Does Skill Make Us Human?* Natasha

Iskander,2021-11-09 An in depth look at Qatar s migrant workers and the place of skill in the language of control and power Skill specifically the distinction between the skilled and unskilled is generally defined as a measure of ability and training but Does Skill Make Us Human shows instead that skill distinctions are used to limit freedom narrow political rights and even deny access to imagination and desire Natasha Iskander takes readers into Qatar s booming construction industry in the lead up to the 2022 World Cup and through her unprecedented look at the experiences of migrant workers she reveals that skill functions as a marker of social difference powerful enough to structure all aspects of social and economic life Through unique access to construction sites in Doha in depth research and interviews Iskander explores how migrants are recruited trained and used Despite their acquisition of advanced technical skills workers are commonly described as unskilled and disparaged as unproductive poor quality or simply bodies She demonstrates that skill categories adjudicate personhood

creating hierarchies that shape working conditions labor recruitment migration policy the design of urban spaces and the reach of global industries Iskander also discusses how skill distinctions define industry responses to global warming with employers recruiting migrants from climate damaged places at lower wages and exposing these workers to Qatar's extreme heat She considers how the dehumanizing politics of skill might be undone through tactical solidarity and creative practices With implications for immigrant rights and migrant working conditions throughout the world *Does Skill Make Us Human* examines the factors that justify and amplify inequality
