Perspectives on Content-Based Multimedia Systems Jian Kang Wu,Mohan S. Kankanhalli,Joo-Hwee Lim,Dezhong Hong,2006-04-11 Multimedia data comprising of images audio and video is becoming increasingly common The decreasing costs of consumer electronic devices such as digital cameras and digital camcorders along with the ease of transportation facilitated by the Internet has lead to a phenomenal rise in the amount of multimedia data generated and distributed Given that this trend of increased use of multimedia data is likely to accelerate there is an urgent need for providing a clear means of capturing storing indexing retrieving analyzing and summarizing such data Content based access to multimedia data is of primary importance since it is the natural way by which human beings interact with such information To facilitate the content based access of multimedia information the first step is to derive feature measures from these data so that a feature space representation of the data content can be formed This can subsequently allow for mapping the feature space to the symbol space semantics either automatically or through human intervention Thus signal to symbol mapping useful for any practical system can be successfully achieved Perspectives on Content Based Multimedia Systems provides a comprehensive set of techniques to tackle these important issues This book offers detailed solutions to a wide range of practical problems in building real systems by providing specifics of three systems built by the authors While providing a systems focus it also equips the reader with a keen understanding of the fundamental issues including a formalism for content based multimedia database systems multimedia feature extraction object based techniques signature based techniques and fuzzy retrieval techniques The performance evaluation issues of practical systems is also explained This book brings together essential elements of building a content based multimedia database system in a way that makes them accessible to practitioners in computer science and electrical engineering It can also serve as a textbook for graduate level courses

Handbook of Internet and Multimedia Systems and Applications Borko Furht,1998-12-29 Today multimedia applications on the Internet are still in their infancy They include personalized communications such as Internet telephone and videophone and interactive applications such as video on demand videoconferencing distance

learning collaborative work digital libraries radio and television broadcasting and others Handbook of Internet and Multimedia Systems and Applications a companion to the author's Handbook of Multimedia Computing probes the development of systems supporting Internet and multimedia applications Part one introduces basic multimedia and Internet concepts user interfaces standards authoring techniques and tools and video browsing and retrieval techniques Part two covers multimedia and communications systems including distributed multimedia systems visual information systems multimedia messaging and news systems conference systems and many others Part three presents contemporary Internet and multimedia applications including multimedia education interactive movies multimedia document systems multimedia broadcasting over the Internet and mobile multimedia

Second Edition Pagani, Margherita,2008-08-31 Advances in hardware software and audiovisual rendering technologies of recent years have unleashed a wealth of new capabilities and possibilities for multimedia applications creating a need for a comprehensive up to date reference The Encyclopedia of Multimedia Technology and Networking provides hundreds of contributions from over 200 distinguished international experts covering the most important issues concepts trends and technologies in multimedia technology This must have reference contains over 1 300 terms definitions and concepts providing the deepest level of understanding of the field of multimedia technology and networking for academicians researchers and professionals worldwide **Video Search and Mining** Dan Schonfeld,Caifeng Shan,Dacheng Tao,Liang Wang,2010-04-20 As cameras become more pervasive in our daily life vast amounts of video data are generated The popularity of YouTube and similar websites such as Tudou and Youku provides strong evidence for the increasing role of video in society One of the main challenges confronting us in the era of information technology is to fectively rely on the huge and rapidly growing video data accumulating in large multimedia archives Innovative video processing and analysis

techniques will play an increasingly important role in resolving the difficult task of video search and retrieval. A wide range of video based applications have benefited from advances in video search and mining including multimedia information management, human computer interaction, security and surveillance, copyright protection and personal entertainment to name a few. This book provides an overview of emerging new approaches to video search and mining based on promising methods being developed in the computer vision and image analysis community. Video search and mining is a rapidly evolving discipline whose aim is to capture interesting patterns in video data. It has become one of the core areas in the data mining research community. In comparison to other types of data mining e.g. text video mining is still in its infancy. Many challenging research problems are facing video mining researchers.
